# P-C3560DN P-C4070DN

# **Operation Guide**

## **Preface**

Thank you for purchasing the P-C3560DN/P-C4070DN.

This Operation Guide is intended to help you operate the machine correctly, perform routine maintenance, and take simple troubleshooting measures as needed so that the machine can always be used in the optimum condition.

Please read this Operation Guide before using the machine.

### We recommend the use of our own brand supplies.

Please use our genuine toner containers, which have passed rigorous quality control testing.

The use of non-genuine toner containers may cause failure.

We will not be liable for any damages caused by the use of third party supplies in this machine.

## **Machine Features**

The machine is equipped with many useful functions.

→ Using Various Functions (page 6-1)

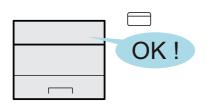

Here are some examples.

### Optimize your office workflow Save energy and cost Save frequently used documents in Use less toner for printing Save energy as needed the machine (Custom Box) (Energy Saver function) (EcoPrint) You can save the frequently used The machine is equipped with Energy You can save toner consumption with this document in the machine and print it Saver function that automatically function. when needed. switched into Sleep Mode. When you only need to check the printed content, such as a trial print run or Using a Custom Box (page 5-6) Energy Saver function (page 2-18) documents for internal confirmation, use this function to save toner. Use this function when a high-quality print is not required. ◆ EcoPrint (page 6-4)

### Strengthen security

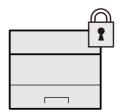

## Log in by ID card (Card Authentication)

You can log in simply by touching an ID card. You don't need to enter your user name and password.

 Card Authentication Kit(B) "Card Authentication Kit" (page 11-3)

## Strengthen security (Settings for Administrator)

Various functions are available for administrators to strengthen security.

 Strengthening the Security (page 2-31)

### Use functions more efficiently

## Make the machine quiet (Quiet Mode)

You can make the machine quiet by reducing its running noise. You can configure this mode by job.

→ Quiet Mode (page 6-5)

### Use functions more efficiently

## Install the machine without concerning the network cables (Wireless Network)

In an environment where the wireless LAN is used, you can install the machine without concerning the network cables.

→ Wireless Network (page 8-20)

## Use USB memory (USB Memory)

It is useful when you need to print document outside your office or you cannot print document from your PC.

You can print the document from the USB memory by plugging it directly into the machine.

 Printing Documents Stored in Removable USB Memory (page 5-12)

## Perform remote operation (Embedded Web Server RX)

You can access to the machine remotely to print, send or download data.

Administrators can configure the machine behavior or management settings.

► Embedded Web Server RX (page 2-32)

## **Guides Provided with the Machine**

The following guides are provided with the machine. Refer to each guide as needed.

The contents of the guides are subject to change without notice for the purpose of improvement of machine performance.

### **Printed guides**

# Start using the machine quickly

machine

### **Quick Guide**

Explains how to use basic functions of the machine, how to use convenient features, how to perform routine maintenance, and what to do when problems occur.

### Safety Guide

Provides safety and cautionary information for installation environment and use of the machine. Be sure to read this guide before using the machine.

### Safety Guide (P-C3560DN/P-C4070DN)

Indicates the space required for machine installation, and describes the cautionary labels and other safety information. Be sure to read this guide before using the machine.

## **Guides (PDF) on the DVD (Product Library)**

# Use the machine thoughtfully

### Operation Guide (This Guide)

Explains how to load paper and perform basic operations, and indicates default settings and other information.

### Use the ID card

## Card Authentication Kit (B) Operation Guide

Explains how to perform authentication using the ID card.

## Strengthen security

### Data Security Kit (E) Operation Guide

 Explains how to introduce and use the Data Security kit (E), and how to overwrite and encrypt data.

# Easily register machine information and configure settings

### **Embedded Web Server RX User Guide**

Explains how to access the machine from a Web browser on your computer to check and change settings.

# Print data from a computer

### **Printing System Driver User Guide**

Explains how to install the printer driver and use the printer function.

### Directly print a PDF file

### Network Tool for Direct Printing Operation Guide

Explains how to print PDF files without launching Adobe Acrobat or Reader.

# Monitor the machine and printers on the network

### **NETWORK PRINT MONITOR User Guide**

Explains how to monitor your network printing system (the machine) with NETWORK PRINT MONITOR.

# Adjust the print position

### Maintenance Menu User Guide

Maintenance Menu provides the explanation on how to configure the print settings.

Install the following versions of Adobe Reader to view the manuals on the DVD. Version 8.0 or later

# **About the Operation Guide (this Guide)**

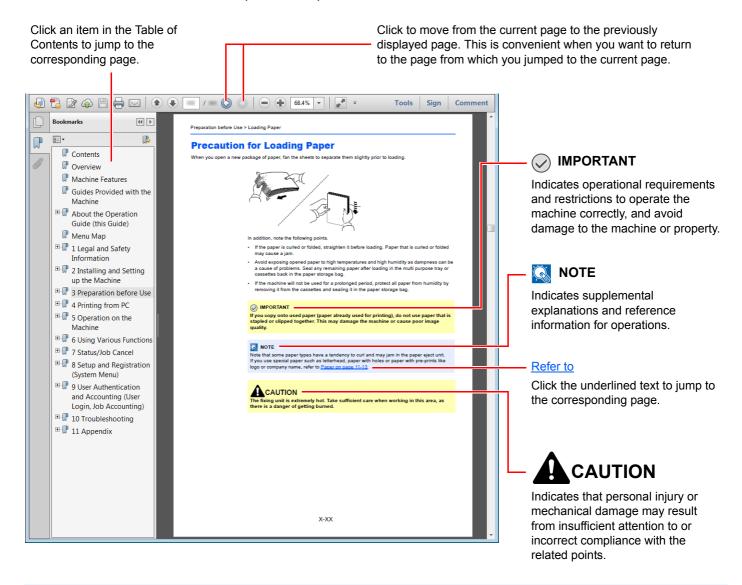

## Structure of the guide

The Operation Guide contains the following chapters.

	Chapter	Contents
1	Legal and Safety Information	Provides precautions regarding use of the machine and trademark information.
2	Installing and Setting up the Machine	Explains part names, cable connections, installation of the software, login, logout, and other matters related to administration of the machine.
3	Preparation before Use	Explains preparations and settings that are required in order to use the machine, such as how to use the operation panel, and load paper.
4	Printing from PC	Explains the basic steps for printing.
5	Operation on the Machine	Explains the basic procedures for using document boxes.
6	Using Various Functions	Explains convenient functions that are available on the machine.
7	Status/Job Cancel	Explains how to check the status of a job and the job history, and how to cancel jobs being printed or waiting to print. Also explains how to check paper and toner levels, and how to check the device status.
8	Setup and Registration (System Menu)	Explains System Menu and how it relates to the operation of the machine.
9	User Authentication and Accounting (User Login, Job Accounting)	Explains user login and job accounting.
10	Troubleshooting	Explains what to do when toner runs out, an error is displayed, or a paper jam or other problem occurs.
11	Appendix	Describes convenient options that are available for the machine. Provides information on media types and paper sizes, and gives a glossary of terms. Explains how to enter characters, and lists the specifications of the machine.

## **Conventions Used in This Guide**

Adobe Reader XI is used as an example in the explanations below.

The items that appear in Adobe Reader vary depending on how it is used. If the Table of Contents or tools do not appear, refer to Adobe Reader Help.

Certain items are indicated in this guide by the conventions described below.

Convention	Description
[Bold]	Indicates keys and buttons.
"Regular"	Indicates a message or setting.

## Conventions used in procedures for operating the machine

In this Operation Guide, continuous operation is as follows:

Actual procedure	Procedure indicated in this guide
Select the [Menu] key.	[Menu] key > [▲] [▼] key > [Device Common] > [OK] key
▼	
Select the [▲] or [▼] key to select [Device Common].	
▼	
Select the [OK] key.	

# **Menu Map**

This is a list of menus displayed on the message display. Depending on the settings, some menus may not be displayed. Some menu names may differ from their reference titles.

Energy Star (ENERGY STAR®) Program .......1-11

## **Notice**

## **Safety Conventions in This Guide**

The sections of this guide and parts of the machine marked with symbols are safety warnings meant to protect the user, other individuals and surrounding objects, and ensure correct and safe usage of the machine. The symbols and their meanings are indicated below.

WARNING: Indicates that serious injury or even death may result from insufficient attention to or incorrect compliance with the related points.

CAUTION: Indicates that personal injury or mechanical damage may result from insufficient attention to or incorrect compliance with the related points.

### **Symbols**

The  $\triangle$  symbol indicates that the related section includes safety warnings. Specific points of attention are indicated inside the symbol.

... [General warning]

... [Warning of high temperature]

The  $\bigcirc$  symbol indicates that the related section includes information on prohibited actions. Specifics of the prohibited action are indicated inside the symbol.

... [Warning of prohibited action]

... [Disassembly prohibited]

The ● symbol indicates that the related section includes information on actions which must be performed. Specifics of the required action are indicated inside the symbol.

... [Alert of required action]

... [Remove the power plug from the outlet]

... [Always connect the machine to an outlet with a ground connection]

Please contact your service representative to order a replacement if the safety warnings in this Operation Guide are illegible or if the guide itself is missing (fee required).

## **Environment**

The service environmental conditions are as follows:

Temperature	50 to 90.5 °F (10 to 32.5 °C) (But humidity should be 70% or less when temperature is 90.5 °F (32.5 °C).)
Humidity	10 to 80% (But temperature should be 86 °F (30 °C) or less when humidity is 80%.)

Avoid the following locations when selecting a site for the machine.

- Avoid locations near a window or with exposure to direct sunlight.
- Avoid locations with vibrations.
- Avoid locations with drastic temperature fluctuations.
- Avoid locations with direct exposure to hot or cold air.
- Avoid poorly ventilated locations.

If the floor is delicate against casters, when this machine is moved after installation, the floor material may be damaged.

During printing, some ozone is released, but the amount does not cause any ill effect to one's health. If, however, the machine is used over a long period of time in a poorly ventilated room or when making an extremely large number of prints, the smell may become unpleasant. To maintain the appropriate environment for print work, it is suggested that the room be properly ventilated.

## **Precautions for Use**

## Cautions when handling consumables

Do not attempt to incinerate parts which contain toner. Dangerous sparks may cause burns.

Keep parts which contain toner out of the reach of children.

If toner happens to spill from parts which contain toner, avoid inhalation and ingestion, as well as contact with your eyes and skin.

- If you do happen to inhale toner, move to a place with fresh air and gargle thoroughly with a large amount of water. If coughing develops, contact a physician.
- If you do happen to ingest toner, rinse your mouth with water and drink 1 or 2 cups of water to dilute the contents of your stomach. If necessary, contact a physician.
- If you do happen to get toner in your eyes, flush them thoroughly with water. If there is any remaining tenderness, contact a physician.
- If toner does happen to get on your skin, wash with soap and water.

Do not attempt to force open or destroy parts which contain toner.

### Other precautions

Return the exhausted toner container and waste toner box to your dealer or service representative. The collected toner container and waste toner box will be recycled or disposed in accordance with the relevant regulations.

Store the machine while avoiding exposure to direct sunlight.

Store the machine in a place where the temperature stays below 40 °C while avoiding sharp changes of temperature and humidity.

If the machine will not be used for an extended period of time, remove the paper from the cassette and the Multi Purpose (MP) Tray, return it to its original package and reseal it.

## **Laser Safety (Europe)**

Laser radiation could be hazardous to the human body. For this reason, laser radiation emitted inside this machine is hermetically sealed within the protective housing and external cover. In the normal operation of the product by user, no radiation can leak from the machine.

This machine is classified as Class 1 laser product under IEC/EN 60825-1:2007.

**Caution**: Performance of procedures other than those specified in this manual may result in hazardous radiation exposure.

These labels are attached to the laser scanner unit inside the machine and are not in a user access area.

Regarding CLASS 1 laser products, information is provided on the rating label.

CLASS 1 LASER PRODUCT
KLASSE 1 LASER PRODUKT

## **EN ISO 7779**

Maschinenlärminformations-Verordnung 3. GPSGV, 06.01.2004: Der höchste Schalldruckpegel beträgt 70 dB (A) oder weniger gemäß EN ISO 7779.

## **EK1-ITB 2000**

Das Gerät ist nicht für die Benutzung im unmittelbaren Gesichtsfeld am Bildschirmarbeitsplatz vorgesehen. Um störende Reflexionen am Bildschirmarbeitsplatz zu vermeiden, darf dieses Produkt nicht im unmittelbaren Gesichtsfeld platziert werden.

- 2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
- 3. All advertising materials mentioning features or use of this software must display the following acknowledgement: "This product includes cryptographic software written by Eric Young (eay@cryptsoft.com)"

  The word 'cryptographic' can be left out if the routines from the library being used are not cryptographic related :-).
- 4. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgement: "This product includes software written by Tim Hudson (tjh@cryptsoft.com)"

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The licence and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution licence [including the GNU Public Licence.]

### **Monotype Imaging License Agreement**

- 1 *Software* shall mean the digitally encoded, machine readable, scalable outline data as encoded in a special format as well as the UFST Software.
- You agree to accept a non-exclusive license to use the Software to reproduce and display weights, styles and versions of letters, numerals, characters and symbols (*Typefaces*) solely for your own customary business or personal purposes at the address stated on the registration card you return to Monotype Imaging. Under the terms of this License Agreement, you have the right to use the Fonts on up to three printers. If you need to have access to the fonts on more than three printers, you need to acquire a multiuser license agreement which can be obtained from Monotype Imaging. Monotype Imaging retains all rights, title and interest to the Software and Typefaces and no rights are granted to you other than a License to use the Software on the terms expressly set forth in this Agreement.
- 3 To protect proprietary rights of Monotype Imaging, you agree to maintain the Software and other proprietary information concerning the Typefaces in strict confidence and to establish reasonable procedures regulating access to and use of the Software and Typefaces.
- 4 You agree not to duplicate or copy the Software or Typefaces, except that you may make one backup copy. You agree that any such copy shall contain the same proprietary notices as those appearing on the original.
- This License shall continue until the last use of the Software and Typefaces, unless sooner terminated. This License may be terminated by Monotype Imaging if you fail to comply with the terms of this License and such failure is not remedied within thirty (30) days after notice from Monotype Imaging. When this License expires or is terminated, you shall either return to Monotype Imaging or destroy all copies of the Software and Typefaces and documentation as requested.
- 6 You agree that you will not modify, alter, disassemble, decrypt, reverse engineer or decompile the Software.
- 7 Monotype Imaging warrants that for ninety (90) days after delivery, the Software will perform in accordance with Monotype Imaging-published specifications, and the diskette will be free from defects in material and workmanship. Monotype Imaging does not warrant that the Software is free from all bugs, errors and omissions.
  - The parties agree that all other warranties, expressed or implied, including warranties of fitness for a particular purpose and merchantability, are excluded.
- 8 Your exclusive remedy and the sole liability of Monotype Imaging in connection with the Software and Typefaces is repair or replacement of defective parts, upon their return to Monotype Imaging.
  - In no event will Monotype Imaging be liable for lost profits, lost data, or any other incidental or consequential damages, or any damages caused by abuse or misapplication of the Software and Typefaces.
- 9 Massachusetts U.S.A. law governs this Agreement.

- 10 You shall not sublicense, sell, lease, or otherwise transfer the Software and/or Typefaces without the prior written consent of Monotype Imaging.
- 11 Use, duplication or disclosure by the Government is subject to restrictions as set forth in the Rights in Technical Data and Computer Software clause at FAR 252-227-7013, subdivision (b)(3)(ii) or subparagraph (c)(1)(ii), as appropriate. Further use, duplication or disclosure is subject to restrictions applicable to restricted rights software as set forth in FAR 52.227-19 (c)(2).
- 12 You acknowledge that you have read this Agreement, understand it, and agree to be bound by its terms and conditions. Neither party shall be bound by any statement or representation not contained in this Agreement. No change in this Agreement is effective unless written and signed by properly authorized representatives of each party. By opening this diskette package, you agree to accept the terms and conditions of this Agreement.

## **Energy Saving Control Function**

The device comes equipped with a **Sleep** where printer functions remain in a waiting state but power consumption is reduced to a minimum after a certain amount of time elapses since the device was last used.

### Sleep

The device automatically enters Sleep when 1 minute has passed since the device was last used. The amount of time of no activity that must pass before Sleep is activated may be lengthened.

→ Sleep and Auto Sleep (page 2-18)

## **Automatic 2-Sided Print Function**

This device includes 2-sided printing as a standard function. For example, by printing two 1-sided originals onto a single sheet of paper as a 2-sided print, it is possible to lower the amount of paper used.

→ Duplex (page 6-4)

Printing in duplex mode reduces paper consumption and contributes to the conservation of forest resources. Duplex mode also reduces the amount of paper that must be purchased, and thereby reduces cost. It is recommended that machines capable of duplex printing be set to use duplex mode by default.

## **Resource Saving - Paper**

For the preservation and sustainable use of forest resources, it is recommended that recycled as well as virgin paper certified under environmental stewardship initiatives or carrying recognised ecolabels, which meet EN 12281:2002\* or an equivalent quality standard, be used.

This machine also supports printing on 64 g/m<sup>2</sup> paper. Using such paper containing less raw materials can lead to further saving of forest resources.

\*: EN12281:2002 "Printing and business paper - Requirements for copy paper for dry toner imaging processes"

Your sales or service representative can provide information about recommended paper types.

## **Environmental benefits of "Power Management"**

To reduce power consumption when idle, this machine is equipped with a power management function that automatically activates energy-saving mode when the machine is idle for a certain period of time. Although it takes the machine a slight amount of time to return to READY mode when in energy-saving mode, a significant reduction in energy consumption is possible. It is recommended that the machine be used with the activation time for energy-saving mode set to the default setting.

## **Energy Star (ENERGY STAR®) Program**

We have determined as a participating company in the International Energy Star Program that this product is compliant with the standards laid out in the International Energy Star Program.

ENERGY STAR<sup>®</sup> is a voluntary energy efficiency program with the goal of developing and promoting the use of products with high energy efficiency in order to help prevent global warming. By purchasing ENERGY STAR<sup>®</sup> qualified products, customers can help reduce emissions of greenhouse gases during product use and cut energy-related costs.

# 2 Installing and Setting up the Machine

This chapter provides information for the administrator of this machine, such as part names, cable connection, and software installation.

Part Names	
Machine Exterior	2-2
Connectors/Interior	2-3
With Optional Equipments Attached	2-5
Connecting Cables	
Connecting LAN Cable	2-6
Connecting USB Cable	
Connecting the Power Cable	
Power On/Off	2-8
Power On	2-8
Power Off	2-8
Using the Operation Panel	2-9
Operation Panel Keys	
Operation Method	2-10
Help Screen	2-11

# **Part Names**

## **Machine Exterior**

- 1 Top Tray
- 2 Paper Stopper
- 3 Cassette 1
- 4 Power Switch
- 5 Handles

- 6 USB Memory Slot
- 7 Operation Panel
- 8 Handles
- 9 Rear Cover 1

## **Connectors/Interior**

- 1 Network Interface Connector
- 2 USB Port
- 3 USB Interface Connector
- 4 Option Interface
- 5 Feed Cover
- 6 Size Dial

- 7 Paper Length Guide
- 8 Paper Width Guides
- 9 Multi Purpose Tray
- 10 Paper Width Guides
- 11 Fuser Cover

- 12 Toner Container (Black)
- 13 Toner Container (Magenta)
- 14 Toner Container (Cyan)
- 15 Toner Container (Yellow)

- 16 Toner Container Lock Lever
- 17 Waste Toner Cover
- 18 Waste Toner Box

## **With Optional Equipments Attached**

- 1 Cassette 2
- 2 Cassette 3
- 3 Cassette 4

- 4 Rear Cover 2
- 5 Rear Cover 3
- 6 Rear Cover 4
- → Optional Equipment (page 11-2)

# **Connecting Cables**

## **Connecting LAN Cable**

**⊘** IMPORTANT

If the power is on, turn the power switch off.

→ Power Off (page 2-8)

## Connect the cable to the machine.

1 Connect the LAN cable to the network interface connector.

2 Connect the other end of the cable to the hub.

## **2** Power on the machine and configure the network.

Network Setup (LAN Cable Connection) (page 2-15)

## **Connecting USB Cable**

**⊘** IMPORTANT

If the power is on, turn the power switch off.

→ Power Off (page 2-8)

## Connect the cable to the machine.

1 Connect the USB cable to the USB interface connector located on the left side of the body.

2 Connect the other end of the cable to the PC.

## Power on the machine.

## **Connecting the Power Cable**

## Connect the cable to the machine.

Connect one end of the supplied power cable to the machine and the other end to a power outlet.

**⊘** IMPORTANT

Only use the power cable that comes with the machine.

# **Power On/Off**

# **Power On**

Turn the power switch on.

# **⊘** IMPORTANT

When turning off the power switch, do not turn on the power switch again immediately. Wait more than 5 seconds, and then turn on the power switch.

# **Power Off**

# **IMPORTANT**

When the [Data] indicator is lit up or blinked, the machine is operating. Turning off the power switch while the machine is operating may cause it to malfunction.

# 1 Turn the power switch off.

In case of not using the machine for an extended period of time...

If this machine will be left unused for an extended period (e.g. overnight), turn it off at the main power switch. If the machine will not be used for an even longer period of time (e.g. vacation), remove the power plug from the outlet as a safety precaution.

# **⊘ IMPORTANT**

Remove paper from the cassettes and seal it in the paper storage bag to protect it from humidity.

# **Using the Operation Panel Operation Panel Keys**

# **Operation Method**

This section explains how to operate the setting menus on the message display.

# **Displaying the Menus and Configuring Settings**

Select the [Menu] key to display the setting menus. Select the  $[\blacktriangle]$  key,  $[\blacktriangledown]$  key,  $[\blacktriangledown]$  key,  $[\blacktriangleright]$  key, or [Back] key to select a menu, and perform settings.

# **Help Screen**

If you have difficulty operating the machine, you can check how to operate it using the operation panel.

When [**Help**] is displayed on the message display, select [**Help**] to display the Help screen. The Help screen shows machine operation.

Select the  $[\P]$  key to display the next step or select the  $[\blacktriangle]$  key to display the previous step. Select the [OK] key to exit the Help screen.

# Login/Logout

If you are setting a function that requires administrator rights, or if user login administration is enabled, you must enter your login user name and login password.

### NOTE

The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

4000 **Login User Name:** 3500 Login Password: 3500 4000

You will be unable to login if you forget your login user name or login password. In this event, login with administrator privileges and change your login user name or login password.

# Login

# Enter the login user name.

1 If the login screen is displayed during operations, select "Login User Name" and select the [OK] key.

- If [Netwk Authentic.] is selected as the user authentication method, [Menu] is displayed. Select [Menu] and select [Login Type] and then it is possible to select the authentication destination as [Local Authentic.] or [Netwk Authentic.].
- · Select [Menu] and select [Domain] and then it is possible to select from the domains registered.
- 2 Enter the login user name using the numeric keys and select the [OK] key.
  - ◆ Character Entry Method (page 11-10)

# Enter the login password.

- 1 Select "Login Password" and select the [OK] key.
- 2 Enter the login password and select the [OK] key.

# Select [Login].

# Logout

To logout from the machine, select the [**Logout**] key to return to the login user name/login password entry screen.

Users are automatically logged out in the following circumstances:

- · When the machine enters the sleep state.
- When the auto panel reset function is activated.

# **Default Settings of the Machine**

Before using this machine, configure such settings as date and time, network configuration, and energy saving functions as needed.

### NOTE

The default settings of the machine can be changed in System Menu. For settings that are configurable from System Menu, refer to the following:

➤ Setup and Registration (System Menu) (page 8-1)

# **Setting Date and Time**

Follow the steps below to set the local date and time at the place of installation.

When you send an E-mail using the transmission function, the date and time as set here will be printed in the header of the E-mail message. Set the date, time and time difference from GMT of the region where the machine is used.

### **NOTE**

- If user login administration is enabled, you can only change the settings by logging in with administrator privileges. If user login administration is disabled, the user authentication screen appears. Enter a login user name and password, and select [Login].
- The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

**Login User Name:** 3500 4000 4000 Login Password: 3500

- Be sure to set the time difference before setting the date and time.
- The correct time can be periodically set by obtaining the time from the network time server.
- **Embedded Web Server RX User Guide**

### Display the screen.

[Menu] key > [▲] [▼] key > [Device Common] > [OK] key > [▲] [▼] key > [Date Setting] > [OK] key

# Configure the settings.

[▲] [▼] key > [Time Zone] > [OK] key > Select the time zone > [OK] key > [▲] [▼] key > [Date] > [OK] key > Set the date > [OK] key > [▲] [▼] key > [Time] > [OK] key > Set the time > [OK] key > [▲] [▼] key > [Date Format] > [OK] key > Select the Date Format > [OK] key

Item	Description
Time Zone	Set the time difference from GMT. Choose the nearest listed location from the list. If you select a region that utilizes summer time, configure settings for summer time.
Date	Set the date for the location where you use the machine.  Value: Year (2000 to 2037), Month (1 to 12), Day (1 to 31)
Time	Set the time for the location where you use the machine.  Value: Hour (00 to 23), Minute (00 to 59), Second (00 to 59)
Date Format	Select the display format of year, month, and date. The year is displayed in Western notation.  Value: Month/Day/Year, Day/Month/Year, Year/Month/Day

### NOTE

Select the [▲] or [▼] key to enter a number.

Select the [◀] or [▶] key to move the position being entered, which is shown highlighted.

# **Network Setup (LAN Cable Connection)**

The machine is equipped with network interface, which is compatible with network protocols such as TCP/IP (IPv4), TCP/IP (IPv6), NetBEUI, and IPSec. It enables network printing on the Windows, Macintosh, UNIX and other platforms.

Set up TCP/IP (IPv4) to connect to the Windows network.

### NOTE

If user login administration is enabled, you can only change the settings by logging in with administrator privileges. If user login administration is disabled, the user authentication screen appears. Enter a login user name and password, and select [Login].

The factory default login user name and login password are set as shown below.

	P-C3560DN	P-C4070DN
Login User Name:	3500	4000
Login Password:	3500	4000

### TCP/IP Settings

### IPv4 setting

Set up TCP/IP (IPv4) to connect to the Windows network.

### NOTE

Ask your network administrator for the IP address in advance, and have it ready when you configure this setting. In the following cases, set the IP address of DNS server on the Embedded Web Server RX.

Setting the IP Address of the DNS Server, refer to the following:

### Embedded Web Server RX User Guide

- When using the host name with "DHCP" setting set to "Off"
- When using the DNS server with IP address that is not assigned by DHCP automatically.

# Display the screen.

[Menu] key > [▲] [▼] key > [Network] > [OK] key > [▲] [▼] key > [TCP/IP Settings] > [OK] key > [▲] [▼] key > [IPv4 Setting] > [OK] key

# Configure the settings.

When setting the static IP address

- 1 [▲] [▼] key > [DHCP] > [OK] key > [▲] [▼] key > [Off] > [OK] key
- 2 [▲] [▼] key > [IP Address] > [OK] key
- 3 Set the IP address.

### ■ NOTE

You can set any value between 000 and 255. Use the numeric keys or select the [▲] or [▼] key to enter a number. Select the [◄] or [▶] key to move the position being entered, which is shown highlighted.

- 4 Select the [OK] key.
- 5 [▲] [▼] key > [Subnet Mask] > [OK] key

6 Set the subnet mask.

NOTE

You can set any value between 000 and 255.
Use the numeric keys or select the [▲] or [▼] key to enter a number.
Select the [◄] or [▶] key to move the position being entered, which is shown highlighted.

- 7 Select the [OK] key.
- 8 [▲] [▼] key > [Default Gateway] > [OK] key
- 9 Set the default gateway.

NOTE

You can set any value between 000 and 255.
Use the numeric keys or select the [▲] or [▼] key to enter a number.
Select the [◄] or [▶] key to move the position being entered, which is shown highlighted.

10 Select the [OK] key.

*⊘* IMPORTANT

After changing the setting, restart the network from System Menu, or turn the machine OFF and then ON.

Restart Network (page 8-19)

NOTE

The network can be configured from the computer by using Embedded Web Server RX.

Embedded Web Server RX User Guide

### **Wireless Network Settings**

When the optional Wireless Network Interface Kit is installed on the machine and the connection settings are configured, it is possible to print in a wireless network (wireless LAN) environment. The following is an introduction to the settings for connecting using the Quick Setup.

The following four settings can be configured in Quick Setup.

→ Wireless Network (page 8-20)

### **Available Network**

Displays access points to which the machine can connect.

### **Push Button**

If the access point supports the push button method, wireless settings can be configured using the push button. This setting executes push button, and the connection is started by pressing the push button on the access point.

The push button method supports only the WPS.

### PIN (Device)

Starts connection using the machine's PIN code. Enter the PIN code into the access point. The PIN code of the machine is automatically generated.

### **PIN (Terminal)**

Starts connection using the PIN code of the access point. Enter the PIN code of the access point.

# **Energy Saver function**

If a certain period of time elapses after the machine is last used, the machine automatically enters sleep mode, which minimizes power consumption. If the machine is not used while in sleep mode, the power automatically turns off.

# **Sleep and Auto Sleep**

### **NOTE**

If user login administration is enabled, you can only change the settings by logging in with administrator privileges. If user login administration is disabled, the user authentication screen appears. Enter a login user name and password, and select [Login].

The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

3500 4000 Login User Name: 3500 4000 Login Password:

### Auto Sleep

Auto Sleep automatically switches the machine into Sleep if left idle for a preset time.

The default preset time is 1 minute.

If print data is received during Sleep, the machine automatically wakes up and starts printing.

To resume, perform the following actions.

Select the [OK] key.

The machine will be ready to operate within 19 seconds for P-C3560DN and 21 seconds for P-C4070DN.

Note that ambient environmental conditions, such as ventilation, may cause the machine to respond more slowly.

Follow the steps below to set the sleep timer for the machine to go into sleep mode when not in use.

# Display the screen.

[Menu] key > [▲] [▼] key > [Device Common] > [OK] key > [▲] [▼] key > [Timer Setting] > [OK] key > [A] [V] key > [Sleep Timer] > [OK] key

# Set the Sleep time.

1 Enter the Sleep time.

### **NOTE**

Use the numeric keys or select the [▲] or [▼] key to enter a number.

2 Select the [OK] key.

### Status (Sleep Level Set.)

You can set whether sleep mode operates for each function. When the machine enters sleep mode, the ID card cannot be recognized.

For more information on Status, refer to the following:

Status (page 8-16)

### Sleep Level (Energy Saver and Quick Recovery) (models except for Europe)

For sleep level, you can toggle between the following two modes: Energy Saver mode and Quick Recovery mode. The default setting is Energy Saver mode.

Energy Saver mode reduces power consumption even more than Quick Recovery mode, and allows Sleep Mode to be set separately for each function. The ID card cannot be recognized.

### NOTE

If the optional Network Interface Kit is installed, this function will not be displayed.

To resume, select the [OK] key on the operation panel. If print data is received during Sleep, the machine automatically wakes up and starts printing.

Follow the steps below to select the sleep level and use Energy Saver mode for each function.

# Display the screen.

[Menu] key > [▲] [▼] key > [Device Common] > [OK] key > [▲] [▼] key > [Timer Setting] > [OK] key > [▲] [▼] key > [Sleep Level Set.] > [OK] key > [▲] [▼] key > [Sleep Level] > [OK] key

# Select the Sleep level.

[▲] [▼] key > [Quick Recovery] or [Energy Saver] > [OK] key

When [Energy Saver] is set, next go on to set whether or not to use Energy Saver mode for each function.

# Set the Sleep rule.

- 1 [▲] [▼] key > [Status] > [OK] key
- Select the function to be set, and select the [OK] key.

[Card Reader] is displayed when the optional Card Authentication Kit is activated.

3 [▲] [▼] key > [Off] or [On] > [OK] key

Repeat steps 3-2 to 3-3 to set for a different function.

# **Installing Software**

Install appropriate software on your PC from the included DVD (Product Library) if you want to use the printer function of this machine.

# **Software on DVD (Windows)**

You can use either [Express Install] or [Custom Install] can be selected for the installation method. [Express Install] is the standard installation method. To install components that cannot be installed by [Express Install], use [Custom Install].

For details on Custom Installation, refer to the following:

### Custom Install (page 2-24)

Software	Description	Express Install
Printing System Driver	This driver enables files on a computer to be printed by the machine.  Multiple page description languages (PCL XL, KPDL, etc.) are supported by a single driver. This printer driver allows you to take full advantage of the features of the machine.  Use this driver to create PDF files.	0
Printing System (XPS) Driver	This printer driver supports the XPS (XML Paper Specification) format developed by Microsoft Corporation.	-
KPDL mini-driver/PCL mini- driver	This is a Microsoft MiniDriver that supports PCL and KPDL. There are some restrictions on the machine features and option features that can be used with this driver.	-
NETWORK PRINT MONITOR	This is a utility that enables monitoring of the machine on the network.	-
Status Monitor	This is a utility that monitors the printer status and provides an ongoing reporting function.	0
Network Tool for Direct Printing	This makes it possible to print a PDF file without starting Adobe Acrobat/ Reader.	-
FONTS	These are display fonts that enable the machine's built-in fonts to be used in a software application.	0

# NOTE

- Installation on Windows must be done by a user logged on with administrator privileges.
- Printing System (XPS) Driver cannot be installed on Windows XP.

# **Installing Software in Windows**

### **Express Install**

The following procedure is an example for installing the software in Windows 7 using [Express Install].

For details on Custom Installation, refer to the following:

Custom Install (page 2-24)

### Insert the DVD.

# NOTE

- Installation on Windows must be done by a user logged on with administrator privileges.
- If the "Welcome to the Found New Hardware Wizard" dialog box displays, select [Cancel].
- If the autorun screen is displayed, click [Run setup.exe].
- If the user account management window appears, click [Yes] ([Allow]).

# Display the screen.

- Click [View License Agreement] and read the License Agreement.
- 2 Click [Accept].

# Install using [Express Install].

You can also select [**Use host name for port name**] and set to use the host name of the standard TCP/IP port. (A USB connection cannot be used.)

# NOTE

 To install Status Monitor, it is necessary to install Microsoft .NET Framework 4.0 beforehand.

- The machine cannot be detected unless it is on. If the computer fails to detect the machine, verify that it is connected to the computer via a network or USB cable and that it is turned on and click **C** (Reload).
- If the Windows security window appears, click [Install this driver software anyway].

### Finish the installation.

When "Your software is ready to use" appears, you can use the software. To print a test page, click the "Print a test page" checkbox and select the machine.

Click [Finish] to exit the wizard.

When you have selected [Device settings] in Windows XP, the dialog box for device setting will appear after [Finish] is clicked. Configure the settings for options installed on the machine. Device settings can be configured after the installation is completed.

### Printing System Driver User Guide

If a system restart message appears, restart the computer by following the screen prompts. This completes the printer driver installation procedure.

### **Custom Install**

The following procedure is an example for installing the software in Windows 7 using [Custom Install].

### Insert the DVD.

# **NOTE**

- Installation on Windows must be done by a user logged on with administrator privileges.
- If the "Welcome to the Found New Hardware Wizard" dialog box displays, select [Cancel].
- If the autorun screen is displayed, click [Run setup.exe].
- If the user account management window appears, click [Yes] ([Allow]).

# Display the screen.

- 1 Click [View License Agreement] and read the License Agreement.
- 2 Click [Accept].

# Install using [Custom Install].

Select the device to be installed.

The following buttons can be used.

This changes the display to icon and text display.

Use this to select multiple items.

If the desired device does not appear, select this button to directly select the device.

2 Select the driver to be installed.

**3** Select the utility to be installed.

4 Click [Install].

 To install Status Monitor, it is necessary to install Microsoft .NET Framework 4.0 beforehand.

### Finish the installation.

When "Your software is ready to use" appears, you can use the software. To print a test page, click the "Print a test page" checkbox and select the machine.

Click [Finish] to exit the wizard.

When you have selected [Device settings] in Windows XP, the dialog box for device setting will appear after [Finish] is clicked. Configure the settings for options installed on the machine. Device settings can be configured after the installation is completed.

### Printing System Driver User Guide

If a system restart message appears, restart the computer by following the screen prompts. This completes the printer driver installation procedure.

# **Uninstalling the Software**

Perform the following procedure to delete the Software from your computer.

### NOTE

Uninstallation on Windows must be done by a user logged on with administrator privileges.

### Display the screen.

Click [Start] button on the Windows and then select [All Programs], [(name of offer company)], and [Uninstall Product Library] to display the Uninstall Wizard.

### NOTE

In Windows 8, click [Search] in charms, and enter "Uninstall Product Library" in the search box. Select [Uninstall Product Library] in the search list.

# Uninstall the software.

Place a check in the check box of the software to be deleted.

# Finish uninstalling.

If a system restart message appears, restart the computer by following the screen prompts. This completes the software uninstallation procedure.

- · The software can also be uninstalled using the Product Library.
- In the Product Library screen, click [Uninstall], and follow the on-screen instructions to uninstall the software.

# **Installing Software in Mac Computer**

The machine's printer functionality can be used by a Mac computer.

# NOTE

- Installation on MAC OS must be done by a user logged on with administrator privileges.
- When printing from a Macintosh computer, set the machine's emulation to [KPDL] or [KPDL(Auto)].
- → Print Settings (page 8-10)
- If connecting by Bonjour, enable Bonjour in the machine's network settings.
- Bonjour (page 8-18)
- In the Authenticate screen, enter the name and password used to log in to the operating system.

### Insert the DVD.

Double-click the [GEN\_LIB] icon.

# Display the screen.

Double-click [(Brand Name) OS X x.x] depending on your Mac OS version.

# 3 Install the Printer Driver.

Install the printer driver as directed by the instructions in the installation software.

This completes the printer driver installation.

If a USB connection is used, the machine is automatically recognized and connected. If an IP connection is used, the settings below are required.

# Configure the printer.

1 Open System Preferences and add the printer.

2 Select [Default] and click the item that appears in "Name".

3 Select the driver in "Use".

# **NOTE**

When using an IP connection, click the IP icon for an IP connection and then enter the host name or IP address. The number entered in "Address" will automatically appear in "Name". Change if needed.

**3** Select the options available for the machine.

4 The selected machine is added.

# **Checking the Counter**

Check the number of sheets printed.

Display the screen.

[Menu] key > [▲] [▼] key > [Counter] > [OK] key

Check the counter.

Select the item you want to check, and select the  $[\mathbf{OK}]$  key.

# **Additional Preparations for the Administrator**

In addition to the information provided in this chapter, the administrator of this machine should check the following, and configure the settings as needed.

# **Strengthening the Security**

This machine is shipped with two default users registered one with Machine Administrator rights, and another with Administrator rights. Logging in as this user will allow you to configure all settings; therefore, please change the login user name and password.

In addition, this machine is equipped with user authentication function, which can be configured to limit the access to this machine to only those who have a registered login name and password.

User Authentication and Accounting (User Login, Job Accounting) (page 9-1)

# **Embedded Web Server RX**

If the machine is connected to the network, you can configure various settings using Embedded Web Server RX.

This section explains how to access Embedded Web Server RX, and how to change security settings and the host name.

### Embedded Web Server RX User Guide

**NOTE** 

To fully access the features of the Embedded Web Server RX pages, enter the User Name and Password and click [Login]. Entering the predefined administrator password allows the user to access all pages, including Document Box. The factory default setting for the default user with administrator privileges is shown below. (Upper case and lower case letters are distinguished (case sensitive).)

**Login User Name: Admin Login Password: Admin** 

Settings that the administrator and general users can configure in Embedded Web Server RX are as follows.

Setting	Description	Administ- rator	General User
Device Information	The machine's structure can be checked.	0	0
Job Status	Displays all device information, including print jobs, and job log history.	0	0
Document Box	Add or delete document boxes, or delete documents within a document box.	0	○*1
Device Settings	Configure the advanced settings of the machine.		-
Function Settings	Configure the advanced function settings.		-
Network Settings	Configure the network advanced settings.		-
Security Settings	Configure the security advanced settings.	0	-
Management Settings	Configure the advanced management settings.	0	-

The logged in user may not be able to configure some settings, depending on the permissions of the user.

# **Accessing Embedded Web Server RX**

### Display the screen.

- 1 Launch your Web browser.
- In the address or location bar, enter the machine's IP address or the host name.

Print the status page to check the machine's IP address and the host name.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report Print] > [OK] key > [▲] [▼] key > [Status Page] > [OK] key > [Yes]

https://192.168.48.21/ (for IP address) Examples:

https://MFP001 (if the host name is "MFP001")

The web page displays basic information about the machine and Embedded Web Server RX as well as their current status.

### **NOTE**

If the screen "There is a problem with this website's security certificate." is displayed, configure the certificate.

### Embedded Web Server RX User Guide

You can also continue the operation without configuring the certificate.

# Configure the function.

Select a category from the navigation bar on the left of the screen.

### NOTE

To fully access the features of the Embedded Web Server RX pages, enter the User Name and Password and click [Login]. Entering the predefined administrator password allows the user to access all pages, including Document Box. The factory default setting for the default user with administrator privileges is shown below. (Upper case and lower case letters are distinguished (case sensitive).)

Login User Name: **Admin** Login Password: **Admin** 

# **Changing Security Settings**

This section explains how to change the security settings.

### Display the screen.

- 1 Launch your Web browser.
- 2 In the address or location bar, enter the machine's IP address or the host name.

Print the status page to check the machine's IP address and the host name.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report Print] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Status Page] > [OK] key > [Yes]

3 Log in with administrator privileges.

The factory default setting for the default user with administrator privileges is shown below. (Upper case and lower case letters are distinguished (case sensitive).)

Login User Name: Admin Login Password: Admin

4 Click [Security Settings].

# Configure the Security Settings.

From the [Security Settings] menu, select the setting you want to configure.

# NOTE

For details on settings related to certificates, refer to the following:

Embedded Web Server RX User Guide

# **Changing Device Information**

Change the device information of the machine.

### Display the screen.

- 1 Launch your Web browser.
- 2 In the address or location bar, enter the machine's IP address or the host name.

Print the status page to check the machine's IP address and the host name.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report Print] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Status Page] > [OK] key > [Yes]

3 Log in with administrator privileges.

The factory default setting for the default user with administrator privileges is shown below. (Upper case and lower case letters are distinguished (case sensitive).)

Login User Name: Admin Login Password: Admin

4 From the [Device Settings] menu, click [System].

# 2 Specify the host name.

Enter the device information, and then click [Submit].

After changing the setting, restart the network or turn the machine OFF and then ON.

To restart the network interface card, click [Reset] in the [Management Settings] menu, and then click [Restart Network] in "Restart".

# **E-mail Settings**

By configuring the SMTP settings, it is possible to send E-mail notices when jobs have been completed.

To use this function, this machine must be connected to a mail server using the SMTP protocol.

In addition, configure the following.

 SMTP settings Item: "SMTP Protocol" and "SMTP Server Name" in "SMTP"

- The sender address when the machine sends E-mails Item: "Sender Address" in "E-mail Send Settings"
- The setting to limit the size of E-mails
   Item: "E-mail Size Limit" in "E-mail Send Settings"

The procedure for specifying the SMTP settings is explained below.

### Display the screen.

Display the SMTP Protocol screen.

- 1 Launch your Web browser.
- 2 In the address or location bar, enter the machine's IP address or the host name.

Print the status page to check the machine's IP address and the host name.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report Print] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Status Page] > [OK] key > [Yes]

3 Log in with administrator privileges.

The factory default setting for the default user with administrator privileges is shown below. (Upper case and lower case letters are distinguished (case sensitive).)

Login User Name: Admin Login Password: Admin 4 From the [Network Settings] menu, click [Protocol].

# Configure the settings.

Set "SMTP (E-mail TX)" to [On] in the "Send Protocols".

# 3 Display the screen.

Display the E-mail Settings screen.

From the [Function Settings] menu, click [E-mail].

# Configure the settings.

Enter "SMTP" and "E-mail Send Settings" items.

	Setting	Description	
SMTP		Set to send e-mail from the machine.	
	SMTP Protocol	Displays the SMTP protocol settings. Check that "SMTP Protocol" is set to [ <b>On</b> ]. If [ <b>Off</b> ] is set, click [ <b>Protocol</b> ] and set the SMTP protocol to [ <b>On</b> ].	
	SMTP Server Name*1	Enter the host name or IP address of the SMTP server.	
	SMTP Port Number	Specify the port number to be used for SMTP. Use the SMTP default port 25.	
	SMTP Server Timeout	Set the amount of time to wait before time-out in seconds.	
	Authentication Protocol	To use SMTP authentication, enter the user information for authentication.	
	SMTP Security	Set SMTP security.  Turn on "SMTP Security" in "SMTP (E-mail TX)" on the  [Protocol Settings] page.	
	Connection Test	Tests to confirm that the settings are correct.	
	Domain Restriction	To restrict the domains, click the [ <b>Domain List</b> ] and enter the domain names of addresses to be allowed or rejected. Restriction can also be specified by e-mail address.	
POP3	POP3 Protocol	You don't need to set the following items when you only enable t	
	Check Interval	function of sending e-mail from the machine. Set the following items if you want to enable the function of receiving e-mail on the	
	Run once now	machine.	
	Domain Restriction	➤ Embedded Web Server RX User Guide	
	POP3 User Settings		
E-mail Send Settings	E-mail Size Limit	Enter the maximum size of E-mail that can be sent in kilobytes. When E-mail size is greater than this value, an error message appears and E-mail sending is cancelled. Use this setting if you have set E-mail Size Limit for SMTP server. If not, enter a value of 0 (zero) to enable E-mail sending regardless of the size limit.	
	Sender Address*1	Specify the sender address for when the machine sends E-mails, such as the machine administrator, so that a reply or non-delivery report will go to a person rather than to the machine. The sender address must be entered correctly for SMTP authentication. The maximum length of the sender address is 128 characters.	
	Signature	Enter the signature. The signature is free form text that will appear at the end of the E-mail body. It is often used for further identification of the machine. The maximum length of the signature is 512 characters.	
	Function Defaults	Change the function default settings in [Common/Job Default Settings] page.	

<sup>\*1</sup> Be sure to enter the items.

# 5 Click [Submit].

# **Creating a New Custom Box**

You can register a custom box from Embedded Web Server RX.

To use Custom Box, an optional SSD must be installed in the machine.

# Display the screen.

- 1 Launch your Web browser.
- 2 In the address or location bar, enter the machine's IP address or the host name. Print the status page to check the machine's IP address and the host name.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report Print] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Status Page] > [OK] key > [Yes]

3 From the [Document Box] menu, click [Custom Box].

4 Click [Add].

# Configure the Custom Box.

1 Enter the box details.

Enter the information for the custom box you want to register. For details on the fields to populate, refer to the following:

- **▶** Embedded Web Server RX User Guide
- 2 Click [Submit].

# **Printing a document stored in a Custom Box**

A document stored in a Custom Box can be printed from Embedded Web Server RX.

# Display the screen.

- 1 Launch your Web browser.
- 2 In the address or location bar, enter the machine's IP address or the host name.

  Print the status page to check the machine's IP address and the host name.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report Print] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Status Page] > [OK] key > [Yes]

3 From the [Document Box] menu, click [Custom Box].

4 Click the number or name of the Custom Box in which the document is stored.

#### Print the document.

- Select the document you wish to print.
   Select the checkbox of the document to be printed.
- 2 Click [Print].
- 3 Configure settings for printing, click [Print].

# 3 Preparation before Use

This chapter explains the following operations.

Loading Paper	3-2
Precaution for Loading Paper	3-3
Loading in the Cassettes	3-4
Loading Paper in the Multi Purpose Tray	3-7
Specifying Paper Size and Media Type	
Paper Stopper	3-13

## **Loading Paper**

Load paper in the cassettes and multipurpose tray.

For the paper load methods for each cassette, refer to the page below.

No.	Name	Page
1	Cassette 1	page 3-4
2	Cassette 2	page 3-4
3	Cassette 3	page 3-4
4	Cassette 4	page 3-4
5	Multi Purpose Tray	<u>page 3-7</u>

## NOTE

- The number of sheets that can be held varies depending on your environment and paper type.
- You should not use inkjet printer paper or any paper with a special surface coating. (Such paper may cause paper jams or other faults.)
- For higher quality color printing, use special color paper.

## **Precaution for Loading Paper**

When you open a new package of paper, fan the sheets to separate them slightly prior to loading in the following steps.

Fan the paper, then tap it on a level surface.

In addition, note the following points.

- If the paper is curled or folded, straighten it before loading. Paper that is curled or folded may cause a jam.
- · Avoid exposing opened paper to high temperatures and high humidity as dampness can be a cause of problems. Seal any remaining paper after loading in the multi purpose tray or cassettes back in the paper storage bag.
- If the machine will not be used for a prolonged period, protect all paper from humidity by removing it from the cassettes and sealing it in the paper storage bag.

#### *⋈ W W*

If you print onto used paper (paper already used for printing), do not use paper that is stapled or clipped together. This may damage the machine or cause poor image quality.

#### NOTE

If you use special paper such as letterhead, paper with holes or paper with pre-prints like logo or company name, refer to the following:

▶ Paper (page 11-14)

## **Loading in the Cassettes**

The cassettes can hold plain paper, recycled paper or color paper.

The number of sheets that can be loaded in each cassette is shown below.

Cassette	No. Sheets
Cassettes 1 to 4	500 sheets (Plain paper: 80 g/m²)

For details of the supported paper sizes, refer to the following:

Choosing the Appropriate Paper (page 11-15)

A6 paper cannot be loaded in cassettes 2 to 4.

For the paper type setting, refer to the following:

→ Media Type Setting (page 8-9)

#### **⋈** IMPORTANT

The cassettes 1 can hold paper with weight between  $60 - 163 \text{ g/m}^2$ . The cassettes 2 to 4 can hold paper with weight between  $60 - 220 \text{ g/m}^2$ .

#### Pull the cassette completely out of the machine.

## NOTE

When pulling the cassette out of the machine, ensure it is supported and does not fall out.

#### 2 Adjust the cassette size.

1 Adjust the position of the paper width guides located on the left and right sides of the cassette. Press the paper width adjusting tab and slide the guides to the paper size required. Paper sizes are marked on the cassette.

2 Adjust the paper length guide to the paper size required. Press the paper length adjusting tab and slide the guides to the paper size required.

**3** Turn the size dial so that the size of the paper you are going to use appears in the paper size window.

## NOTE

When the size dial is set to "Other" the paper size must be set into the machine on the operation panel.

→ Paper Size and Media Type for the Cassettes (page 3-10)

#### Coad paper.

- 1 Fan the paper, then tap it on a level surface to avoid paper jams or skewed printing.
- 2 Load the paper in the cassette.

#### **◯** IMPORTANT

- · Load the paper with the print side facing up.
- After removing new paper from its packaging, fan the paper before loading it in the multi-purpose tray.
- ▶ Precaution for Loading Paper (page 3-3)
- Before loading the paper, be sure that it is not curled or folded. Paper that is curled or folded may cause paper jams.
- Ensure that the loaded paper does not exceed the level indicator (see illustration above).
- If paper is loaded without adjusting the paper length guide and paper width guide, the paper may skew or become jammed.

#### Gently push the cassette back in.

#### **NOTE**

There is a paper gauge on the right side of the front of the cassette to indicate the remaining paper supply.

## Specify the type of paper loaded in the cassette using the operation panel.

▶ Paper Size and Media Type for the Cassettes (page 3-10)

## **Loading Paper in the Multi Purpose Tray**

The multi purpose tray will hold up to 100 sheets of plain paper (80 g/m<sup>2</sup>).

For details of the supported paper sizes, refer to the following:

Choosing the Appropriate Paper (page 11-15)

For the paper type setting, refer to the following:

→ Media Type Setting (page 8-9)

Be sure to use the multi purpose tray when you print on any special paper.

#### **◯** IMPORTANT

- If you are using a paper weight of 106 g/m<sup>2</sup> or more, set the media type to Thick and set the weight of the paper you are using.
- Remove each transparency from the top tray as it is printed. Leaving transparencies in the top tray may cause a paper jam.

The capacity of the multi purpose tray is as follows.

- Plain paper (80 g/m<sup>2</sup>), recycled paper or color paper: 100 sheets
- Thick paper (209 g/m<sup>2</sup>): 15 sheets
- Thick paper (157 g/m<sup>2</sup>): 30 sheets
- Thick paper (104.7 g/m<sup>2</sup>): 50 sheets
- Hagaki (Cardstock): 30 sheets
- Envelope DL, Envelope C5, Envelope #10, Envelope #9, Envelope #6 3/4, Envelope Monarch, Youkei 4, Youkei 2:
   5 sheets
- OHP film: 1 sheetCoated: 30 sheets

## NOTE

- When you load custom size paper, enter the paper size by referring to the following:
- ▶ Paper Size and Media Type for the Multi Purpose Tray (MP Tray Setting) (page 3-12)
- When you use special paper such as transparencies or thick paper, select the media type by referring to the following:
- ▶ Paper Size and Media Type for the Multi Purpose Tray (MP Tray Setting) (page 3-12)

## Open the multi purpose tray.

#### Adjust the multi purpose tray size.

Paper sizes are marked on the multi purpose tray.

#### Coad paper.

Insert the paper along the paper width guides into the tray until it stops.

After removing new paper from its packaging, fan the paper before loading it in the multi purpose tray.

→ Precaution for Loading Paper (page 3-3)

#### *⊘* IMPORTANT

- · When loading the paper, keep the print side facing up.
- Curled paper must be uncurled before use.
- When loading paper into the multi purpose tray, check that there is no paper left over in the tray from a previous job before loading the paper. If there is just a small amount of paper left over in the multi purpose tray and you want to add more, first remove the left-over paper from the tray and include it with the new paper before loading the paper back into the tray.
- If there is a gap between the paper and the paper width guides, readjust the guides to fit the paper in order to prevent skewed feeding and paper jams.
- Ensure that the loaded paper does not exceed the load limits.

#### Specify the type of paper loaded in the multi purpose tray using the operation panel.

▶ Paper Size and Media Type for the Multi Purpose Tray (MP Tray Setting) (page 3-12)

#### When you load envelopes or cardstock in the multi purpose tray

Load the paper with the print side facing up. For the procedure for printing, refer to the following:

#### Printing System Driver User Guide

Example: When printing the address.

#### **IMPORTANT**

- Use unfolded Oufuku hagaki (Return postcard).
- How to load envelopes (orientation and facing) will differ depending on the type of envelope. Be sure to load it in correctly, otherwise printing may be done in the wrong direction or on the wrong face.

#### NOTE

When you load envelopes in the multi purpose tray, select the envelope type by referring to the following:

▶ Paper Size and Media Type for the Multi Purpose Tray (MP Tray Setting) (page 3-12)

## **Specifying Paper Size and Media Type**

The default paper size setting for cassette 1, for the multi purpose tray and for the optional paper feeder (cassettes 2 to 4) is "A4" or "Letter", and the default media type setting is "Plain".

To change the type of paper to be used in cassettes, specify the paper size and media type setting.

#### Paper Size and Media Type for the Cassettes

Specify the paper size and media type of paper to be used in cassettes.

Select the media type.  Values  Cassette 1: Plain (60 - 105 g/m²), Preprinted, Bond, Recycled, Vellum (60 - 105 g/m²), Rough, Letterhead, Color, Prepunched, Thick (106 - 163 g/m²), High Quality, CUSTOM 1 - 8  Cassette 2 to 4: Plain (60 - 105 g/m²), Preprinted, Labels, Bond, Recycled, Vellum (60 - 105 g/m²), Rough, Letterhead, Color, Prepunched, Envelope, Coated,
Cassette 1: Plain (60 - 105 g/m <sup>2</sup> ), Preprinted, Bond, Recycled, Vellum (60 - 105 g/m <sup>2</sup> ), Rough, Letterhead, Color, Prepunched, Thick (106 - 163 g/m <sup>2</sup> ), High Quality, CUSTOM 1 - 8  Cassette 2 to 4: Plain (60 - 105 g/m <sup>2</sup> ), Preprinted, Labels, Bond, Recycled,
Rough, Letterhead, Color, Prepunched, Thick (106 - 163 g/m <sup>2</sup> ), High Quality, CUSTOM 1 - 8  Cassette 2 to 4: Plain (60 - 105 g/m <sup>2</sup> ), Preprinted, Labels, Bond, Recycled,
Cassette 2 to 4: Plain (60 - 105 g/m²), Preprinted, Labels, Bond, Recycled,
Thick (106 - 220 g/m <sup>2</sup> ), High Quality, CUSTOM 1 - 8
Available options are as follows:
Values
Cassette 1: Executive, Letter, Legal, A4, B5, A5, A6, B6, ISO B5, Custom, Oficio II, 216 × 340 mm, 16K, Statement, Folio
Cassette 2 to 4: Envelope Monarch, Envelope #10, Envelope DL, Envelope C5, Executive, Letter, Legal, A4, B5, A5, B6, Envelope #9, Envelope #6, ISO B5, Custom, Oficio II, 216 × 340 mm, 16K, Statement, Folio, Youkei 2, Youkei 4
Register the custom paper size to be used in Cassettes 1 to 4.
Values
Cassette 1:
Metric
X: 105 to 216 mm (in 1 mm increments) Y: 148 to 356 mm (in 1 mm increments)
Inch
X: 4.13 to 8.50" (in 0.01" increments) Y: 5.83 to 14.02" (in 0.01" increments)
Cassette 2 to 4:
Metric
X: 92 to 216 mm (in 1 mm increments) Y: 162 to 356 mm (in 1 mm increments)
Inch
X: 3.62 to 8.50" (in 0.01" increments) Y: 6.38 to 14.02" (in 0.01" increments)
X=Length, Y=Width
Vertical
x X →
Y

<sup>\*1</sup> To change to a media type other than "Plain".

When a paper weight that cannot be loaded in the cassette is set for a media type, that media type does not appear.

<sup>→</sup> Media Type Setting (page 8-9)

<sup>\*2</sup> Appears when [Custom] is selected in Other Paper Size.

#### Paper Size and Media Type for the Cassettes:

If the size dial is set to one of the sizes below, set the media type.

"A4", "A5", "B5", "Letter", "Legal" or "A6" (Cassette 1 only)

If the size dial is set to "Other", configure the settings for the paper size and the media type.

#### Display the screen.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Paper Settings] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Cassette 1 (to 4) Set.] > [OK] key

## NOTE

[Cassette 2] to [Cassette 4] are shown when the optional paper feeder is installed.

#### Specify the media type.

- 1 [▲] [▼] key > [Media Type] > [OK] key
- 2 Select the media type, and select the [OK] key.

#### Specify the paper size.

- **1** [**△**] [**V**] key > [**Other Paper Size**] > [**OK**] key
- Select the paper size, and select the [OK] key. If you selected [Custom], use the procedure below to specify the paper length and width.
- 3 [▲] [▼] key > [Custom PaperSize] in "Cassette 1 (to 4) Set." > [OK] key > [▲] [▼] key > [Measurement] > [OK] key
- 4 Select the paper size units, and select the [**OK**] key.
- 5 [▲] [▼] key > [Size Entry(Y)] > [OK] key
- **6** Enter the paper length, and select the **[OK]** key.

## **NOTE**

Use the numeric keys or select the [▲] or [▼] key to enter a number.

- 7 [▲] [▼] key > [Size Entry(X)] > [OK] key
- **8** Enter the paper width, and select the [**OK**] key.

## ■ NOTE

Use the numeric keys or select the [▲] or [▼] key to enter a number.

#### Paper Size and Media Type for the Multi Purpose Tray (MP Tray Setting)

Specify the paper size and media type of paper to be used in the multi purpose tray.

Item	Description
Paper Size	Available options are as follows:
	Values: Envelope Monarch, Envelope #10, Envelope DL, Envelope C5, Executive, Letter, Legal, A4, B5, A5, A6, B6, Envelope #9, Envelope #6, ISO B5, Custom, Hagaki (Cardstock), Oufuku hagaki (Return postcard), Oficio II, 216 × 340 mm, 16K, Statement, Folio, Youkei 2, Youkei 4
Media Type <sup>*1</sup>	Select the media type.  Values: Plain (60 - 105 g/m²), Transparency, Preprinted, Labels, Bond, Recycled, Vellum (60 - 105 g/m²), Rough, Letterhead, Color, Prepunched, Envelope, Cardstock, Coated, Thick (106 - 220 g/m²), High Quality, Custom 1 - 8

<sup>\*1</sup> To change to a media type other than Plain.

#### Display the screen.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Paper Settings] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [MP Tray Set.] > [OK] key

#### Specify the paper size.

- **1** [▲] [▼] key > [Paper Size] > [OK] key
- 2 Select the paper size, and select the [OK] key.

#### Specify the media type.

- **1** [▲] [▼] key > [Media Type] > [OK] key
- 2 Select the media type, and select the [**OK**] key.

Media Type Setting (page 8-9)

## **Paper Stopper**

When using paper A4/Letter or larger, open the paper stopper shown in the figure.

# 4 Printing from PC

#### This chapter explains the following topics:

Printing from PC	4-2
Printing on Non-standard Sized Paper	4-4
Printer Driver Print Settings Screen	4-5
Printer Driver Help	4-6
Changing the Default Printer Driver Settings (Windows 7)	4-6
Canceling Printing from a Computer	4-6
Printing by AirPrint	4-7
Printing by Google Cloud Print	4-8
Printing Data Saved on the Printer	4-9
Specifying the Job Box from a Computer and Storing the Job	
Printing Documents from Private Print Box	
Printing Document from Stored Job Box	4-12
Printing Document from Quick Copy Box	
Printing Document from Proof and Hold Box	4-16
Job Box Setting	4-18
Status Monitor	4-19
Accessing the Status Monitor	4-19
Exiting the Status Monitor	4-19
Status Monitor Display	4-19

## **Printing from PC**

Follow the steps below to print documents from applications.

This section provides the printing method using the Printing System Driver.

#### **NOTE**

- To print the document from applications, install the printer driver on your computer from the supplied DVD (Product Library).
- In some environments, the current settings are displayed at the bottom of the printer driver.

- When printing the cardstock or envelopes, load the cardstock or envelopes in the multi purpose tray before performing the following procedure.
- ▶ When you load envelopes or cardstock in the multi purpose tray (page 3-9)

#### Display the screen.

Click [File] and select [Print] in the application.

## Configure the settings.

Select the machine from the "Name" menu and click the [Properties] button.

- 2 Select the [Basic] tab.
- 3 Click "Print size" menu and select the paper size to use for printing.

To load the paper of size that is not included in print sizes of the machine such as cardstock or envelopes, the paper size needs to be registered.

→ Printing on Non-standard Sized Paper (page 4-4)

To print on the special paper such as thick paper or transparency, click "Media type" menu and select the media type.

4 Click [**OK**] button to return to the Print dialog box.

### 3 Start printing.

Click the [OK] button.

## **Printing on Non-standard Sized Paper**

If you loaded a paper size that is not included in the print sizes of the machine, register the paper size in the [Basic] tab of the print settings screen of the printer driver.

The registered size can be selected from the "Print size" menu.

To execute printing at the machine, set the paper size and type in the following:

- ▶ Paper Size and Media Type for the Multi Purpose Tray (MP Tray Setting) (page 3-12)
  - Display the print settings screen.
  - 2 Register the paper size.

- 1 Click the [Basic] tab.
- 2 Click the [Page Size...] button.
- 3 Click the [New] button.
- 4 Enter the paper size.
- 5 Enter the name of the paper.
- 6 Click the [Save] button.
- 7 Click the [OK] button.
- 8 In the "Print size" menu, select the paper size (name) that you registered in steps 4 to 7.
- 9 Select the type of paper in the "Media type" menu
- 10 Click [MP tray] in the "Source" menu.

If you loaded a postcard or envelope, select [Cardstock] or [Envelope] in the "Media type" menu.

## **Printer Driver Print Settings Screen**

The printer driver print settings screen allows you to configure a variety of print-related settings.

#### Printing System Driver User Guide

## **Printer Driver Help**

The printer driver includes Help. To learn about print settings, open the printer driver print settings screen and display Help as explained below.

- Click the [?] button in the upper right corner of the screen and then click the item you want to know about.
- 2 Click the item you want to know about and press the [F1] key on your keyboard.

## **Changing the Default Printer Driver Settings (Windows 7)**

The default printer driver settings can be changed. By selecting frequently used settings, you can omit steps when printing. For the settings, refer to the following:

- Printing System Driver User Guide
  - 1 Click [Start] button on the Windows, and then click [Devices and Printers].
  - 2 Right-click the printer driver icon of the machine, and click the [Printer properties] menu of the printer driver.
  - 3 Click the [Basic] button on the [General] tab.
  - 4 Select the default settings and click the [**OK**] button.

## **Canceling Printing from a Computer**

To cancel a print job executed using the printer driver before the printer begins printing, do the following:

#### NOTE

When canceling printing from this machine, refer to the following:

- Canceling Jobs (page 5-3)
- 1 Double-click the printer icon ( 🔜 ) displayed on the taskbar at the bottom right of the Windows desktop to display a dialog box for the printer.
- 2 Click the file for which you wish to cancel printing and select [Cancel] from the "Document" menu.

## **Printing by AirPrint**

AirPrint is a printing function that is included standard in iOS 4.2 and later products, and Mac OS X 10.7 and later products.

This function enables you to connect and print to any AirPrint compatible device without installing a printer driver.

To allow the machine to be found when printing by AirPrint, you can set machine location information in Embedded Web Server RX.

#### → Embedded Web Server RX User Guide

## **Printing by Google Cloud Print**

Google Cloud Print is a printing service provided by Google and does not require a printer driver. This service enables a user with a Google account to print from a machine connected to the Internet.

The machine can be configured in the Embedded Web Server RX.

#### Embedded Web Server RX User Guide

A Google account is necessary to use Google Cloud Print. Obtain a Google account if you do not have one.

It is also necessary to register the machine with the Google Cloud Print service in advance. The machine can be registered from a PC connected to the same network.

## **Printing Data Saved on the Printer**

If you configure settings in the [**Job**] tab of the printer driver and then print, the print job will be saved in the Job Box (memory) and printing can be executed at the machine.

Follow the work flow below when using Job Box.

Specifying the Job Box from a computer and sending the print job. (page 4-9)

Using the operation panel to specify a file within a Box and printing it.

You can print the documents from the following boxes.

- Printing Documents from Private Print Box (page 4-10)
- Printing Document from Stored Job Box (page 4-12)
- Printing Document from Quick Copy Box (page 4-14)
- Printing Document from Proof and Hold Box (page 4-16)

# Specifying the Job Box from a Computer and Storing the Job

Use the procedure below to store data in a Job Box.

- 1 Click [File] and select [Print] in the application. The Print dialog box displays.
- 2 Select the machine from the "Name" menu.
- 3 Click the [Properties] button. The Properties dialog box displays.
- 4 Click the [Job] tab and select the [Job storage (e-MPS)] check box to set the function.

- To use Stored Job Box and Quick Copy Box, an optional SSD must be installed in the machine.
- For information on how to use the printer driver software, refer to the following:
- Printing System Driver User Guide

## **Printing Documents from Private Print Box**

In Private Printing, you can specify that a job is not to be printed until you operate the machine. When sending the job from the application software, specify a 4-digit access code in the printer driver. The job is released for printing by entering the access code on the operation panel, ensuring confidentiality of the print job. The data will be deleted upon completion of the print job or after the power switch is turned off.

The following operations are possible:

- Printing the Documents (page 4-10)
- Deleting the Documents (page 4-11)

#### **Printing the Documents**

Print the documents stored in a Private Print box. The procedure is as follows.

#### Display the screen.

1 [Document Box] key > [▲] [▼] key > [Private/Stored] > [OK] key

**NOTE** 

If the default screen of the box is set to a Custom Box, display the Job Box screen.

[Document Box] key > [Back] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Job Box] > [OK] key

2 Select the creator of the document, and select the [OK] key.

#### Print the document.

1 Select the document to print, and [Select] > [OK] key.

The file is selected. A checkmark will be placed on the right of the selected file.

Checkmarks will be placed on the right of the all files when [All Files] is selected.

When all files are checked, all checkmarked files are deselected.

Select the checkmarked file and select [Select] again to cancel the selection.

- 2 [▲] [▼] key > [Print] > [OK] key
- 3 Specify the number of copies to print as desired, and the [OK] key > [Yes]. Printing starts.

Upon completion of printing, the Private/Stored job is automatically deleted.

NOTE

#### **Deleting the Documents**

Delete the documents stored in a Private Print box. The procedure is as follows.

#### Display the screen.

1 [Document Box] key > [▲] [▼] key > [Private/Stored] > [OK] key

NOTE

If the default screen of the box is set to a Custom Box, display the Job Box screen.

[Document Box] key > [Back] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Job Box] > [OK] key

2 Select the creator of the document, and select the [OK] key.

#### Delete the document.

1 Select the document to delete, and [Select] > [OK] key.

The file is selected. A checkmark will be placed on the right of the selected file.

Checkmarks will be placed on the right of the all files when [All Files] is selected.

When all files are checked, all checkmarked files are deselected.

Select the checkmarked file and select [Select] again to cancel the selection.

2 [▲] [▼] key > [Delete] > [OK] key > [Yes]

The document is deleted.

**NOTE** 

## **Printing Document from Stored Job Box**

In Stored Job, the print data sent from the application is saved to the machine. You can set up an access code as necessary. If you set up an access code, enter the access code when printing. Print data will be stored in the Stored Job Box after printing. This will allow printing of the same print data repeatedly.

The following operations are possible:

- → Printing the Documents (page 4-12)
- Deleting the Documents (page 4-13)

#### **Printing the Documents**

Print the documents stored in a Stored Job box. The procedure is as follows.

#### Display the screen.

1 [Document Box] key > [▲] [▼] key > [Private/Stored] > [OK] key

**NOTE** 

If the default screen of the box is set to a Custom Box, display the Job Box screen.

[Document Box] key > [Back] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Job Box] > [OK] key

2 Select the creator of the document, and select the [OK] key.

#### Print the document.

1 Select the document to print, and [Select] > [OK] key.

The file is selected. A checkmark will be placed on the right of the selected file.

Checkmarks will be placed on the right of the all files when [All Files] is selected.

When all files are checked, all checkmarked files are deselected.

Select the checkmarked file and select [Select] again to cancel the selection.

- 2 [▲] [▼] key > [Print] > [OK] key
- 3 Specify the number of copies to print as desired, and the [OK] key > [Yes]. Printing starts.

NOTE

#### **Deleting the Documents**

Delete the documents stored in a Stored Job box. The procedure is as follows.

#### Display the screen.

1 [Document Box] key > [▲] [▼] key > [Private/Stored] > [OK] key

**NOTE** 

If the default screen of the box is set to a Custom Box, display the Job Box screen.

[Document Box] key > [Back] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Job Box] > [OK] key

2 Select the creator of the document, and select the [OK] key.

#### Print and delete the document.

1 Select the document to delete, and [Select] > [OK] key.

The file is selected. A checkmark will be placed on the right of the selected file.

Checkmarks will be placed on the right of the all files when [All Files] is selected.

When all files are checked, all checkmarked files are deselected.

Select the checkmarked file and select [Select] again to cancel the selection.

2 [▲] [▼] key > [Delete] > [OK] key > [Yes]

The document is deleted.

**NOTE** 

## **Printing Document from Quick Copy Box**

Quick Copy feature facilitates additional prints of a document already printed. Activating Quick Copy and printing a document using the printer driver allow the print data to be stored in the Quick Copy Job Box. When additional copies are required, you can reprint the required number of copies from the operation panel. By default, up to 32 documents can be stored. When power is turned off, all stored jobs will be deleted.

## NOTE

- When the number of jobs reaches the limit, the oldest job will be overwritten by the new one.
- To maintain free space on the box, you can set the maximum number of stored jobs.
- Quick Copy Jobs (page 4-18)

The following operations are possible:

- Printing the Documents (page 4-14)
- → Deleting the Documents (page 4-15)

#### **Printing the Documents**

You can print the documents stored in the Quick Copy box. The procedure is as follows.

#### Display the screen.

1 [Document Box] key > [▲] [▼] key > [Quick Copy] > [OK] key

If the default screen of the box is set to a Custom Box, display the Job Box screen.

[Document Box] key > [Back] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Job Box] > [OK] key

Select the creator of the document, and select the [OK] key.

#### Print the document.

1 Select the document to print, and [Select] > [OK] key.

The file is selected. A checkmark will be placed on the right of the selected file.

Checkmarks will be placed on the right of the all files when [All Files] is selected.

When all files are checked, all checkmarked files are deselected.

Select the checkmarked file and select [Select] again to cancel the selection.

- 2 [▲] [▼] key > [Print] > [OK] key
- 3 Specify the number of copies to print as desired, and the [OK] key > [Yes]. Printing starts.

#### **Deleting the Documents**

You can delete the documents stored in the Quick Copy box. The procedure is as follows.

#### Display the screen.

**1** [**Document Box**] key > [**△**] [**▼**] key > [**Quick Copy**] > [**OK**] key

**NOTE** 

If the default screen of the box is set to a Custom Box, display the Job Box screen.

[Document Box] key > [Back] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Job Box] > [OK] key

2 Select the creator of the document, and select the [**OK**] key.

#### Delete the document.

1 Select the document to delete, and [Select] > [OK] key.

The file is selected. A checkmark will be placed on the right of the selected file.

Checkmarks will be placed on the right of the all files when [All Files] is selected.

When all files are checked, all checkmarked files are deselected.

Select the checkmarked file and select [Select] again to cancel the selection.

2 [▲] [▼] key > [Delete] > [OK] key > [Yes]

The document is deleted.

## **Printing Document from Proof and Hold Box**

The Proof and Hold feature produces only a single proof print of multiple-print job and holds printing of the remaining copies. Printing a multiple-print job in Proof and Hold using the printer driver allows only a single copy to be printed while maintaining the document data in the Job Box. To continue to print the remaining copies, use the operation panel. You can change the number of copies to print.

The following operations are possible:

- Printing the Documents (page 4-16)
- Deleting the Documents (page 4-17)

#### **Printing the Documents**

You can print the documents stored in the Proof and Hold box. The procedure is as follows.

#### Display the screen.

1 [Document Box] key > [▲] [▼] key > [Quick Copy] > [OK] key

**NOTE** 

If the default screen of the box is set to a Custom Box, display the Job Box screen.

[Document Box] key > [Back] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Job Box] > [OK] key

2 Select the creator of the document, and select the [OK] key.

#### Print the document.

1 Select the document to print, and [Select] > [OK] key.

The file is selected. A checkmark will be placed on the right of the selected file.

Checkmarks will be placed on the right of the all files when [All Files] is selected.

When all files are checked, all checkmarked files are deselected.

Select the checkmarked file and select [Select] again to cancel the selection.

- 2 [▲] [▼] key > [Print] > [OK] key
- 3 Specify the number of copies to print as desired, and the [OK] key > [Yes]. Printing starts.

#### **Deleting the Documents**

You can delete the documents stored in the Proof and Hold box. The procedure is as follows.

#### Display the screen.

**1** [**Document Box**] key > [**△**] [**▼**] key > [**Quick Copy**] > [**OK**] key

NOTE

If the default screen of the box is set to a Custom Box, display the Job Box screen.

[Document Box] key > [Back] key > [▲] [▼] key > [Job Box] > [OK] key

2 Select the creator of the document, and select the [OK] key.

#### Delete the document.

1 Select the document to delete, and [Select] > [OK] key.

The file is selected. A checkmark will be placed on the right of the selected file.

Checkmarks will be placed on the right of the all files when [All Files] is selected.

When all files are checked, all checkmarked files are deselected.

Select the checkmarked file and select [Select] again to cancel the selection.

2 [▲] [▼] key > [Delete] > [OK] key > [Yes]

The document is deleted.

## **Job Box Setting**

Configures settings for Job Box.

#### Display the screen.

[Document Box] key > [▲] [▼] key > [Job Box Setting] > [OK] key

NOTE

If the default screen of the box is set to a Custom Box, display the Job Box screen.

[Document Box] key > [Back] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Job Box] > [OK] key

#### Configure the settings.

The available settings are shown below.

Item	Description
Quick Copy Jobs	To maintain free space on the box, you can set the maximum number of stored jobs.  Value: number between 0 and 300  NOTE
	When 0 is set, Quick Copy cannot be used.
JobRet. Deletion	This setting specifies that documents, such as Private Printing, Quick Copying, or Proof and Hold Printing, saved temporarily in the job box are automatically deleted after they have been saved for a set time.  Value: Off, 1 hour, 4 hours, 1 day, 1 week  NOTE  This function is valid for documents saved after the function is set. Regardless of this function setting, temporary documents are deleted
Storage Media	when the main power switch is turned off.  Select which storage media to use.
	Value: SSD, SD Card
	NOTE
	This setting is not displayed if the optional SSD or SD card is not installed.

## **Status Monitor**

The Status Monitor monitors the printer status and provides an ongoing reporting function.

When you activate Status Monitor, check the status below.

- · Printing System Driver is installed.
- Either [Enhanced WSD] or [EnhancedWSD(SSL)] are set to [On] in "TCP/IP Settings".
- → TCP/IP Settings (page 8-18)

## **Accessing the Status Monitor**

The Status Monitor also starts up when printing is started.

## **Exiting the Status Monitor**

Use either of the methods listed below to exit the Status Monitor.

- Exit manually:
   Click the settings icon and select Exit in the menu to exit the Status Monitor.
- Exit automatically:
   The Status Monitor automatically shuts down after 7 minutes if it is not being used.

## **Status Monitor Display**

The display of the Status Monitor is as follows.

#### **Quick View State**

The status of the printer is displayed using icons. Detailed information is displayed when the Expand button is clicked.

Detailed information is displayed by clicking on each icon tab.

#### **Printing Progress Tab**

The status of the print jobs is displayed.

Select a job on the job list and it can be canceled using the menu displayed with a right-click.

#### **Paper Tray Status Tab**

Information is displayed about the paper in the printer and about the amount of paper remaining.

#### **Toner Status Tab**

The amount of toner remaining is displayed.

#### **Alert Tab**

If an error occurs, a notice is displayed using a 3D image and a message.

#### **Status Monitor Context Menu**

The following menu is displayed when the settings icon is clicked.

#### Embedded Web Server RX

If the printer is connected to a TCP/IP network and has its own IP address, use a web browser to access the Embedded Web Server RX to modify or confirm the network settings. This menu is not displayed when using USB connection.

- **▶** Embedded Web Server RX User Guide
- Notification...

This sets the display of the Status Monitor.

- → Status Monitor Notification Settings (page 4-22)
- Exit

Exits the Status Monitor.

#### **Status Monitor Notification Settings**

The Status Monitor settings and event list details are displayed.

Select whether notification is performed when an error in the event list occurs.

Select Enable event notification.

If this setting is set to Off, then the Status Monitor will not start up even when printing is executed.

- Select an event to use with the text to speech function in Available events.
- Click Sound file / Text to Speech column. 3

Click the browse (...) button to notify the event by sound file.

#### ■ NOTE

The available file format is WAV.

When customizing the message texts to read on the screen aloud, enter the texts in the text box.

# **5** Operation on the Machine

### This chapter explains the following topics:

Checking the Equipment's Serial Number	5-2
Canceling Jobs	5-3
What is Document Box?	5-4
Using a Custom Box	5-6
Creating a New Custom Box	5-6
Editing and Deleting Custom Box	5-8
Storing Documents	5-8
Printing Documents	5-9
Editing Documents	5-10
Deleting Documents	. 5-11
Printing Documents Stored in Removable USB Memory	5-12
Removing USB Memory	5-14

# **Checking the Equipment's Serial Number**

The equipment's serial number is printed in the location shown in the figure.

# NOTE

You'll need the equipment's serial number when contacting your Service Representative. Please check the number before contacting your Service Representative.

# **Canceling Jobs**

You can also cancel jobs by selecting the [Cancel] key.

# While the printer displays "Processing.", select [Cancel] key.

The "Job Cancel List" appears, showing the list of current print jobs.

# Cancel a job.

- 1 Select the job to cancel, and the [OK] key.
- 2 Select [Yes].

The job is canceled.

"Canceling..." appears on the message display and printing stops after the current page is printed.

# What is Document Box?

Document Box contains four types of component boxes which provide the following functions.

The following types of document boxes are available.

### Custom Box (page 5-6)

Custom Box is a component box which you can create within the Document Box and store data for later retrieval. You can create or delete a Custom Box, and manipulate data in various ways as described below:

Creating a New Custom Box (page 5-6)

Storing Documents (page 5-8)

Printing Documents (page 5-9)

Editing Documents (page 5-10)

Deleting Documents (page 5-11)

### **NOTE**

To use Custom Box, an optional SSD must be installed in the machine.

### Job Box

This is a box to save jobs executed from a PC.

### NOTE

- You can set up the machine so that temporary documents in job boxes are automatically deleted.
- → JobRet. Deletion (page 4-18)
- For details on operating the Job Box, refer to the following:
- Printing Data Saved on the Printer (page 4-9)

### Private Print/Stored Job Box (page 4-10, page 4-12)

In Private Printing, you can specify that a job is not to be printed until you operate the machine. When sending the job from the application software, specify a 4-digit access code in the printer driver. The job is released for printing by entering the access code on the operation panel, ensuring confidentiality of the print job. The data will be deleted upon completion of the print job or after the power switch is turned off.

In Stored Job, the print data sent from the application is saved to the machine. You can set up an access code as necessary. If you set up an access code, enter the access code when printing. Print data will be stored in the Job Box after printing. This will allow printing of the same print data repeatedly.

### Quick Copy/Proof and Hold Box (page 4-14, page 4-16)

Quick Copy feature facilitates additional prints of a document already printed. Activating Quick Copy and printing a document using the printer driver allow the print data to be stored in the Job Box. When additional copies are required, you can reprint the required number of copies from the operation panel. By default, up to 32 documents can be stored. When power is turned off, all stored jobs will be deleted.

### NOTE

When you attempt to store documents in excess of the above maximum, the oldest document data will be overwritten by the latest document data.

The Proof and Hold feature produces only a single proof print of multiple-print job and holds printing of the remaining copies. Printing a multiple-print job in Proof and Hold using the printer driver allows only a single copy to be printed while maintaining the document data in the Job Box. To continue to print the remaining copies, use the operation panel. You can change the number of copies to print.

# Removable Memory Box (page 5-12)

A USB memory stick can be connected to the USB memory slot on the machine to print a saved file. You can print data directly from the USB memory without a PC.

# **Using a Custom Box**

Custom Box is a component box which you can create within the Document Box and store data for later retrieval. You can create or delete a Custom Box, and manipulate data in various ways as described below:

Creating a New Custom Box (page 5-6)

Storing Documents (page 5-8)

Printing Documents (page 5-9)

Editing Documents (page 5-10)

**Deleting Documents (page 5-11)** 

The operation on Custom Box you perform from operation panel can also be made using Embedded Web Server RX.

Embedded Web Server RX User Guide

# **Creating a New Custom Box**

# **NOTE**

- To use Custom Box, an optional SSD must be installed in the machine.
- If user login administration is enabled, you can only change the settings by logging in with administrator privileges. The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

 Login User Name:
 3500
 4000

 Login Password:
 3500
 4000

- If user login administration is enabled, log in with administrator privileges to perform the following operations. They cannot be performed with user privileges.
  - Creating a box
  - Deleting a box of which owner is another user.

# Display the screen.

Select the [Document Box] key.

NOTE

If the default screen of the box is set to a Job Box, display the Custom Box screen.

[Document Box] key > [Back] key > [▲] [▼] key > [Custom Box] > [OK] key

# Create a custom box.

- 1 Select [Add].
- 2 Enter the box name and select the [OK] key.

**NOTE** 

Up to 32 characters can be entered.

For details on entering characters, refer to the following:

Character Entry Method (page 11-10)

3 Enter a box number and select the [OK] key.

### NOTE

You can set any value between 0001 and 1000.

Use the [▲] or [▼] key or the numeric keys to enter a number.

If you specify a box number that is already in use, an error message appears when you select the [OK] key and the number cannot be registered. If you enter 0000, the smallest number available will be automatically assigned.

4 To complete the box registration, select [▲] [▼] key > [Exit] > [OK] key. The Custom Box is created. To register further Box information, select  $[\blacktriangle]$   $[\blacktriangledown]$  key  $\gt$   $[\texttt{Detail}] \gt$  [OK] key. Proceed to next step.

### Enter the box information.

Select [Edit] or [Change] on each item and enter the information then select the [OK] key. Select the [▶] key to view the next screen. Select the [◄] key to return to the previous screen. The table below lists the items to be set.

Item	Description		
Box Name	Enter a box name consisting of up to 32 characters.		
	→ Character Entry Method (page 11-10)		
Owner*1 *2	Set the owner of the box. Select the owner from the user list that appears.		
Permission*1	Select whether to share the box.		
Box Password	User access to the box can be restricted by specifying a password to protect the box. Entering a password is not mandatory.		
	Enter a password of up to 16 characters and select the [ <b>OK</b> ] key. Reenter the same password for confirmation and select the [ <b>OK</b> ] key.		
	This can be set if [Shared] is selected in "Permission".		
Box Number	Enter the box number by using the numeric keys or using the [▲] or [▼] key. The box number can be from 0001 to 1000. A Custom Box should have a unique number. If you enter 0000, the smallest number available will be automatically assigned.		
Usage Restrict.	The usage for a box can be restricted. To enable a capacity restriction enter a value for the storage capacity of the Custom Box in megabytes by using the numeric keys or using the [▲] or [▼] key. You can enter a limit between 1 and 30,000 (MB).		
Auto File Del.	Automatically deletes stored documents after a set period of time.		
	To enable automatic deletion, select [▲] [▼] key > [Off/On] > [OK] key > [▲] [▼] key > [On] > [OK] key.		
	To set the period that the document will be stored, select [▲] [▼] key > [Period] > [OK] key.		
	Use the numeric keys or use the [▲] or [▼] key to enter the number of days for which documents are stored. You can enter any number between 1 and 31 (day(s)).		
	To disable automatic file deletion, select [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Off/On] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Off] > [OK] key.		
OverwriteSetting	Specifies whether or not old stored documents are overwritten when new documents are stored.  To overwrite old documents, select [▲] [▼] key > [Permit] > [OK] key.  To retain old documents, select [▲] [▼] key > [Prohibit] > [OK] key.		
Del. afterPrint	Automatically delete a document from the box once printing is complete.  To delete the document, select [▲] [▼] key > [On] > [OK] key.  To retain the document, select [▲] [▼] key > [Off] > [OK] key.		

<sup>\*1</sup> Displayed when the user login administration is enabled.

<sup>\*2</sup> Displayed when the user has logged in as administrator.

# **Editing and Deleting Custom Box**

## Display the screen.

Select the [Document Box] key.

NOTE

If the default screen of the box is set to a Job Box, display the Custom Box screen.

[Document Box] key > [Back] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Custom Box] > [OK] key

# Edit the custom box.

### To edit

1 Select the box you want edit and select the [OK] key.

NOTE

- When you have logged in as a user, you can only edit a box whose owner is set to that
  user
- · When you have logged in as administrator, you can edit all boxes.
- If a custom box is protected by a password, enter the correct password.
- 2 [Menu] > [▲] [▼] key > [Box Detail/Edit] > [OK] key
- 3 Change the box information.
  - → Creating a New Custom Box (page 5-6)

### To delete

1 Select the box you want delete and [OK] key.

- NOTE
- When you have logged in as a user, you can only delete a box whose owner is set to that user.
- When you have logged in as administrator, you can delete all boxes.
- 2 [Menu] > [▲] [▼] key > [Delete] > [OK] key > [Yes]

NOTE

If a custom box is protected by a password, enter the correct password.

# **Storing Documents**

Custom box stores the print data which is sent from a PC. For the operation of the printing from the PC, refer to the following:

Printing System Driver User Guide

# **Printing Documents**

The procedure for printing documents in a custom box is explained below.

## Display the screen.

1 Select the [Document Box] key.

# NOTE

If the default screen of the box is set to a Job Box, display the Custom Box screen.

[Document Box] key > [Back] key > [▲] [▼] key > [Custom Box] > [OK] key

2 Select the box containing the document you want to print, and select the [OK] key.

# **NOTE**

- If a custom box is protected by a password, enter the correct password.
- Select [Select] to perform the following operations.
  - [Sort]: Sort the boxes.
  - [Search(No.)]: Search using the box number.

# Print the document.

1 Select the document you want to print, and select [Select].

A checkmark will be placed on the right of the selected file.

Checkmarks will be placed on the right of the all files when [All Files] is selected.

When all files in the Custom Box are checked, all checkmarked files are deselected.

Select the checkmarked file and select [Select] again to cancel the selection.

# NOTE

Select [Menu] to perform the following operations.

- [Search(Name)]: Search using a file name.
- [Box Detail/Edit]: Show and edit box details.

★ To edit (page 5-8)

[File Detail]: Display the details for the selected file.

• [Delete]: Delete the document.

→ To delete (page 5-8)

2 Select the [OK] key.

To use the settings used at the time of printing (when the document was saved), select  $[\blacktriangle][\blacktriangledown]$  key > [Print] > [OK] key.

To change the print settings, select  $[\blacktriangle]$   $[\blacktriangledown]$  key > [Print(ChangeSet)] > [OK] key.

If [Print] is selected, change the number of copies to print as necessary.

If [**Print (ChangeSet)**] is selected, change the print settings. For the features that can be selected, refer to the following:

Custom Box (Printing) (page 6-2)

Printing of the selected document begins.

# **Editing Documents**

This function allows you to move documents stored in custom boxes into other boxes. The procedure for moving documents is explained below.

### Display the screen.

1 Select the [Document Box] key.

# **NOTE**

If the default screen of the box is set to a Job Box, display the Custom Box screen.

[Document Box] key > [Back] key > [▲] [▼] key > [Custom Box] > [OK] key

2 Select the box containing the document you want to move, and select the [OK] key.

# **NOTE**

- If a custom box is protected by a password, enter the correct password.
- Select [Menu] to perform the following operations.
  - [Sort]: Sort the boxes.
  - [Search(No.)]: Search using the box number.

### Move the documents.

1 Select the document you want to move, and select [Select].

A checkmark will be placed on the right of the selected file.

Checkmarks will be placed on the right of the all files when [All Files] is selected.

When all files in the Custom Box are checked, all checkmarked files are deselected.

Select the checkmarked file and select [Select] again to cancel the selection.

# NOTE

Select [Menu] to perform the following operations.

- [Search(Name)]: Search using a file name.
- [Box Detail/Edit]: Show and edit box details.
  - ◆ To edit (page 5-8)
- [File Detail]: Display the details for the selected file.
- [Delete]: Delete the document.
  - → To delete (page 5-8)
- 2 [OK] key > [▲] [▼] key > [Move] > [OK] key
- 3 Select the destination box, and the [OK] key.

The selected document is moved.

# NOTE

If the box to which the document is to be moved is protected by a password, enter the correct password.

# **Deleting Documents**

The procedure for deleting documents in a custom box is explained below.

# Display the screen.

1 Select the [Document Box] key.

# NOTE

If the default screen of the box is set to a Job Box, display the Custom Box screen.

[Document Box] key > [Back] key > [▲] [▼] key > [Custom Box] > [OK] key

2 Select the box containing the document you want to delete, and select the [OK] key.

# **NOTE**

- If a custom box is protected by a password, enter the correct password.
- Select [Menu] to perform the following operations.
  - [Sort]: Sort the boxes.
  - [Search(No.)]: Search using the box number.

### Delete the document.

1 Select the document you want to delete, and select [Select].

A checkmark will be placed on the right of the selected file.

Checkmarks will be placed on the right of the all files when [All Files] is selected.

When all files in the Custom Box are checked, all checkmarked files are deselected.

Select the checkmarked file and select [Select] again to cancel the selection.

# NOTE

Select [Menu] to perform the following operations.

- [Search(Name)]: Search using a file name.
- [Box Detail/Edit]: Show and edit box details.
  - <u>To edit (page 5-8)</u>
- [File Detail]: Display the details for the selected file.
- [Delete]: Delete the document.
- ★ To delete (page 5-8)

2 [OK] key > [▲] [▼] key > [Delete] > [OK] key > [Yes]

# **Printing Documents Stored in Removable USB Memory**

Plugging USB memory directly into the machine enables you to quickly and easily print the files stored in the USB memory without having to use a computer.

The following file types can be printed:

PDF file (Version 1.7 or older)

TIFF file (TIFF V6/TTN2 format)

JPEG file

XPS file

OpenXPS file

**Encrypted PDF file** 

- PDF files you wish to print should have an extension (.pdf).
- Files to be printed should be saved no further down than the top 3 folder levels, including the root folder.
- Plug the USB memory directly into the USB Memory Slot.

### Plug the USB memory.

Plug the USB memory into the USB Memory Slot.

# NOTE

If the USB memory screen does not appear, display the screen for USB memory.

[Menu] key > [▲] [▼] key > [USB Memory] > [OK] key

# Print the document.

- 1 [▲] [▼] key > [Print File] > [OK] key
- 2 Select the folder containing the file to be printed, and select the [OK] key.
  The machine will display documents in the top 3 folder levels, including the root folder.

# NOTE

- 1,000 documents can be displayed.
- · To return to a higher level folder, select the [Back] key.

3 Select the document, and select the [OK] key.

**NOTE** 

Select [**Detail**] to show the details of the selected folder or document.

4 Change the number of copies, duplex printing, etc. as desired.

For the features that can be selected, refer to the following:

- **▶** Removable Memory (Printing Documents) (page 6-3)
- 5 Select the [OK] key.

Printing of the selected file begins.

# **Removing USB Memory**

Follow the steps below to remove the USB memory.

**⊘** IMPORTANT

Be sure to follow the proper procedure to avoid damaging the data or USB memory.

Display the screen.

[Menu] key > [▲] [▼] key > [USB Memory] > [OK] key

Select [Remove Memory].

**[**▲**] [**▼**]** key > **[Remove Memory**] > **[OK]** key

Remove the USB memory.

# **6 Using Various Functions**

### This chapter explains the following topics:

Functions Available on the Machine	
Custom Box (Printing)	6-2
Removable Memory (Printing Documents)	6-3
Functions	6-4
EcoPrint	6-4
Duplex	6-4
Job Finish Notice	
File Name Entry	6-5
Quiet Mode	6-5
Del. after Print (Delete after Printed)	6-5
Encrypted PDF	6-5
TIFF/JPEG Size	6-6
XPS FitTo Page	6-6

# **Functions Available on the Machine**

# **Custom Box (Printing)**

For details on each function, see the table below.

Functions	Description	Reference page
Quiet Mode	Lower print speed for quiet processing.	<u>page 6-5</u>
Duplex	Print a document on both sides of the paper.	<u>page 6-4</u>
EcoPrint	EcoPrint saves toner when printing.	page 6-4
File Name Entry	Adds a file name.	<u>page 6-5</u>
Job Finish Notice	Sends E-mail notice when a job is complete.	page 6-4
Del. after Print	Automatically deletes a document from the box once printing is complete.	<u>page 6-5</u>

# **Removable Memory (Printing Documents)**

For details on each function, see the table below.

Function key	Description	Reference page
Quiet Mode	Lower print speed for quiet processing.	<u>page 6-5</u>
Duplex	Print a document on both sides of the paper.	page 6-4
EcoPrint	EcoPrint saves toner when printing.	page 6-4
File Name Entry	Adds a file name.	<u>page 6-5</u>
JobFinish Notice	Sends E-mail notice when a job is complete.	page 6-4
Encrypted PDF	Enter the preassigned password to print the PDF data.	<u>page 6-5</u>
TIFF/JPEG Size	Select the image size when printing JPEG or TIFF files.	<u>page 6-6</u>
XPS FitTo Page	Reduces or enlarges the image size to fit to the selected paper size when printing XPS file.	<u>page 6-6</u>

# **Functions**

# **EcoPrint**

EcoPrint saves toner when printing.

Use this function for test prints or any other occasion when high quality print is not required.

(Value: [Off] / [On])

# **Duplex**

Print a document on both sides of the paper.

The following modes are available.

	ltem		Description
Off			Disables the function.
Bind Long Edge	ghi def abc	ghi abc (	Prints the reverse side of a document in the same orientation as the front side.
Bind Short Edge	ghi def abc	ghi abc def	Prints the reverse side of a document rotated 180° with respect to the front side. When the printed pages are bound at the top, the reverse side will be in the same orientation as the front side when the pages are turned.

# **Job Finish Notice**

Sends E-mail notice when a job is complete.

Users can be notified of the completion of a job while working at a remote desk, saving the time spent waiting beside the machine to finish.

### **◯** NOTE

PC should be configured in advance so that E-mail can be used.

→ Embedded Web Server RX (page 2-32)

E-mail can be sent to a single destination.

	Item	Description	
Off		Disables the function.	
On	Address Entry	Enter E-mail address directly. Enter the address (up to 128 characters) and select the [OK] key.	

# **File Name Entry**

Adds a file name.

Additional information such as job number and date and time can also be set. You can check a job history or job status using the file name, date and time, or job number specified here.

To add date and time, select [Date] and the [OK] key. To add job number, select [Job No.] and the [OK] key. To add both, select [Job No. + Date] or [Date + Job No.] and the [OK] key.

# **Quiet Mode**

Lower print speed for quiet processing.

Select this mode when the running noise is uncomfortable.

It is possible to set the use of Quiet Mode for each function.

(Value: [Off] / [On])

- The processing speed will be slower than normal when in Quiet Mode.
- · This cannot be used when [Prohibit] is set for "Each Job".
- → Each Job (page 8-26)

# **Del. after Print (Delete after Printed)**

Automatically deletes a document from the box once printing is complete.

(Value: [Off] / [On])

# **Encrypted PDF**

Enter the preassigned password to print the PDF data.

Enter the Password, and select [OK].

### NOTE

For details on entering the password, refer to the following:

**▶** Character Entry Method (page 11-10)

# **TIFF/JPEG Size**

Select the image size when printing JPEG or TIFF files.

(Value: [Paper Size] / [Image Resolution] / [Print Resolution])

Item	Description	
Paper Size	Fits the image size to the selected paper size.	
Image Resolution	Prints at resolution of the actual image.	
Print Resolution	Fits the image size to the print resolution.	

# **XPS FitTo Page**

Reduces or enlarges the image size to fit to the selected paper size when printing XPS file.

(Value: [Off] / [On])

# **7** Status/Job Cancel

## This chapter explains the following topics:

Checking Job Status	7-2
Checking Job History	
Sending the Log History	
Device/Communication	
Checking the Remaining Amount of Toner and Paper (Paper/Supplies)	7-6

# **Checking Job Status**

Check the status of jobs being processed or waiting to be printed.

### **Displaying Status Screens**

# Display the screen.

While the machine is printing or awaiting printing, select [Status] > [▲] [▼] key > [Job Status] > [OK] key.

# Select the job you want to check.

Select the job you want to check, and [OK] key or [Detail].

# NOTE

You can show the job statuses of all users, or only the statuses of your own jobs.

→ Disp. Status/Log (page 8-14)

This setting can also be changed from Embedded Web Server RX.

**▶** Embedded Web Server RX User Guide

# Check the status.

Select the [▶] key to view the next screen. Select the [◄] key to return to the previous screen.

Item	Description	
Job Name	When the job name in Job Name is displayed in a short form, select [ <b>Detail</b> ] to see the complete job name. Select the [ <b>OK</b> ] key to return to the previous screen.	
Status	Status of job  [Processing]: The status before starting to print.  [Pause]: Pausing print job or error  [Canceling]: Canceling the job  [Waiting]: Waiting Printing  []: The job is finished.	
Job Type	[Printer]:       Printer job         [Report]:       Report/List         [USB]:       Data from removable memory         [Box]:       Job from Document Box	
Accepted Time	Accepted Time of job	
User Name	User Name for the executed job If user login administration is disabled, [] appears.	
Printed Pages	<ul> <li>Number of pages printed</li> <li>Number of copies printed / Total number of copies to be printed</li> </ul>	
Color/B & W	Color mode [Full Color] [Black & White] [Mixed]	

# **Checking Job History**

Check the history of completed jobs.

NOTE

Job history is also available by Embedded Web Server RX or NETWORK PRINT MONITOR from the computer.

- **▶** Embedded Web Server RX User Guide
- NETWORK PRINT MONITOR User Guide

# **Displaying Job History Screen**

# Display the screen.

- 1 While the machine is printing or awaiting printing, select [Status].
- 2 [▲] [▼] key > [Job Status] > [OK] key

# Select the job you want to check.

Select the job you want to check, and the [OK] key or [Detail].

A job result icon is displayed on the extreme right of each job.

- **0**K: The job has been completed.
- An error has occurred.
- ⊕: The job has been canceled.

NOTE

You can show the job log of all users, or only your own job log.

→ Disp. Status/Log (page 8-14)

This setting can also be changed from Embedded Web Server RX.

Embedded Web Server RX User Guide

# Check the job history.

Select the [▶] key to view the next screen. Select the [◄] key to return to the previous screen.

Description	
When the job name in Job Name is displayed in a short form, select [ <b>Detail</b> ] to see the complete job name. Select the [ <b>OK</b> ] key to return to the previous screen.	
Result of job	
[ <b>OK</b> ]: The job has been completed.	
[Error]: An error has occurred.	
[Cancel]: The job has been canceled.	
[Printer]: Printer job	
[Report]: Report/List	
[USB]: Data from removable memory	
[Box]: Job from Document Box	
Accepted time of job	
User Name for the executed job	
If user login administration is disabled, [] appears.	
Number of pages printed	
Number of copies printed / Total number of copies to be printed	
Color mode	
[Color/B & W]	
[Full color]	
[Black & White]	
[Mixed]	

# **NOTE**

If the login user name entry screen appears during operations, log in by referring to the following:

### → Login (page 2-12)

The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

**Login User Name:** 3500 4000 Login Password: 3500 4000

# **Sending the Log History**

You can send the log history by E-mail. You can either send it manually as needed or have it sent automatically whenever a set number of jobs is reached.

→ Send History (page 8-6)

# **Device/Communication**

Configure the devices/lines installed or connected to this machine or check their status.

# Display the screen.

Select [Status], while the machine is printing or awaiting printing.

## Check the status.

Select the items you want to check. Then, select the **[OK]** key to show the status of the selected device.

The items you can check are described below.

### "USB Keyboard"

The status of the optional USB Keyboard is displayed.

### "Network"

The network connection status appears.

### "Option Network"

The connection status of the optional Network Interface Kit is displayed.

### "Wireless Network"

The connection status of the Wireless Network Interface Kit is displayed.

# **Checking the Remaining Amount of Toner and Paper (Paper/Supplies)**

Check the remaining amount of toner, and paper on the message display.

### Display the screen.

To check the toner status, select [**Toner**] while the machine is awaiting printing. If you select [**Paper**], you will return to the paper status screen.

### Check the status.

The items you can check are described below.

### "Toner Status"

The amount of toner remaining is shown in levels.

### "Paper Status"

You can check the paper size and amount of paper remaining in the paper source. The amount of paper remaining is shown in levels.

# 8 Setup and Registration (System Menu)

### This chapter explains the following topics:

System Menu	8-2
Menu Settings	8-3
Report	8-5
Paper Settings	8-7
Print Settings	8-10
Device Common	8-12
User/Job Account	8-17
Network	8-18
Optional Network	8-19
Security	8-22
Op Functions	
Adjust/Maint	

# **System Menu**

Configure settings related to overall machine operation.

Select the [Menu] key to show the settings on the message display. Then, select from the settings displayed.

→ Operation Method (page 2-10)

# NOTE

• In order to change settings that require administer privileges, you must log in with administrator privileges. The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

 Login User Name:
 3500
 4000

 Login Password:
 3500
 4000

• If function default settings have been changed, the [Reset] key can be selected in each function screen to immediately change the settings.

Refer to Menu Settings on the following page and configure as needed.

# **Menu Settings**

This section explains the functions that can be configured in Menu. To configure the settings, select the item in System Menu and select the setting item. For details on each function, see the table below.

Item	Description	Reference Page
Print Report	Configure settings for printing reports and histories.	page 8-5
Job Log History		page 8-6
Counter	This counts the number of pages printed.	page 2-30
Paper Settings	Configure settings for paper.	page 8-7
Print Settings	Configure settings for printing.	page 8-10
Language	Select the language displayed on the message display.	page 8-12
Def. Screen(Box)	Select the screen to be displayed when [Document Box] key is selected.	page 8-12
Buzzer	Set options for buzzer sound during the machine operations.	page 8-12
Error Handling	Select whether to cancel or continue the job when error has occurred.	page 8-13
ColorToner Empty	Select whether printing is prohibited or the Print in Black and White setting is used for printing once the color toner runs out.	page 8-13
TonerAlert Level	Set the amount of remaining toner to notify the administrator when to order a toner when the toner is running low.	page 8-13
USB KeyboardType	Select the type of USB keyboard that you want to use.	page 8-13
Format SSD	Format an optional SSD.	page 8-14
Format SD Card	Format an optional SD/SDHC memory card.	page 8-14
Disp. Status/Log	Set the display method of the Status/Log.	page 8-14
Display Bright.	Set the brightness of the message display.	page 8-12
Date Setting	Configure settings related to the date and time.	page 8-15
Timer Setting	Configure settings related to the time.	page 8-16
RAM Disk Setting	A RAM disk can be created and its size can be set.	page 8-17
User/Job Account	Configures settings related to machine management.  User Login:  —	
	Overview of User Login Administration (page 9-2)	
	Job Accounting:	
	Overview of Job Accounting (page 9-13)	
Network	Configures machine system settings.	page 8-18
Optional Network	Configure settings for the optional Network Interface Kit or Wireless  Network Interface Kit.	
Communication	Specify the network interface card to be used for the send function and the network authentication.	
Security	The security functions can be set up to protect printer operation and the print data.	
I/F Block Set.	This allows you to protect this machine by blocking the interface with external devices such as USB hosts or optional interfaces.	
Security Level	The Security Level setting is primarily a menu option used by service personnel for maintenance work. There is no need for customers to use this menu.	

Item	Description	Reference Page
Restart	Restart the CPU without turning the power switch off. Use this to deal with any unstable operation by the machine. (Same as the computer restart.)	page 8-26
Data Security	Configure settings for data stored in the optional SSD and machine's memory.	
Op Functions	You can use the optional applications installed on this machine.	page 8-25
Adjust/Maint.	Adjust printing quality and conduct machine maintenance.	page 8-26

# **Report**

Print reports to check the machine settings and status.

Default settings for printing the result reports can also be configured.

# **Report Print**

 $[\textbf{Menu}] \ \text{key} > [\blacktriangle] \ [\blacktriangledown] \ \text{key} > [\textbf{Report}] > [\textbf{OK}] \ \text{key} > [\blacktriangle] \ [\blacktriangledown] \ \text{key} > [\textbf{Report Print}] > [\textbf{OK}] \ \text{key}$ 

Item	Description
Menu Map	Prints Menu Map to check the settings of the machine.  Menu Map  Firmware Version
Status Page	Prints the status page, allowing you to check the information including current settings, available memory space, and optional equipment installed.  Status Page
Font List	Prints the font list, allowing you to check the font samples installed in the machine.    Internal Scalable and Bitmapped Fonts List
RAM File List	You can print a list of the files in the RAM disk.  NOTE  This setting is displayed when [RAM Disk Mode] is set to [On].

Item	Description	
SSD File List	You can print a list of the files in the SSD.	
	NOTE	
	Displayed when the optional SSD is installed.	
SD Card FileList	You can print a list of the files in the SD Card.	
	NOTE	
	Displayed when the optional SD Card is installed.	

# **Job Log History**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Report] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Job Log History] > [OK] key

Item	Description	
Send History	You can also send the log history to the specified destinations manually.	
Auto Sending	This function automatically sends the log history to the specified destinations whenever a set number of jobs has been logged.	
	Value	
	Off/On: Off, On	
	Jobs: Set the number of jobs at which the job history is automatically sent. The setting range is 1 to 100.	
	This setting is displayed when [Off/On] is set to [On].	
Destination	Set and check the destination to which log histories are sent.	
	Value	
	Confirmation: Check the destination to which log histories are sent.	
	Address Entry: Set the destination to which log histories are sent. Only E-mail address can be set.	
Subject	Set the subject automatically entered when sending log histories by E-mail.	
	Value: Up to 60 characters	
Personal Info.	Select whether to include personal information in the job log.	
	Value: Include, Exclude	

# **Paper Settings**

[Menu] key > [▲] [▼] key > [Paper Settings] > [OK] key

Configure settings for paper.

Item	Description	
MP Tray Set.	Select the paper size and media type for the multi purpose tray.	
	→ MP Tray Set. (page 8-7)	
Cassette 1 (to 4) Set.	Select the paper size and media type for cassettes 1 to 4.	
	Cassette 1 (to 4) Set. (page 8-8)	
Media Type Set.	Select weight for each media type.	
	For Custom 1-8, settings for duplex printing and media type name can be changed.	
	→ Media Type Setting (page 8-9)	
Reset Type Adj.	Resets the attribute settings of all media types set in "Media Type Set".	
	→ Media Type Set. (page 8-7)	

# MP Tray Set.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Paper Settings] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [MP Tray Set.] > [OK] key Select paper size and media type for the multi purpose tray.

Item	Description	
Paper Size	Available options are as follows:  Values: Envelope Monarch, Envelope #10, Envelope DL, Envelope C5, Executive, Letter, Legal, A4, B5, A5, A6, B6, Envelope #9, Envelope #6, ISO B5, Custom, Hagaki (Cardstock), Oufuku Hagaki (Return postcard), Oficio II, 216 × 340 mm, 16K, Statement, Folio, Youkei 2, Youkei 4	
Media Type <sup>*1</sup>	Select the media type.  Values: Plain (60 - 105 g/m²), Transparency, Preprinted, Labels, Bond, Recycled, Vellum (60 - 105 g/m²), Rough, Letterhead, Color, Prepunched, Envelope, Cardstock, Coated, Thick (106 - 220 g/m²), High Quality, Custom 1 - 8	

<sup>\*1</sup> To change to a media type other than "Plain".

<sup>→</sup> Media Type Setting (page 8-9)

# Cassette 1 (to 4) Set.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Paper Settings] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Cassette 1 (to 4) Set.] > [OK] key Select paper size and media type for Cassettes 1 to 4.

Item	Description	
Media Type <sup>*1</sup>	Select the media type.  Values  Cassette 1: Plain (60 - 105 g/m²), Preprinted, Bond, Recycled, Vellum (60 - 105 g/m²), Rough, Letterhead, Color, Prepunched, Thick (106 - 163 g/m²), High Quality, CUSTOM 1 - 8  Cassette 2 to 4: Plain (60 - 105 g/m²), Preprinted, Labels, Bond, Recycled, Vellum (60 - 105 g/m²), Rough, Letterhead, Color, Prepunched, Envelope, Coated, Thick (106 - 220 g/m²), High Quality, CUSTOM 1 - 8	
Other Paper Size	Available options are as follows:  Values  Cassette 1: Executive, Letter, Legal, A4, B5, A5, A6, B6, ISO B5, Custom, Oficio II, 216 × 340 mm, 16K, Statement, Folio  Cassette 2 to 4: Envelope Monarch, Envelope #10, Envelope DL, Envelope C5, Executive, Letter, Legal, A4, B5, A5, B6, Envelope #9, Envelope #6, ISO B5, Custom, Oficio II, 216 × 340 mm, 16K, Statement, Folio, Youkei 2, Youkei 4	
Custom PaperSize*2	Register the custom paper size to be used in Cassettes 1 to 4.  Values  Cassette 1:  Metric  X: 105 to 216 mm (in 1 mm increments) Y: 148 to 356 mm (in 1 mm increments) Inch  X: 4.13 to 8.50" (in 0.01" increments) Y: 5.83 to 14.02" (in 0.01" increments) Cassette 2 to 4:  Metric  X: 92 to 216 mm (in 1 mm increments) Y: 162 to 356 mm (in 1 mm increments) Inch  X: 3.62 to 8.50" (in 0.01" increments) Y: 6.38 to 14.02" (in 0.01" increments  X=Length, Y=Width  Vertical	

<sup>\*1</sup> To change to a media type other than "Plain".

When a paper weight that cannot be loaded in the cassette is set for a media type, that media type does not appear.

<sup>→</sup> Media Type Setting (page 8-9)

<sup>\*2</sup> Appears when [Custom] is selected in Other Paper Size.

# **Media Type Setting**

The following media type and paper weight combinations are available.

Paper Weight	Weight (g/m²)	Paper Weight	Weight (g/m²)
Light	52 g/m² to 59 g/m²	Heavy 1	106 g/m² to 135 g/m²
Normal 1	60 g/m² to 74 g/m²	Heavy 2	136 g/m² to 163 g/m²
Normal 2	75 g/m² to 90 g/m²	Heavy 3	164 g/m² to 220 g/m²
Normal 3	91 g/m² to 105 g/m²	Extra Heavy	Transparencies

Each media type's default weight is indicated.

Media Type	Default	Media Type	Default
Plain	Normal 2	Cardstock	Heavy 1
Transparency	Extra Heavy	Color	Normal 2
Rough	Normal 3	Prepunched	Normal 2
Vellum	Normal 1	Letterhead	Normal 2
Labels	Heavy 1	Envelope	Heavy 2
Recycled	Normal 2	Thick	Heavy 2
Preprinted	Normal 2	High Quality	Normal 2
Bond	Normal 3	Coated	Heavy 1
		Custom 1 - 8	Normal 2

For Custom 1-8, settings for duplex printing and media type name can be changed.

Ite	em	Description	
Duplex	Permit	Duplex printing allowed.	
	Prohibit	Duplex printing not allowed.	
Name Entry		Change names for Custom 1-8. Names should be not more than 16 characters. Selecting media type at multi purpose tray, the name after change will be displayed.	
		→ Character Entry Method (page 11-10)	

# **Print Settings**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Print Settings] > [OK] key

Configure settings for printing.

Item	Description	
Paper Source	Select the default paper source from Cassette 1-4 and multi purpose tray.  Values: MP Tray, Cassette 1 to 4	
	NOTE	
	[Cassette 2] to [Cassette 4] are shown when the optional paper feeder is installed.	
Auto Cass.Change	Select the following actions when the paper runs out in the paper source while printing.  Values: Off, On	
	NOTE	
	When selecting [ <b>Off</b> ], the machine displays "Add the following paper in cassette #." (# is a cassette number), or "Load paper in MP tray." and stops printing.	
	Load the paper according to the paper source displayed to resume printing.	
	To print from the other paper cassette, select [Alt.]. Select the desired paper source, and then select the [OK] key.	
	When selecting [ <b>On</b> ], the machine continues printing automatically when the other cassette contains the same paper as the currently-used cassette.	
MP Tray Priority	If paper is set in the MP Tray then it is possible for priority to be given to that MP tray in the paper feed.	
	Values	
	Off: The printer driver settings are followed.	
	Auto Feed: If Auto is selected in the printer driver and there is paper in the MP tray then the paper feed will be from the MP tray.	
	Always: If there is paper in the MP tray then the paper feed will be from the MP tray regardless of what is set in the printer driver.	
Paper Feed Mode	While printing from the computer, select how to feed paper when the paper source and type are specified.	
	Values	
	Auto: Search the paper source that matches the selected paper size and type.  Fixed: Print on paper loaded in the specified paper source.	
Duplex	Select binding orientation for duplex mode.	
	Values: Off, Bind Long Edge, Bind Short Edge	
Override A4/LTR	Select whether to treat A4 size and Letter, which are similar in size, as the same size when printing.	
	Values	
	Off: A4 and Letter are not regarded as the same in size.	
	On: A4 and Letter are regarded as the same in size. The machine will use whichever size is in the paper source.	
Emulation Set.	_	
Emulation	Select the emulation for operating this machine by commands oriented to other types of printers.	
	Values: PCL6, KPDL, KPDL(Auto)	
KPDL Error Rpt.	When you have selected [KPDL] or [KPDL (Auto)], set "KPDL Error Report".  Values: Off, On	
Color Mode	You can choose whether reports are printed in color or black and white.	

Item		<b>Description</b>
Print	Quality	Set the Print Quality.
	EcoPrint	EcoPrint conserves toner when printing. This is recommended for test copies where faded printing is not a problem.  Values: Off, On
	Gloss Mode	Gloss Mode increases the effect of glossiness in printing. However, printing takes longer time.  Values: Off, On
		<b>⊘</b> IMPORTANT
		Gloss Mode is not available when [Labels] or [Transparency] is selected as the paper type setting.
		→ Cassette 1 (to 4) Set. (page 8-8) MP Tray Set. (page 8-7)
		Depending on the paper used, printing in gloss mode may cause curl in paper.  To reduce curl, try using thicker paper.
Page	Setting	You can set print preferences such as the number of pages and print orientation.
	Copies	Set the default number of copies, from 1 to 999.  Value: 1 to 999 copies
	Orientation	You can select portrait (upright) or landscape (sideways) page orientation.  Value: Portrait, Landscape
	Wide A4	Turn this to on to increase the maximum number of characters that can be printed in a line for an A4 page (78 characters at 10 pitch) and Letter size page (80 characters at 10 pitch). This setting is only effective in PCL 6 emulation.  Value: Off, On
	XPS FitTo Page	Set the default value for the XPS fit to page function.  Value: Off, On
	TIFF/JPEG Size	Select the image size (resolution) when printing JPEG or TIFF file.  Value: Paper Size, Image Resolution, Print Resolution
User Name		Set whether the user name set in the printer driver is displayed.  Value: Off, On
Job Name		Set whether the job name set in the printer driver is displayed.
		Value: Off, Job Name, Job No.+Job Name, Job Name+Job No.

# **Device Common**

Configures overall machine operation.

# Language

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Device Common] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Language] > [OK] key

Item	Description
Language	Select the language displayed on the message display.

# Def. Screen(Box)

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Device Common] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Def. Screen(Box)] > [OK] key

Item	Description
Def. Screen(Box)	Select the screen to be displayed when [Document Box] key is selected.
	Value: Custom Box, Job Box

## **Buzzer**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Device Common] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Buzzer] > [OK] key Set options for buzzer sound during the machine operations.

Item	Description
Key Confirmation	Emit a sound when a key is selected on the operation panel.  Value: Off, On
Job Finish	Emit a sound when a print job is normally completed.  Value: Off, On
Ready	Emit a sound when the warm-up is completed.  Value: Off, On
Warning	Emit a sound when errors occur.  Value: Off, On
Keyboard Confirm	Emit a sound when a key on the optional USB keyboard is selected.  Value: Off, On

# **Display Bright. (Display Brightness)**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Device Common] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Display Bright.] > [OK] key

Item	Description
Display Bright.	Set the brightness of the message display.
	Value: Darker -2, Darker -1, Normal 0, Lighter +1, Lighter +2

# **Error Handling**

 $[\mathbf{Menu}] \ \text{key} > [\blacktriangle] \ [\blacktriangledown] \ \text{key} > [\mathbf{Device} \ \mathbf{Common}] > [\mathbf{OK}] \ \text{key} > [\blacktriangle] \ [\blacktriangledown] \ \text{key} > [\mathbf{Error} \ \mathbf{Handling}] > [\mathbf{OK}] \ \text{key} > [\blacksquare]$ 

Select whether to cancel or continue the job when error has occurred.

Item	Description
DuplexPaperError	Select what to do when duplex printing is not possible for the selected paper size and media type.  Value  1-sided: Printed in 1-sided  Display Error: Message to cancel printing is displayed.
Paper Mismatch	Select what to do when the selected paper size or type does not match paper size or type loaded in the specified paper source while printing from the computer by specifying the cassette or multi-purpose tray.  Value  Continue: The setting is ignored and the job is printed.  Display Error: Message to cancel printing is displayed.
MP Tray Empty	Turn this setting to [On] if you want the error displayed when the MP tray is configured as the default paper source, and there is no paper in the MP tray, or turn it to [Off] not to have the error displayed.  Value: Off, On

# **ColorToner Empty**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Device Common] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [ColorToner Empty] > [OK] key

Item	Description
ColorToner Empty	Select whether printing is prohibited or the Print in Black and White setting is used for printing once the color toner runs out.
	Value: Stop printing, Print in B & W

# **TonerAlert Level**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Device Common] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [TonerAlert Level] > [OK] key

Item	Description
TonerAlert Level	Set the amount of remaining toner to notify the administrator when to order a toner when the toner is running low.  Value: Off, On
	TonerAlert Level: Set the toner level for notification of low toner.
	The setting range is 5 to 100% (in 5% increments). Displayed when [Off/On] is set to [On].
	NOTE
	Selecting [Off] alerts you low toner when the amount of remaining toner becomes 5%.

# **USB KeyboardType**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Device Common] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [USB KeyboardType] > [OK] key

Item	Description
USB KeyboardType	Select the type of USB keyboard that you want to use.
	Value: US, Europe US, France, Germany

## **Format SSD**

[Menu] key > [▲] [▼] key > [Device Common] > [OK] key > [▲] [▼] key > [Format SSD] > [OK] key

Format an optional SSD.

When an optional SSD is inserted into the printer for the first time, it must be formatted before use.

# **IMPORTANT**

Formatting will destroy any existing data on a storage device including a used SSD.

This function will not be displayed when the optional Data Security Kit is installed.

## **Format SD Card**

[Menu] key > [▲] [▼] key > [Device Common] > [OK] key > [▲] [▼] key > [Format SD Card] > [OK] key

Format an optional SD/SDHC memory card.

A new SD card must be formatted before it can be used in the machine.

## **IMPORTANT**

- Formatting will destroy any existing data on a storage device including a used SD card.
- If you have installed application, do not format the SD card to avoid the removal of the application in the SD card.

# Disp. Status/Log

[Menu] key > [▲] [▼] key > [Device Common] > [OK] key > [▲] [▼] key > [Disp. Status/Log] > [OK] key

	Item	Description
Disp.	Status/Log	Set the display method of the Status/Log.
	JobsDetailStatus	Value: Show All, My Jobs Only, Hide All
	Jobs Log	Value: Show All, My Jobs Only, Hide All

# **Date Setting**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Device Common] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Date Setting] > [OK] key Configure settings related to the date and time.

Item	Description
Date	Set the date for the location where you use the machine.  Value: Year (2000 to 2037), Month (01 to 12), Day (01 to 31)  Setting Date and Time (page 2-14)  NOTE  If you change the date while using the trial version of an application, you will no longer be able to use the application.
Time	Set the date and time for the location where you use the machine.  Value: Hour (00 to 23), Minute (00 to 59), Second (00 to 59)  Setting Date and Time (page 2-14)  NOTE  If you change the time while using the trial version of an application, you will no longer be able to use the application.
Date Format	Select the display format of year, month, and date. The year is displayed in Western notation.  Value: Month/Day/Year, Day/Month/Year, Year/Month/Day
Time Zone Summer Time	Set the time difference from GMT. Choose the nearest listed location from the list. If you select a region that utilizes summer time, configure settings for summer time.  Setting Date and Time (page 2-14)

# **Timer Setting**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Device Common] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Timer Setting] > [OK] key Configure settings related to the time.

Item	Description
Auto Panel Reset	If no jobs are run for a certain period of time, automatically reset settings and return to the default setting. Select to use Auto Panel Reset or not.  Value: Off, On
	NOTE
	The time allowed to elapse before the panel is reset is set with the "PanelReset TimerPanel Reset Timer".
	► PanelReset Timer (page 8-16)
PanelReset Timer	If you select [On] for Auto Panel Reset, set the amount of time to wait before Auto Panel Reset.  Value: 5 to 495 seconds (in 5 second increments)
	NOTE
	This function is displayed when [Auto Panel Reset] is set to [On].
Sleep Level Set.	-
Sleep Level (models except for Europe)	Select the Sleep level.  Set the Energy Saver mode to reduce power consumption even more than Quick Recovery mode.
	Value: Quick Recovery, Energy Saver
	NOTE
	When the optional Network Interface Kit is installed, this is not displayed.
Status	Set whether to use the Energy Saver mode for the following functions individually:  Network  Card Reader*1
	Value: Off, On
	NOTE
	When the machine enters Energy Saver, the ID card cannot be recognized.
Sleep Timer	Set amount of time before entering Sleep.
	Value
	For Europe
	1 to 120 minutes (1 minute increments)  Except for Europe
	1 to 240 minutes (1 minute increments)
	▶ Sleep and Auto Sleep (page 2-18)
Auto Err. Clear	If an error occurs during processing, processing stops to wait for the next step to be taken by the user. In the Auto Error Clear mode, automatically clear the error after a set amount of time elapses.
	Value: Off, On
Err. Clear Timer	If you select [ <b>On</b> ] for Auto Error Clear, set the amount of time to wait before automatically clearing errors.
	Value: 5 to 495 seconds (in 5 second increments)
	NOTE
	This function is displayed when [Auto Err. Clear] is set to [On].

Item	Description
FormFeed TimeOut	Receiving print data from the computer, the machine may sometimes wait if there is no information signaling that the last page does not have any more data to be printed. When the preset timeout passes, the machine automatically prints paper. The options are between 5 and 495 seconds.  Value: 5 to 495 seconds (in 5 second increments)
Ping Timeout	Set the time until timeout occurs when [Ping] is executed in "Network".  Value: 1 to 30 seconds (in 1 second increments)

<sup>\*1</sup> Displayed only when the optional Card Authentication Kit is activated.

# **RAM Disk Setting**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Device Common] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [RAM Disk Setting] > [OK] key

This function will not be displayed when the optional SSD is installed.

Item	Description
RAM Disk Setting	A RAM disk can be created and its size can be set.
	Creating a RAM disk makes it possible to print from a Job Box.
	Value
	RAM Disk Mode: Off, On
	RAM Disk Size: The setting range varies depending on the amount of memory installed and the option memory usage setting.

# **IMPORTANT**

After changing the setting, restart the network or turn the machine OFF and then ON.

# **User/Job Account**

[Menu] key > [▲] [▼] key > [User/Job Account] > [OK] key

Configure settings related to machine management.

 Overview of User Login Administration (page 9-2) Overview of Job Accounting (page 9-13) Unknown ID Job (page 9-25)

# **Network**

Configures machine system settings.

# **TCP/IP Settings**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Network] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [TCP/IP Settings] > [OK] key Configures TCP/IP settings.

	Item	Description
TCP/I	Р	Set up TCP/IP to connect to the Windows network.  Value: Off, On
IPv4	Setting	Set up TCP/IP (IPv4) to connect to the network. This setting is available when [ <b>TCP/IP</b> ] is set to [ <b>On</b> ].
	DHCP	Select whether or not to use the DHCP (IPv4) server.  Value: Off, On
	Auto-IP	Select whether to use Auto-IP.  Value: Off, On
	IP Address	Set the IP addresses.  Value: ###.###.###  NOTE  If DHCP is set to [On], this item is displayed only and cannot be entered.
	Subnet Mask	Set the IP subnet masks.  Value: ###.###.###  NOTE  If DHCP is set to [On], this item is displayed only and cannot be entered.
	Default Gateway	Set the IP gateway addresses.  Value: ###.###.###  NOTE  If DHCP is set to [On], this item is displayed only and cannot be entered.
	Bonjour	Select whether or not to use Bonjour.  Value: Off, On
IPv6	Setting	Set up TCP/IP (IPv6) to connect to the network. This setting is available when [TCP/IP] is [On].
	TCP/IP(IPv6)	Select whether or not to use IPv6.  Value: Off, On
	RA (Stateless)	Select whether to use RA (Stateless).  Value: Off, On  NOTE  This setting is displayed when [TCP/IP (IPv6)] is set to [On].
	DHCPv6	Select whether to use the DHCP (IPv6) server.  Value: Off, On
		NOTE This setting is displayed when [TCP/IP (IPv6)] is set to [On].

**⊘** IMPORTANT

After changing the setting, restart the network or turn the machine OFF and then ON.

	Item	Description
Protoco	ol Detail	_
N	NetBEUI	Selects whether or not to receive documents using NetBEUI.*1  Value: Off, On
L	.PD	Select whether or not to receive documents using LPD.*1  Value: Off, On
S	6MTP	Select whether or not to send e-mail using SMTP.  Value: Off, On
F	POP3	Select whether or not to receive e-mail using POP3.  Value: Off, On
F	TP(Server)	Select whether or not to receive documents using FTP.*1  Value: Off, On
L	DAP	Select whether or not to use LDAP.  Value: Off, On
S	SNMP	Select whether or not to communicate using SNMP.*1  Value: Off, On
S	SNMPv3	Select whether or not to communicate using SNMPv3.*1  Value: Off, On
F	ITTP	Select whether or not to communicate using HTTP.*1  Value: Off, On
F	RAW Port	Select whether or not to receive documents using RAW Port.*1  Value: Off, On

<sup>\*1</sup> The setting will be changed after restarting the device or the network for the machine.

# **Ping**

[Menu] key > [▲] [▼] key > [Network] > [OK] key > [▲] [▼] key > [Ping] > [OK] key

Item	Description
Ping	Checks if communication with the destination by entering the host name or IP address of the destination is possible.
	NOTE
	If [Communication] is set to [Option NIC], this item is not displayed.

## **Restart Network**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Network] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Restart Network] > [OK] key

Item	Description
Restart Network	Restarts the network.

# **Optional Network**

Configure settings for the optional Network Interface Kit or Wireless Network Interface Kit.

# NOTE

This menu is displayed when the optional Network Interface Kit or Wireless Network Interface Kit is installed.

# **Basic**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Optional Network] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Basic] > [OK] key

Item	Description
TCP/IP Settings	For details on setting value.
	→ TCP/IP Settings (page 8-18)
NetWare	Use NetWare to receive documents.
	Value: Off, On
AppleTalk	Selects whether to receive documents using AppleTalk.*1
	Value: Off, On
IPSec	Select whether to use IPSec.
	Value: Off, On
LAN Interface	Select the LAN Interface type.*1
	Value: Auto, 10BASE-Half, 10BASE-Full, 100BASE-Half, 100BASE-Full, 1000BASE-T
	This function is displayed when the optional Network Interface Kit is installed.
MACAddressFilter	Select whether to use MAC Address Filter.
	→ Operation Guide for the optional Network Interface Kit
	Value: Off, On
Restart Network	Restarts the network card of the device.

<sup>\*1</sup> The setting will be changed after restarting the device or network.

# **Wireless Network**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Optional Network] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Wireless Network] > [OK] key

This function is displayed when the optional Wireless Network Interface Kit is installed.

	Item	Description
Conn	ectionStatus	When the optional Wireless Network Interface Kit is installed, you can check the wireless LAN status.
Quick Setup		If the machine will connect to an access point that supports the automatic wireless network setup, connection settings can be configured by Quick Setup.
	AvailableNetwork	Displays access points to which the machine can connect.
	Push Button	If the access point supports the push button method, wireless settings can be configured using the push button. This setting executes push button, and the connection is started by pressing the push button on the access point.
		NOTE
		The push button method supports only the WPS.
	PIN (Device)	Starts connection using the machine's PIN code. Enter the PIN code into the access point. The PIN code of the machine is automatically generated.
	PIN (Terminal)	Starts connection using the PIN code of the access point. Enter the PIN code of the access point.

	Item	Description
Custo	om Setup	The detailed settings for wireless LAN can be changed. You can check the connection with a wireless network by selecting [Connect].
	Netwk Name(SSID)	Set the SSID (Service Set Identifier) of the wireless LAN to which the machine connects.
		NOTE
		Up to 32 characters can be entered.
	Connection Mode	Set the connection mode.
		Value: Ad Hoc, Infrastructure
		NOTE
		Ad Hoc: Directly communicates with the device without going through an access point. This method cannot be used to connect to two or more devices.
		Infrastructure: Performs communication through an access point.
	Channel	Set channel. Use [▲] or [▼] or the numeric keys to enter a number.  Value: 1 to 11
		33333
	Netwk Authentic.	Select network authentication type. To select other options, open the device home page from a computer.
		Value: Open, Shared, WPA-PSK*1, WPA2-PSK*1
	Encryption	Select encryption settings. The setting values vary depending on the "Netwk Authentic." setting.
	Data Encryption	Set the encryption method.
		When "Netwk Authentic." is set to [Open] or [Shared]: Value: Disable, WEP
		·
		When "Netwk Authentic." is set to [WPA-PSK] or [WPA2-PSK]: Value: TKIP*2, AES, Auto*2
	WEP Key	Register the WEP key. Select [Edit] and Enter the WEP Key using the numeric keys.
		NOTE
		Up to 26 characters can be entered.
		→ Character Entry Method (page 11-10)
	Preshared Key <sup>*3</sup>	Register the Preshared Key. Select [ <b>Edit</b> ] and Enter the Preshared Key using the numeric keys.
		NOTE
		The number of characters is between 8 and 64.
		→ Character Entry Method (page 11-10)

- \*1 Not displayed if you selected [Ad Hoc] for "Connection Mode".
- \*2 Not displayed if you selected [WPA2-PSK] for "Netwk Authentic.".
- \*3 Displayed if you selected [WPA-PSK] or [WPA2-PSK] for "Netwk Authentic.".

# Communication

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Optional Network] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Communication] > [OK] key

This function is displayed when the optional Network Interface Kit or Wireless Network Interface Kit is installed.

Item	Description
Communication	Specify the network interface card to be used for the send function and the network authentication.  Value: Standard NIC, Option NIC

# **Security**

The security functions can be set up to protect printer operation and the print data.

# **Network Security**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Security] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Network Security] > [OK] key

#### **WSD-PRINT**

Item	Description
WSD-PRINT	Set whether to use our proprietary web services.*1
	Value: Off, On

<sup>\*1</sup> The setting will be changed after restarting the device or the network for the machine.

After changing the setting, restart the network or turn the machine OFF and then ON.

# **Enhanced WSD**

Item	Description
Enhanced WSD	Set whether to use our proprietary web services.*1  Value: Off, On

<sup>\*1</sup> The setting will be changed after restarting the device or the network for the machine.

## EnhancedWSD(SSL)

Item	Description
EnhancedWSD(SSL)	Set whether to use our proprietary web services over SSL.*1 *2 Value: Off, On

<sup>\*1</sup> The setting will be changed after restarting the device or the network for the machine.

#### **IPP**

Item	Description
IPP	Select whether or not to communicate using IPP.*1 *2
	Value: Off, On

<sup>\*1</sup> The setting will be changed after restarting the device or the network for the machine.

<sup>\*2</sup> Set "SSL" to [On] in "SSL Setting".

<sup>→</sup> SSL Setting (page 8-23)

<sup>\*2</sup> Set "SSL" to [On] in "SSL Setting".

<sup>◆</sup> SSL Setting (page 8-23)

## **SSL Setting**

Item	Description
SSL	Select the SSL server settings.
	Value
	Off/On: Off, On
	Encryption: AES, DES, 3DES
	This setting is displayed when [Off/On] is set to [On].
IPP over SSL	Select whether or not to use IPP over SSL.
	Value: Off, On
	NOTE
	When selecting [On], the certificates must be installed.
	→ Embedded Web Server RX User Guide
HTTPS	Select whether or not to communicate using HTTPS.*1 *2
	Value: Off, On

<sup>\*1</sup> The setting will be changed after restarting the device or the network for the machine.

#### **IPSec**

Item	Description
IPSec	Make this setting when you use IPSec.
	Value: Off, On

# **ThinPrint**

Item	Description
ThinPrint	Select whether to use ThinPrint.*1 *2
	Value
	Off/On: Off, On
	ThinPrint over SSL: Off, On To use Thin Print over SSL, select [Thin Print over SSL] and select [On].
	NOTE
	This function is displayed only when the optional ThinPrint Option is activated.
	When selecting [On] in "ThinPrint over SSL", the certificates must be installed.
	<b>▶</b> Embedded Web Server RX User Guide

<sup>\*1</sup> The setting will be changed after restarting the device or the network for the machine.

<sup>→</sup> SSL Setting (page 8-23)

After changing the setting, restart the network or turn the machine OFF and then ON.

<sup>\*2</sup> Set "SSL" to [**On**] in "SSL Setting".

SSL Setting (page 8-23)

<sup>\*2</sup> Set "SSL" to [On] in "SSL Setting".

## **LAN Interface**

Item	Description	
LAN Interface	Specify the settings for the LAN interface to be used.	
	Value: Auto, 10BASE-Half, 10BASE-Full, 100BASE-Half, 100BASE-Full, 1000BASE-T	

# I/F Block Set.

 $[\textbf{Menu}] \ \text{key} > [\blacktriangle] \ [\blacktriangledown] \ \text{key} > [\textbf{Security}] > [\textbf{OK}] \ \text{key} > [\blacktriangle] \ [\blacktriangledown] \ \text{key} > [\textbf{I/F Block Set.}] > [\textbf{OK}] \ \text{key} > [\blacksquare] \ [\blacktriangledown] \ \text{key} > [\blacksquare] \ [\blacksquare] \ [\blacksquare] \ \text{key} > [\blacksquare] \ [ \ [] \ [\square] \ [\ \square] \ [\ [] \ [\$ 

This allows you to protect this machine by blocking the interface with external devices such as USB hosts or optional interfaces.

Item	Description
USB Host	This locks and protects the USB port (USB host).
	Value: Unblock, Block
USB Device	This locks and protects the USB interface connector (USB Device).
	Value: Unblock, Block
Option I/F	This locks and protects the optional interface slots.
	Value: Unblock, Block
USB Storage	This locks and protects the USB memory slot.
	Value: Unblock, Block
	NOTE
	This function is available when USB Host is set to [Unblock].

After changing the setting, restart the network or turn the machine OFF and then ON.

# **Security Level**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Security] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Security Level] > [OK] key

Item	Description	
Security Level	Specify the security level.  Value	
	High: This is the security setting we recommend. Use this setting normally.  Low: This mode is used during maintenance. Do not use normally.  Very High: In addition to [High] setting, this setting disables the machine settings to be changed from external command.	

# **Data Security**

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Security] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Data Security] > [OK] key

Configure settings for data stored in the optional SSD and machine's memory.

Item	Description
SSD Initializ.	Initialize data saved on an optional SSD.
	→ Data Security Kit (E) Operation Guide
	NOTE
	This function is displayed when the optional SSD is installed and the optional Data Security Kit is activated.
DataSanitization	Return the following information registered in the machine to the factory defaults.  • System settings
	Data saved in Custom Box
	Optional applications
	Data saved in an application or SD card cannot be erased. To erase data on an SD card, you must format the SD card.
	Format SD Card (page 8-14)
	NOTE
	Once in progress, the processing cannot canceled.
	Before executing this function, disconnect modular, network, and other cables.
	Do not turn off the main power switch while sanitizing the data. If the main power is turned off during data erasing, erasing will be executed automatically when the power is restored, however, complete erasure cannot be guaranteed.

# **Op Functions**

[Menu] key > [▲] [▼] key > [Op Functions] > [OK] key

Item	Description	
Op Functions	You can use the optional applications installed on this machine.	
	Optional Applications (page 11-8)	

# Adjust/Maint.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Adjust/Maint.] > [OK] key

Adjust printing quality and conduct machine maintenance.

	Item	Description	
Quiet M	ode	Lower print speed for quiet processing.	
	Quiet Mode	Set the Quiet Mode. Select this mode when the running noise is uncomfortable.  Value: Off, On	
	Each Job	It is possible to set the use of Quiet Mode for each job. Set whether or not to permit the setting for each job.  Value: Permit, Prohibit	
ColorCalibration		This machine contains a calibration function that automatically makes adjustments to compensate for changes that occur over time due to variations in the ambient temperature and humidity. This function can be used for fine adjustment of tone and color drift to print in the optimum color.  ColorCalibration (page 10-20)  If color tone does not improve or color drift does not improve after executing this color adjustment, refer to the following:  Color Registration Procedure (page 10-20)	
		When first installing the machine or moving it to a new location, color drift during printing may occur. Use this function to correct the color position of each of cyan, magenta and yellow to resolve color drift.  Color Registration Procedure (page 10-20)	
		Restart the CPU without turning the power switch off. Use this to deal with any unstable operation by the machine. (Same as the computer restart.)	
Service Setting  Settings for machine maintenance and inspection. This menu is primarily used I technicians to perform maintenance.		Settings for machine maintenance and inspection. This menu is primarily used by service technicians to perform maintenance.	

# 9 User Authentication and Accounting (User Login, Job Accounting)

## This chapter explains the following topics:

Overview of User Login Administration	9-2
Enabling User Login Administration	9-3
Setting User Login Administration	9-5
Adding a User (Local User List)	9-5
Changing User Properties	9-6
User Login Administration for Printing	
NW User Property (Obtain Network User Property)	9-10
ID Card Settings	
Using User Login Administration	
Login/Logout	9-12
Overview of Job Accounting	9-13
Enabling Job Accounting	9-14
Job Accounting Access	9-15
Setting an Account	9-16
Adding an Account	9-16
Restricting the Use of the Machine	9-17
Editing an Account	9-18
Deleting an Account	9-19
Job Accounting for Printing	9-20
Configuring Job Accounting	9-21
Apply Limit	9-21
Counting the Number of Pages Printed	9-22
Print Accounting Report	9-23
Using Job Accounting	9-24
Login/Logout	9-24
Unknown ID Joh	9-25

# **Overview of User Login Administration**

User login administration specifies how the user access is administered on this machine. Enter a correct login user name and password for user authentication to login.

(page 9-5)

- 1 Enable User Login Set the user Administration (page 9-3)
- 3 Enter the login user name and password and execute the job (page 9-12)

Access are in three levels - "User", "Administrator", and "Machine Administrator". The security levels can be modified only by the "Machine Administrator".

# To manage the job account from PC

In addition to the above settings, the following are necessary to manage the job account from PC.

#### To Manage the Users to Print from PCs

Printer driver settings are necessary to manage the users that print on the machine from PCs.

1 Set the User Login Administration on the printer driver (page 9-8)

Print

# **Enabling User Login Administration**

This enables user login administration.

# Display the screen.

1 [Menu] key > [▲] [▼] key > [User/Job Account] > [OK] key

NOTE

If the login user name entry screen appears during operations, enter a login user name and password, and select [**Login**]. For this, you need to login with administrator privileges.

The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

Login User Name: 3500 4000

Login Password: 3500 4000

2 [▲] [▼] key > [User Login Set.] > [OK] key

# Configure the settings.

1 [▲] [▼] key > [User Login] > [OK] key > [▲] [▼] key > [Login Type] > [OK] key > [▲] [▼] key > [Netwk Authentic.] > [OK] key

**NOTE** 

Select [Off] to disable user login administration.

- 2 [▲] [▼] key > [Netwk Auth. Set.] > [OK] key > [▲] [▼] key > [Server Type.] > [OK] key > [▲] [▼] key > [NTLM], [Kerberos] or [Ext.] > [OK] key > [▲] [▼] key > [Host Name] > [OK] key
- **3** Enter the host name (64 characters or less) for the Authentication Server and select the **[OK]** key.
- Select the domain name for the Authentication Server, and select the [OK] key.

If the domain has not been set, select the number where "-----" is displayed and select [**Menu**]. Select [**Edit**] and select the [**OK**] key then enter the domain name (in 256 characters or less). Select the [**OK**] key and the domain will be registered.

To edit or delete a domain name that has already been registered, select that domain name and select [Menu].

NOTE

Up to 10 domain names can be registered.

5 When selecting [Ext.] as the server type, select [▲] [▼] key > [Port] > [OK] key.

6 Enter the port number and select the [OK] key.

# **NOTE**

If the login user name and password are rejected, check the following settings.

- · Network Authentication setting of the machine
- · User property of the Authentication Server
- · Date and time setting of the machine and the Authentication Server

If you cannot login because of the setting of the machine, login with any administrator registered in the local user list and correct the settings.

# **Setting User Login Administration**

This registers, alters and deletes users and configures the settings for User Login Administration.

# Adding a User (Local User List)

Use aQrate to register new users.

#### aQrate Install Manual

#### **NOTE**

By default, one of each default user with machine administrator rights and administrator privileges is already stored. Each user's properties are:

#### **Machine Administrator**

User Name: DeviceAdmin

Login User Name: P-C3560DN: 3500 P-C4070DN: 4000 Login Password: P-C3560DN: 3500 P-C4070DN: 4000

Access Level: Machine Administrator

#### **Administrator**

User Name: Admin Login User Name: Admin Login Password: Admin

Administrator Access Level:

It is recommended to periodically change the user name, login user name and login password regularly for your security.

<sup>\*</sup> Upper case and lower case letters are distinguished (case sensitive).

# **Changing User Properties**

User properties can be changed. The information that can be changed is the "Login User Name" and "Login Password".

To change the user information of the machine administrator, you must log in with machine administrator authority. You can only view user information if you log in as a regular user.

The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

4000 **Login User Name:** 3500 4000 **Login Password:** 3500

# Display the screen.

1 [Menu] key > [▲] [▼] key > [User/Job Account] > [OK] key

## NOTE

If the login user name entry screen appears during operations, enter a login user name and password, and select [Login]. For this, you need to login with administrator privileges.

The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

Login User Name: 3500 4000 Login Password: 3500 4000

2 [▲] [▼] key > [User Login Set.] > [OK] key > [▲] [▼] key > [Local User List] > [OK] key

# Change the user properties.

#### Changing user properties

- 1 Select the user whose properties you wish to change, and the [OK] key.
- Change the user information.

Select "Login User Name" or "Login Password" [Edit], enter the information, and select the [OK] key. Select the [▶] key to view the next screen. Select the [◄] key to return to the previous screen. You can browse through "User Names".

Item	Description
User Name	Displays the name shown on the user list.
Login User Name	Displays the login user name that is entered at login.
Login Password	Changes the password that is entered at login. Up to 64 characters can be entered.

#### NOTE

When the logged in user does not have administrator authority, only the information of that user can be changed.

3 Select the [OK] key.

The user information is changed.

# Deleting a user

To delete a user, use aQrate.

aQrate Install Manual

# **User Login Administration for Printing**

It is possible to manage the users that print on this machine from a PC.

# **Setting Printer Driver**

To manage the users that print on this machine from a PC, the following settings are necessary in the printer driver.

# Display the screen.

1 Click [Start] button on the Windows, and then click [Devices and Printers].

In Windows 8, select [Settings] in charms on Desktop, and select [Control Panel], and then [Devices and Printers].

- 2 Right-click the printer driver icon of the machine, and click the [Printer properties] menu of the printer driver.
- 3 Click [Administrator] on the [Device Settings] tab.

# Configure the settings.

1 Select [User Login] on the [User Login] tab.

2 Set the User Login Administration.

[Use specific name]: This option can be used to specify a user name and password to use the same User login for every print job. If this option is selected, the user does not have to type the name and password for each print job.

[**Prompt for name**]: A screen for entering the user name and password will be displayed when attempting a printing. The user name and password must be entered each time a printing is attempted.

[Prompt for name and validate]: A screen for entering the user name and password will be displayed when attempting a printing. The user name and password stored in the Login user name list needs to be entered. The user name and password must be entered each time a printing is attempted.

[Validate user name (computer) or prompt for login user name]: When printing, the Windows user name is searched in the "Login user names" and printing is possible if the name is registered. If the name is not registered, the printing will be canceled for users with only user authority. If the user has administrator privileges, the screen to enter the user name and password will appear.

3 Click [OK].

NOTE

For other settings of job accounting, refer to the following:

Printing System Driver User Guide

# **NW** User Property (Obtain Network User Property)

Set the required information to obtain the network user property from the LDAP server.

# NOTE

- This setting only appears when the "Login Type" of "User Login" is set to [Netwk Authentic.] and the "Server Type" is set to [NTLM] or [Kerberos].
- **▶** Enabling User Login Administration (page 9-3)
- Setting to obtain network user information is performed from the operation panel. The details of the information to be obtained should be set with Embedded Web Server RX.
- **▶** Embedded Web Server RX User Guide

# Display the screen.

1 [Menu] key > [▲] [▼] key > [User/Job Account] > [OK] key

# **NOTE**

If the login user name entry screen appears during operations, enter a login user name and password, and select [**Login**]. For this, you need to login with administrator privileges.

The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

Login User Name: 3500 4000

Login Password: 3500 4000

2 [▲] [▼] key > [User Login Set.] > [OK] key

# Configure the settings.

[▲] [▼] key > [NW User Property] > [OK] key

The setting items are as follows.

Item	Descriptions
Off/On	Set whether or not network user information is acquired.  Value: Off, On
Authenticat Type	Set the authentication method.  Value: Simple, SASL

# **ID Card Settings**

If ID card authentication is enabled, select the authentication type.

NOTE

This functions appears when the Card Authentication kit is activated.

→ Card Authentication Kit(B) "Card Authentication Kit" (page 11-3)

# Display the screen.

1 [Menu] key > [▲] [▼] key > [User/Job Account] > [OK] key

NOTE

If the login user name entry screen appears during operations, enter a login user name and password, and select [**Login**]. For this, you need to login with administrator privileges.

The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

 Login User Name:
 3500
 4000

 Login Password:
 3500
 4000

2 [▲] [▼] key > [User Login Set.] > [OK] key

# Configure the settings.

[▲] [▼] key > [ID Card Settings] > [OK] key

The following settings can be selected.

Item	Descriptions
Key Login	When ID card authentication is enabled, select whether or not login by keyboard is allowed.  Value: Permit, Prohibit
Additional Auth.*1	Select whether or not to require password entry after authenticating by ID card.  Value: Off, Use Password

<sup>\*1</sup> This function does not appear when the server type is set to **[NTLM]** or **[Kerberos]** in "Network Authentication".

# **Using User Login Administration**

This section explains procedures while setting job accounting.

# Login/Logout

If user login administration is enabled, the login user name and login password entry screen appears each time you use this machine.

Use the procedure below to login and logout.

# Login

If the login user name entry screen appears during operations, log in by referring to the following:

<u>▶ Login (page 2-12)</u>

# Logout

When the operations are complete, select the [Logout] key to return to the login user name and login password entry screen.

# **Overview of Job Accounting**

Job accounting manages the print count accumulated by individual accounts by assigning an ID to each account.

- Enable job accounting. (Refer to page 9-14.)
- Setting an account. (Refer to page 9-16.)
- 3 Enter the assigned account ID when performing the job. (Refer to page 9-12.)
- Count the number of pages printed.

# Configure the settings.

[A] [V] key > [AccountingAccess] > [OK] key > [A] [V] key > [Local] or [Network] > [OK] key

# **Setting an Account**

You can add, change and delete an account and set the restriction for each account.

# **Adding an Account**

Add a new account.

# Display the screen.

1 [Menu] key > [▲] [▼] key > [User/Job Account] > [OK] key

# NOTE

If the login user name entry screen appears during operations, enter a login user name and password, and select [**Login**]. For this, you need to login with administrator privileges.

The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

 Login User Name:
 3500
 4000

 Login Password:
 3500
 4000

2 [▲] [▼] key > [Job Account.Set.] > [OK] key > [▲] [▼] key > [Account. (Local)] > [OK] key > [▲] [▼] key > [Account. List] > [OK] key > [Add]

# Enter the account ID.

Enter the account name > [OK] key

A new account is added on the account list.

Any "Account ID" that has already registered cannot be used. Enter any other account ID.

# **Restricting the Use of the Machine**

This section explains how to restrict the use of the machine by account or the number of sheets available.

## **Restriction Items**

Item	Descriptions
Print Restrict Total	Limits the total number of sheets used for printing.
Print Restrict Full Color	Limits the number of pages used for color printing.

# **Applying Restriction**

Restriction can be applied in the following modes:

Item	Descriptions
Off	No restriction is applied.
Counter Limit	Restricts the print counter in one-page increments up to 9,999,999 copies.
Reject Usage	Restriction is applied.

# **Editing an Account**

This changes the registered account information.

# Display the screen.

1 [Menu] key > [▲] [▼] key > [User/Job Account] > [OK] key

# NOTE

If the login user name entry screen appears during operations, enter a login user name and password, and select [**Login**]. For this, you need to login with administrator privileges.

The factory default login user name and login password are set as shown below.

2 [▲] [▼] key > [Job Account.Set.] > [OK] key > [▲] [▼] key > [Account. (Local)] > [OK] key > [▲] [▼] key > [Account. List] > [OK] key

# Delete an account.

- 1 Select the account you want to delete and [OK] key.
- 2 [▲] [▼] key > [Delete] > [OK] key > [Yes]

The account is deleted.

# **Job Accounting for Printing**

The number of jobs to be printed from the computer can be managed by Job Accounting.

# **Setting Printer Driver**

To manage the number of jobs to be printed from the PC on the network, you need configure the following settings by using the printer driver on the PC.

# Display the screen.

1 Click [Start] button on the Windows, and then click [Devices and Printers].

#### NOTE

In Windows 8, select [Settings] in charms on Desktop, and select [Control Panel], and then [Devices and Printers].

- 2 Right-click the printer driver icon of the machine, and click the [Printer properties] menu of the printer driver.
- 3 Click [Administrator] on the [Device Settings] tab.

# Configure the settings.

1 Select [Job accounting] on the [Job Accounting] tab.

2 Set the Account ID.

[Use specific account ID]: Enter the Account ID. Printing will be performed using the entered Account ID. If this option is selected, the user does not have to enter the Account ID for each print job.

[Prompt for account ID]: A screen for entering the Account ID will be displayed when attempting a printing. The Account ID must be entered each time a printing is attempted.

[Prompt for account ID and validate]: A screen for entering the Account ID will be displayed when attempting a printing. The Account ID stored in the Account ID list needs to be entered. The Account ID must be entered each time a printing is attempted.

[Display account ID list]: The Account ID list is displayed when printing. The Account ID to be used needs to be selected from the list.

3 Click [OK].

## **NOTE**

For other settings of job accounting, refer to the following:

Printing System Driver User Guide

# **Configuring Job Accounting**

# **Apply Limit**

Use this to specify the action taken when a department exceeds its printing limits.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [User/Job Account] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Job Account.Set.] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Apply Limit] > [OK] key

For details on each function, see the table below.

Item	Description
Apply Limit	This specifies how the machine behaves when the counter has reached the limit of restriction. The table below describes the action taken.  Value
	Immediately: Job stops when the counter reaches its limit.  Subsequently: Printing of the job continues but the subsequent job will be rejected.

# **Counting the Number of Pages Printed**

This counts the number of pages printed. Counts are classified into Total Job Accounting and Each Job Accounting. A new count can also be started after resetting the count data which was stored for a certain period of time.

[Menu] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [User/Job Account] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Job Account.Set.] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Account.(Local)] > [OK] key > [ $\blacktriangle$ ] [ $\blacktriangledown$ ] key > [Each Job Account] > [OK] key

### **Each Job Account**

This counts the number of pages for each account and resets the counts by account. When checking Each Job Accounting, select the account for which you want to check the count.

Types of the counts are as follows.

	Item Descriptions	
Printed Pages		Displays the number of color printing and black and white printing, and the total number of pages used. You can also use "by Duplex" and "by Combine" to check the number of pages used.
	Total	Displays the number sheets used for color printing, black & white printing, and the total of both.
	Full Color	Displays the number of pages used for color printing.
	Black & White	Displays the number of pages used for black and white printing.
Combine(None)		Displays the number of sheets used for printing without the Combine setting.
	Combine(2in1)	Displays the number of sheets used for 2in1 printing.
	Combine(4in1)	Displays the number of sheets used for 4in1 printing.
	Duplex(1side)	Displays the number of sheets used for 1side printing.
Duplex(2side)		Displays the number of sheets used for 2side printing.
Counter Reset		Resets the counter. Select [Yes] in the confirmation screen.

# **Print Accounting Report**

The total pages counted of all relevant accounts can be printed as an accounting report.

Use the procedure below to print a job accounting report.

### Prepare paper.

Check that A4 or Letter paper is loaded in the cassette.

### Display the screen.

1 [Menu] key > [▲] [▼] key > [User/Job Account] > [OK] key

### NOTE

If the login user name entry screen appears during operations, enter a login user name and password, and select [**Login**]. For this, you need to login with administrator privileges.

The factory default login user name and login password are set as shown below.

	P-C3560DN	P-C4070DN
Login User Name:	3500	4000
Login Password:	3500	4000

2 [▲] [▼] key > [Job Account.Set.] > [OK] key > [▲] [▼] key > [Account. (Local)] > [OK] key

### 3 Print the report.

[▲] [▼] key > [Account. Report] > [OK] key > [Yes]

Accounting report is printed.

# **Using Job Accounting**

This section explains procedures while setting job accounting.

# **Login/Logout**

If job accounting is enabled, an account ID entry screen appears each time you use this machine.

Use the procedure below to login and logout.

### Login

1 In the account ID entry screen, enter the account ID using the numeric keys and select the [OK] key.

### **NOTE**

- If you entered a wrong character, select the [Clear] key and enter the account ID again.
- · If the entered account ID does not match the registered ID, a warning beep will sound and login will fail. Enter the correct account ID.

### When the screen to enter the login user name and password appears

If user login administration is enabled, the screen to enter the login user name and password appears. Enter a login user name and password to login.

- → Adding a User (Local User List) (page 9-5)
- 2 Proceed to complete the rest of the steps.

### Logout

When the operations are complete, select the [Logout] key to return to the account ID entry screen.

# **Unknown ID Job**

This specifies the behavior for handling the jobs sent with unknown or unsent login user names or User ID. If the User Login is set to invalid and Job Accounting is set to valid, follow the procedure when the Account ID is unknown.

The setting items are as follows.

Item	Descriptions
Permit	The job is permitted to be printed.
Reject	The job is rejected (not printed).

### Display the screen.

1 [Menu] key > [▲] [▼] key > [User/Job Account] > [OK] key

### NOTE

If the login user name entry screen appears during operations, enter a login user name and password, and select [**Login**]. For this, you need to login with administrator privileges.

The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN

 Login User Name:
 3500
 4000

 Login Password:
 3500
 4000

### **2** Configure the settings.

 $[\blacktriangle] \ [\blacktriangledown] \ key > [Unknown \ ID \ Job] > [OK] \ key > [\blacktriangle] \ [\blacktriangledown] \ key > [Reject] \ or \ [Permit] > [OK] \ key$ 

# 10 Troubleshooting

### This chapter explains the following topics:

Regular Maintenance	10-2
Cleaning	10-2
Toner Container Replacement	10-3
Waste Toner Box Replacement	10-7
Troubleshooting	
Solving Malfunctions	10-9
Responding to Messages	10-13
Adjustment/Maintenance	
Clearing Paper Jams	10-25

# **Regular Maintenance**

## **Cleaning**

Clean the machine regularly to ensure optimum printing quality.

For safety, always unplug the power cord before cleaning the machine.

### **Paper Transfer Unit**

The paper transfer unit should be cleaned each time the toner container and waste toner box are replaced. To maintain optimum print quality, it is also recommended that the inside of the machine be cleaned once a month as well as when the toner container is replaced.

Print problems such as soiling of the reverse side of printed pages may occur if the paper transfer unit becomes dirty.

Some parts are very hot inside the machine. Exercise caution as there is a risk of burn injury.

Wipe away the paper dust on the registration roller and the paper ramp using the cloth.

Be careful not to touch the transfer roller and transfer belt during cleaning as this may adversely affect print quality.

# **Toner Container Replacement**

When toner runs low, "Toner is low." appears in the message display. Make sure you have a new toner container available for replacement.

When the message displays "Replace the toner.", replace the toner.

### **Frequency of Toner Container Replacement**

The life of the toner containers depends on the amount of toner required to accomplish your printing jobs. According to ISO/IEC 19798 and EcoPrint switched off the toner container can print as follows (A4/Letter paper is assumed):

Toner Color	Life of the Toner Container (Printable pages)		
Totler Color	P-C3560DN	P-C4070DN	
Black	12,000 images	16,000 images	
Cyan	10,000 images	12,000 images	
Magenta	10,000 images	12,000 images	
Yellow	10,000 images	12,000 images	

### NOTE

- The toner container packed with the new printer has to fill up the system when operating the first time. Therefore only 50% of the first toner kits can be used for printing. (For example: P-C3560DN can print 6,000 Black & White images using the black starter toner container.)
- For the toner container, always use a genuine toner container. Using a toner container that is not genuine may cause image defects and product failure.
- The memory chip in the toner container of this product stores information necessary for improving customer convenience, operation of the recycling system for used toner containers, and planning and development of new products. The stored information does not include information that makes it possible to identify individuals, and is only used anonymously for the above purposes.

Do not attempt to incinerate parts which contain toner. Dangerous sparks may cause burns.

### **Replacing the Toner Container**

Installation procedures of the toner container is same for every color. The procedures here represent the yellow toner container.

8

### **NOTE**

- If the Upper Tray does not close, check that the new toner container is installed correctly (in step 6).
- Return the exhausted toner container to your dealer or service representative. The collected toner container will be recycled or disposed in accordance with the relevant regulations.

# **Waste Toner Box Replacement**

When the waste toner box becomes full, immediately replace the waste toner box.

Do not attempt to incinerate parts which contain toner. Dangerous sparks may cause burns.

# NOTE

Return the exhausted waste toner box to your dealer or service representative. The collected waste toner box will be recycled or disposed in accordance with the relevant regulations.

# **Troubleshooting**

# **Solving Malfunctions**

The table below provides general guidelines for problem solving.

If a problem occurs with your machine, look into the checkpoints and perform procedures indicated on the following pages. If the problem persists, contact your Service Representative.

When contacting us, the serial number will be necessary. To check the serial number, refer to the following:

Symptom	Checkpoints	Corrective Actions	Reference Page
The screen does not respond when the main power switch is turned on.	Check the power cord.	Connect both ends of the power cord securely.	page 2-7
Blank sheets are ejected.	Are the originals loaded correctly?	Check that the settings of the application software.	_
Printouts are totally too light.	Is the paper damp?	Replace the paper with new paper.	page 3-2
ABC ABC	Is the toner distributed evenly within the toner container?	Shake the toner container from side to side several times.	page 10-3
123   123	Is EcoPrint mode enabled?	Disable [EcoPrint] mode.	page 8-11
	_	Select the [Menu] key > [Adjust/Maint.] > [Service Setting] > [Drum], and then select [Yes].	_
	_	P-C4070DN: Select the [Menu] key > [Adjust/Maint.] > [Service Setting] > [Drum Heater], and then select [On].	_
		NOTE	
		This function cannot be turned on in some regions.	
		Make sure the paper type setting is correct for the paper being used.	page 8-9

Symptom	Checkpoints	Corrective Actions	Reference Page
Printouts are fuzzy. Printouts are cut off.	Is the machine being used in conditions of very humid, or humidity or temperature rapidly changes?	Use in an environment that has suitable humidity.	_
ABC 123		Select the [Menu] key > [Adjust/Maint.] > [Service Setting] > [Drum], and then select [Yes].	_
		P-C4070DN: Select the [Menu] key > [Adjust/Maint.] > [Service Setting] > [Drum Heater], and then select [On].	_
		NOTE  This function cannot be turned on in some regions.	
Images are skewed.  ABC 199	Is the paper loaded correctly?	Check the position of the paper width guides.	page 3-4
Irregular horizontal lines appear in the image.		P-C3560DN: Select the [Menu] key > [Adjust/Maint.] > [Service Setting] > [MC] and increase the adjustment value. Increase the adjustment value 1 level at a time from the current value. If there is no improvement after the value is increased by 1 level, increase by 1 level again. If there is still no improvement, return the setting to the original value.	
The altitude is 1000 m or higher and irregular horizontal white lines appear in the image.		Select the [Menu] key > [Adjust/Maint.] > [Service Setting] > [Altitude Adj.], and set to an elevation one level higher than the current setting.	
The altitude is 1000 m or higher and dots appear in the image.	_	Select the [Menu] key > [Adjust/Maint.] > [Service Setting] > [Altitude Adj.], and set to an elevation one level higher than the current setting.	_
Paper often jams.	Is the paper loaded correctly?	Load the paper correctly.	page 3-2
	Is the paper of the supported type? Is it in good condition?	Remove the paper, turn it over, and reload it.	page 3-4
	Is the paper curled, folded or wrinkled?	Replace the paper with new paper.	<u>page 3-4</u>
	Are there any loose scraps or jammed paper in the machine?	Remove any jammed paper.	page 10-25

Symptom	Checkpoints	Corrective Actions	Reference Page
2 or more sheets are overlaps when ejected. (multi feed)  ABC 123	_	Load the paper correctly.	page 3-2
Printouts are wrinkled.	Is the paper loaded correctly?	Load the paper correctly.	page 3-2
ABC 123	Is the paper damp?	Replace the paper with new paper.	page 3-2
Printouts are curled.  ABC 123	Is the paper damp?	Replace the paper with new paper.	page 3-2
Cannot print.	Is the machine plugged in?	Plug the power cord into an AC outlet.	_
	Is the machine powered on?	Turn on the power switch.	page 2-8
	Are the USB cable and network cable connected?	Connect the correct USB cable and network cable securely.	page 2-6
Cannot print with USB memory.	Is the USB host blocked?	Select [Unblock] in the USB host settings.	page 8-24
USB memory not recognized.	_	Check that the USB memory is securely plugged into the machine.	_
Dirt on the top edge or back of the paper.  ABC 123	Is the interior of the machine dirty?	Clean the interior of the machine.	page 10-2
Part of the image is	_	Open and then close the rear cover.	page 2-2
periodically faint or shows white lines.	_	P-C3560DN: Select the [Menu] key > [Adjust/Maint.] > [Service Setting] > [MC] and decrease the adjustment value. Decrease the adjustment value 1 level at a time from the current value. If there is no improvement after the value is decreased by 1 level, decrease by 1 level again. If there is still no improvement, return the setting to the original value.	_

Symptom	Checkpoints	Corrective Actions	Reference Page
Skewed-color printout.	_	Run [ColorCalibration].	page 10-20
ABC	_	Run [Color Regist.].	page 10-20
Colors appear different than you anticipated.		When printing from a computer Adjust the color using the printer driver.	_
The previous image remains and lightly printed.  AB  AB	_	P-C3560DN: Select the [Menu] key > [Adjust/Maint.] > [Service Setting] > [MC] and increase the adjustment value. Increase the adjustment value 1 level at a time from the current value. If there is no improvement after the value is increased by 1 level, increase by 1 level again. If there is still no improvement, return the setting to the original value.	
The color toner is empty.	Do you want to continue printing in black and white?	If the black toner is remained, the machine continues printing in black and white by selecting [Print in B & W] of [ColorToner Empty].	page 8-13
The machine is emitting steam in the area around the paper ejection slot.	Check the room temperature to see if it is low, or if damp paper was used.	Depending on the printing environment and the paper's condition, the heat generated during printing will cause the moisture in the paper to evaporate, and the steam emitted may look like smoke. This is not a problem, and you can continue printing. If the steam concerns you, raise the room temperature, or replace the paper with a newer, dryer paper.	

# **Responding to Messages**

If the message display or the computer displays any of these messages, follow the corresponding procedure.

When contacting us, the serial number will be necessary. To check the serial number, refer to the following:

Checking the Equipment's Serial Number (page 5-2)

# **Adjustment/Maintenance**

### ColorCalibration

This machine contains a calibration function that automatically makes adjustments to compensate for changes that occur over time due to variations in the ambient temperature and humidity. So that the highest quality color printing can be maintained, this color calibration operation is carried out automatically each time the power to the machine is turned on. If color tone does not improve or color drift does not improve after executing this color adjustment, perform color print position correction on the following:

Color Registration Procedure (page 10-20)

### Display the screen.

[Menu] key > [▲] [▼] key > [Adjust/Maint.] > [OK] key > [▲] [▼] key > [ColorCalibration] > [OK] key

### **Perform the Color Calibration.**

Select [Yes] to execute Color Calibration.

"Completed." is displayed and the screen returns to the Adjust/Maint. menu.

### **Color Registration Procedure**

This function is available to resolve color drift. If it is not resolved by normal registration or to perform more detailed settings, use the detailed settings.

### NOTE

To perform color registration, verify that either Letter or A4 paper is loaded into a cassette.

### ( IMPORTANT

Before performing color registration, be sure to perform ColorCalibration on page 10-20. If color drift remains, perform color registration. By performing color registration without performing Color Calibration, the color drift will be resolved once, however, it may cause the serious color drift later.

### **Normal Registration**

### Display the screen.

[Menu] key > [▲] [▼] key > [Adjust/Maint.] > [OK] key > [▲] [▼] key > [Color Regist.] > [OK] key > [▲] [▼] key > [Normal] > [OK] key

### Print the chart.

[▲] [▼] key > [Print Chart] > [OK] key > [Yes]

A chart is printed. On the chart, for each of M (magenta), C (cyan) and Y (yellow), 3 chart types are printed on one sheet: H-L (left), V (vertical), H-R (right).

After printing, you will return to the advanced menu for color printing position correction.

### **Chart Example**

# 3 Display the correction menu

 $[\blacktriangle]$  [ $\blacktriangledown$ ] key > [Adjust Magenta] > [OK] key

The magenta correction menu appears.

### Enter the appropriate value.

1 Find the location on each chart where 2 lines most closely match. If this is the 0 position, registration for that color is not required. For the illustration, B is the appropriate value.

2 Select the [◄] or [▶] key to change the H-L, V, and H-R items, select the [▲] or [▼] key to enter the values read from the chart, and select the [**OK**] key.

Magenta correction is performed. After a brief interval, you will return to the standard menu for color printing position correction.

To increase the value from 0 up to a maximum of 9, select the  $[\blacktriangle]$  key. To decrease the value, select the  $[\blacktriangledown]$  key.

Select  $[\P]$  to change the value from 0 to an alphabetical letter. Continue selecting to change from A through I. To move in the opposite direction, select  $[\blacktriangle]$ .

You cannot use the numeric keys to enter these values.

3 Repeat steps 3 to 4 to correct cyan and yellow.

### **Detailed Settings**

### Display the screen.

[Menu] key > [▲] [▼] key > [Adjust/Maint.] > [OK] key > [▲] [▼] key > [Color Regist.] > [OK] key > [▲] [▼] key > [Detail] > [OK] key

### Print the chart.

[▲] [▼] key > [Print Chart] > [OK] key > [Yes]

A chart is printed. On the chart, for each of M (magenta), C (cyan) and Y (yellow), charts for H-1 to 5 and V-1 to 5 are printed.

After printing, you will return to the advanced menu for color printing position correction.

### **Chart Example**

### 2 Display the correction menu

[▲] [▼] key > [Adjust Magenta] > [OK] key

The magenta correction menu appears.

### Enter the appropriate value.

1 Find the location on each chart where 2 lines most closely match. If this is the 0 position, registration for that color is not required. For the illustration, B is the appropriate value.

From charts H-1 to H-5, read the values from H-1 to H-5.

From charts V-1 to V-5, read only the values from V-3 (center).

2 Select the [◄] or [▶] key to change the H-1 to H-5 and V-3 items, select the [▲] or [▼] key to enter the values read from the chart, and select the [OK] key.

Magenta correction is performed. After a brief interval, you will return to the advanced menu for color printing position correction.

To increase the value from 0 up to a maximum of 9, select the  $[\blacktriangle]$  key. To decrease the value, select the  $[\blacktriangledown]$  key.

Select [▼] to change the value from 0 to an alphabetical letter. Continue selecting to change from A through I. To move in the opposite direction, select [▲].

You cannot use the numeric keys to enter these values.

3 Repeat steps 3 to 4 to correct cyan and yellow.

# **Clearing Paper Jams**

If a paper jam occurs, the message display will display "Paper Jam." and the machine will stop.

Refer to these procedures to remove the jammed paper.

### **Jam Location Indicators**

- 1 Shows the location of a paper jam.
- 2 Displays the Help screen.

For details on Help Screen, refer to the following:

→ Help Screen (page 2-11)

If a paper jam occurs, the location of the jam will be displayed on the message display as well as the clearing instructions.

Paper Jam Location Indicator	Paper Jam Location	Reference Page
Α	Multi Purpose Tray	page 10-26
В	Cassettes 1 to 4	page 10-28
С	Rear Cover 1 (Feed)	page 10-29
D	Rear Cover 2	page 10-30
E	Rear Cover 3	page 10-32
F	Rear Cover 1	page 10-33
G	Duplex Unit	page 10-35

After you remove the jam, the machine will warm up again and the error message will be cleared. The machine resumes with the page that was printing when the jam occurred.

### **Precautions with Paper Jams**

- · Do not reuse jammed papers.
- If the paper tears during removal, be sure to remove any loose scraps of paper from inside the machine. Scraps of paper left in the machine could cause subsequent jamming.

The fixing unit is extremely hot. Take sufficient care when working in this area, as there is a danger of getting burned.

### **Multi Purpose Tray**

3

4

5

### Cassettes 1 to 4

Procedures for handling a paper jam in Cassettes 1 to 4 are all the same. This section explains procedures using Cassette 1 as an example.

### Rear Cover 1 (Feed)

1

Some parts are very hot inside the machine. Exercise caution as there is a risk of burn injury.

2

### **Rear Cover 2**

NOTE

If the paper cannot be removed, do not try to forcefully remove it.

Rear Cover 1 (Feed) (page 10-29)

2

3

4

#### **Rear Cover 3**

NOTE
If the paper cannot be removed, do not try to forcefully remove it.

→ Rear Cover 1 (Feed) (page 10-29)

#### **Rear Cover 1**

1

Some parts are very hot inside the machine. Exercise caution as there is a risk of burn injury.

2

4

**5** 

### **Duplex Unit**

1

Some parts are very hot inside the machine. Exercise caution as there is a risk of burn injury.

2

Printer Functions	
Paper Feeder (500-sheet) (Option)	11-24
Glossary	11-25

## **Optional Equipment**

### **Overview of Optional Equipment**

The following optional equipment is available for the machine.

#### (1) Card Authentication Kit(B) "Card Authentication Kit"

User login administration can be performed using ID cards. To do so, it is necessary to register ID card information on the previously registered local user list. For more information about how to register this information, refer to the following:

Card Authentication Kit(B) Operation Guide

#### (2) PF-5100 "Paper Feeder (500-sheet x1)"

Up to three additional cassettes identical to the machine's cassettes can be installed in the machine. Loading method are the same as the standard cassettes.

▶ Loading in the Cassettes (page 3-4)

#### (3) "Expansion Memory"

The machine can perform the more multiple jobs simultaneously by adding more memories. You can increase the machine's memory up to 2,048 MB by plugging in the optional memory modules.

#### **Precautions for Handling the Memory Modules**

To protect electronic parts, discharge static electricity from your body by touching a water pipe (faucet) or other large metal object before handling the memory modules. Or, wear an antistatic wrist strap, if possible, when you install the memory modules.

#### **Installing the Memory Modules**

1 Turn off the machine and disconnect the power cord and interface cable.

If the optional IB-50/51 or HD-6/7 is installed, remove it.

2 Remove the covers.

- 3 Remove the memory module from its package.
- 4 With the memory connection terminal pointing toward the socket, align the cut-out part with the socket terminal and insert directly in at an angle.

- **5** Carefully press the inserted memory down and into the machine.
- 6 Reinstall the covers.

#### **Removing the Memory Module**

To remove a memory module, remove the right cover and the memory slot cover from the machine. Then, carefully push out the two socket clamps. Ease the memory module out of the socket to remove.

#### **Verifying the Expanded Memory**

To verify that the memory module is working properly, test it by printing a status page.

Report (page 8-5)

#### (4) HD-6/HD-7 "SSD"

With SSD installed in the machine, received data can be rasterized and stored on this SSD. This enables high-speed printing of multiple copies using an electric sort function. Also, you can use the Document Box functions.

➤ What is Document Box? (page 5-4)

#### (5) IB-50 "Network Interface Kit"

The Network Interface Kit provides a high-speed connection for the Gigabit-per-second interface. Settings are possible for a variety of OS and network protocols.

→ IB-50 User's Manual

#### (6) IB-51 "Wireless Network Interface Kit"

This is a wireless LAN interface card which supports the wireless LAN specifications IEEE802.11n (Max 300 Mbps) and 11 g/b.

With the utilities supplied, settings are possible for a variety of OS and network protocols.

→ IB-51 User's Manual

#### (7) "SD/SDHC Memory Card"

An SD/SDHC memory card is useful for storing fonts, macros, and overlays. The machine is equipped with a slot for an SDHC memory card with a maximum size of 32 GB, and an SD memory card with a maximum size of 2 GB.

#### Reading the SD/SDHC Memory Card

Once inserted in the machine's slot, the contents of the SD/SDHC memory card can be read from the operation panel or automatically when you power on or reset the machine.

#### Installing and Formatting the SD/SDHC Memory Card

To use an unused SD/SDHC memory card, you must first use the machine to format the SD/SDHC memory card.

1 Power off the machine and unplug the power cord.

#### 2 Remove the cover.

#### 3 Remove the cover.

4 Insert the SD/SDHC memory card into the SD/SDHC memory card slot.

5 Replace the covers and close the rear cover.

6 Insert the power cord into the socket and turn on the power switch.

7 Format the SD/SDHC memory card from the operation panel.

For the procedure for formatting, refer to the following:

→ Format SD Card (page 8-14)

#### (8) Data Security Kit(E) "Data Security Kit"

The Data Security Kit overwrites all unnecessary data in the storage area so that it cannot be retrieved. The Data Security Kit encrypts data before storing it in the SSD. It guarantees higher security because no data cannot be decoded by ordinary output or operations.

#### (9) UG-33 "ThinPrint Option"

This application allows print data to be printed directly without a print driver.

#### (10) USB Keyboard "USB Keyboard"

A USB keyboard can be used to enter information into the text fields on the operation panel. A special mount is also available to install the keyboard on the machine. Please contact your dealer or service representative for information on keyboards that are compatible with your machine before you purchase one.

### **Optional Applications**

#### **Overview of the Applications**

The applications listed below are installed on this machine.

Application				
Data Security Kit				
Card Authentication Kit <sup>*1</sup>				
ThinPrint Option*1				

This can be used on a trial basis for a limited time.

### NOTE

- Restrictions such as the number of times the application can be used during the trial period differ depending on the application.
- If you change the date/time while using the trial version of an application, you will no longer be able to use the application.

#### Starting Application Use

Use the procedure below to start using an application.

[Menu] > [▲] [▼] key > [Op Functions] > [OK] key

#### NOTE

If the login user name entry screen appears during operations, enter a login user name and password, and select [Login]. For this, you need to login with administrator privileges.

The factory default login user name and login password are set as shown below.

	P-C3560DN	P-C4070DN
Login User Name:	3500	4000
Login Password:	3500	4000

- Select the desired application, and select the [OK] key.
- 3 [▲] [▼] key > [License On] > [OK] key

#### NOTE

You can view detailed information on the selected application by selecting [Detail].

4 [▲] [▼] key > [Official] > [OK] key

To use the application as a trial, select [Trial] without entering the license key.

5 Enter the license key > [OK] key

Some applications do not require you to enter a license key. If the license key entry screen does not appear, go to Step 6.

6 Select [Yes].

#### **NOTE**

If you started the Security Kit or Thin Print option and entered the license key, turn the power OFF/ON.

#### **Checking Details of Application**

Use the procedure below to check the details of application.

1 [Menu] > [▲] [▼] key > [Op Functions] > [OK] key

#### **NOTE**

If the login user name entry screen appears during operations, enter a login user name and password, and select [Login]. For this, you need to login with administrator privileges.

The factory default login user name and login password are set as shown below.

P-C3560DN P-C4070DN 4000 **Login User Name:** 3500 3500 4000 **Login Password:** 

- 2 Select the desired application, and select the [OK] key.
- 3 [▲] [▼] key > [Detail] > [OK] key

You can view detailed information on the selected application. Select the [▶] key to view the next screen. Select the [◀] key to return to the previous screen.

The table below lists the item you can view.

Item
Function Name
License On
Trial Counts
Date of Trial
Status

#### Extend the trial period.

[**◄**] [**▶**] key > [Date of Trial] > [Extend] > [Yes]

The trial period is extended.

## **Character Entry Method**

### **Using the Keys**

Use the following keys to enter characters.

No.	Display/Key	<b>Description</b>
1	Message Display	Displays entered characters.
2	Arrow keys	Select to select the entry position, or select a character from the character list.
3	Numeric keys	Select to enter characters and symbols.
4	[Clear] key	Select to delete characters.
5	[ <b>OK</b> ] key	Select to finalize entry and return to the screen before the entry. To enter a symbol, select to confirm the selected symbol.
6	Right Select key	Select to select the type of characters you want to enter. (When [Text] is displayed)
7	Cursor	Characters are entered at the position of the cursor.

### **Selecting Type of Characters**

To enter characters, the following three types are available:

Types	Description
ABC	To enter alphabets.
123	To enter numerals.
Symbols	To enter symbols.

In a character entry screen, select [Text] to select the type of characters you want to enter.

Each time you select [Text], the character type switches as follows: [ABC], [123], [Symbols], [ABC] ...

# **Characters That Can be Entered Using the Numeric Keys**

The following table lists the characters that can be entered using the numeric keys.

Keys		Cł	narac	ters	(Eac	h pre	ss of	a ke	y cha	anges the character in the order from left to right.)	
1 .@	-	@	-	_	/	:	~	1	(Rep	peats from the first character on the left)	
	1 (During number entry)										
<b>2</b> ABC	а	b	С	Α	В	С	2	2 (Repeats from the first character on the left)			
	2 (D	uring	numb	er ent	ry)						
3 DEF	d	е	f	D	Е	F	3	(Rep	eats	from the first character on the left)	
	3 (D	uring	numb	er ent	ry)						
<b>4</b> GHI	g	h	i	G	Н	I	4	(Rep	eats	from the first character on the left)	
	4 (D	uring	numb	er ent	ry)						
5 JKL	j	k	I	J	K	L	5 (Repeats from the first character on the left)				
	5 (D	uring	numb	er ent	ry)						
6мио	m	n	0	М	N	0	6 (Repeats from the first character on the left)				
	6 (D	uring	numb	er ent	ry)						
<b>7</b> pqrs	р	q	r	S	Р	Q	R	S	7	(Repeats from the first character on the left)	
	7 (During number entry)										
<b>8</b> TUV	t	u	V	Т	U	V	8	(Rep	eats	from the first character on the left)	
	8 (During number entry)										

Keys		CI	narac	ters	(Eac	h pre	ss of	a ke	y cha	ange	s the character in the order from left to right.)	
9wxyz	w	х	у	z	W	Х	Υ	Z	Z 9 (Repeats from the first character on the left)			
	9 (During number entry)											
0 .,		. , ' ! ? (space) 0 (Repeats from the first character on the left)										
	0 (During number entry)											
*⁄₌ a↔A	Select to change the character in the cursor position between upper case and lower case.											
	"*" or "." (During number entry)											

### **Entering Symbols**

Symbols can be entered.

1 Select the [#] key. Displays the symbol list.

2 Select the [▲], [▼], [▶] or [◄] key to move the cursor and select the symbol to be entered.

**3** Select the **[OK]** key. The selected symbol is entered.

### **Entering Characters**

Follow the steps shown below to enter "R&D" for example.

1 Select the [7] key three times. [r] is entered.

2 Select the [\*/.] key. [r] changes to [R].

3 Select the [▶] key. The cursor moves to the right.

4 Select the [#] key. Displays the symbol list.

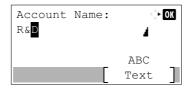

5 Select the [▲] or [▼] key to move the cursor and select [&].

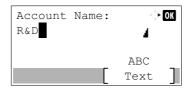

6 Select the [OK] key. [&] is entered.

7 Select the [3] key four times. [D] is entered.

8 Select the [▶] key.

### **Paper**

This section explains the paper sizes and types that can be used in the paper source.

For details on the sizes, types, and number of sheets of paper that can be loaded in each paper tray, refer to the following:

→ Specifications (page 11-22)

### **Basic Paper Specifications**

This machine is designed to print on standard copy paper as used in regular ('dry') copiers and page printers such as laser printers. It also supports a variety of other types of paper that conform to the specifications given in this appendix.

Be careful when choosing paper. Paper unsuitable for the machine may cause jams or may be wrinkled.

#### Supported Paper

Use standard copy paper for regular copiers or laser printers. The printing quality will be affected by the quality of paper. Poor quality paper may result in unsatisfactory output.

#### **Basic Paper Specifications**

The following table lists the specifications of paper that is supported with this machine. Refer to the subsequent sections for further details.

Criteria	Specifications
Weight	Cassettes: 60 to 163 g/m <sup>2</sup>
	Multi purpose tray: 60 to 220 g/m <sup>2</sup> , 230 g/m <sup>2</sup> (Cardstock)
Dimensional accuracy	±0.7 mm
Squareness of corners	90° ±0.2°
Moisture content	4 to 6%
Pulp content	80% or more

#### NOTE

Some recycled paper does not meet requirements for use with this machine as listed in the Basic Paper Specifications shown below, such as moisture or pulp content. For this reason, we recommend purchasing a small amount of recycled paper as a sample for testing prior to use. Choose recycled paper that gives the best printing results and contains low levels of paper dust.

We are not responsible for the problems occurred from the use of paper that does not conform to our specifications.

### **Choosing the Appropriate Paper**

This section describes guidelines for choosing paper.

#### Condition

Avoid using paper with bent corners or that is curled, dirty, or torn. Do not use paper that has a rough surface or paper fiber lint, or that is especially delicate. Use of paper in any of these conditions will not only deliver poor copies but may also cause jams and shorten the useful life of the machine. Choose paper with a smooth and even surface; however, avoid coated paper or paper with a treated surface as it may damage the drum or fusing unit.

#### Ingredients

Do not use paper such as paper that has been coated or surface-treated or paper that contains plastic or carbon. Those types of paper may produce harmful fumes from the heat of printing and may damage the drum.

Be sure to use the standard paper that contains at least 80% pulp, i.e., not more than 20% of the total paper content consists of cotton or other fibers.

#### **Supported Paper Sizes**

Paper of the following sizes is supported by the machine.

Measurements in the table take into account a  $\pm 0.7$  mm dimensional accuracy for length and width. Corner angles must be  $90^{\circ} \pm 0.2^{\circ}$ .

Paper Size	Cassette 1	Cassettes 2 to 4	Multi Purpose Tray
Envelope Monarch (3-7/8 × 7-1/2")	×	0	0
Envelope #10 (4-1/8 × 9-1/2")	×	0	0
Envelope DL (110 × 220 mm)	×	0	0
Envelope C5 (162 × 229 mm)	×	0	0
Executive (7-1/4 × 10-1/2")	0	0	0
Letter	0	0	0
Legal	0	0	0
A4 (297 × 210 mm)	0	0	0
B5 (257 × 182 mm)	0	0	0
A5 (210 × 148 mm)	0	0	0
A6 (148 × 105 mm)	0	×	0
B6 (182 × 128 mm)	0	0	0
Envelope #9 (3-7/8 × 8-7/8")	×	0	0
Envelope #6 (3-5/8 × 6-1/2")	×	0	0
ISO B5 (176 × 250 mm)	0	0	0
Hagaki (Cardstock) (100 × 148 mm)	×	×	0
Oufuku hagaki (Return postcard) (148 × 200 mm)	×	×	0
Oficio II	0	0	0
216 × 340 mm	0	0	0
16K (273 × 197 mm)	0	0	0

Paper Size	Cassette 1	Cassettes 2 to 4	Multi Purpose Tray		
Statement	0	0	0		
Folio (210 × 330 mm)	0	0	0		
Youkei 4 (105 × 235 mm)	×	0	0		
Youkei 2 (114 × 162 mm)	×	0	0		
Custom	Cassette 1: 105 × 148 to 216 × 356 mm  Cassettes 2 to 4: 92 × 162 to 216 × 356 mm  Multi Purpose Tray: 70 × 148 to 216 × 356 mm				

#### **Smoothness**

The paper surface should be smooth, but it must be uncoated. With paper that is too smooth and slippery, several sheets may accidentally be supplied at once, causing jams.

#### **Basis Weight**

In countries that use the metric system, basis weight is the weight in grams of one sheet of paper one square meter in area. In the United States, basis weight is the weight in pounds of one ream (500 sheets) of paper cut to the standard size (or trade size) for a specific grade of paper. Paper that is too heavy or too light may be supplied incorrectly or cause paper jams, which may cause excessive wear of the machine. Mixed paper weight (i.e., thickness) may cause several sheets to be supplied at once accidentally and may also cause blurring or other printing problems if the toner fails to adhere correctly.

#### **Moisture Content**

Paper moisture content is the ratio of moisture to dryness expressed as a percentage. Moisture affects how the paper is supplied, the electrostatic chargeability of the paper, and how the toner adheres.

Paper moisture content varies depending on the relative humidity in the room. High relative humidity causes paper to become damp, making the edges expand so it appears wavy. Low relative humidity causes paper to lose moisture, making the edges tighten and weakening print contrast.

Wavy or tight edges may cause the paper to slip when it is supplied. Try to keep the moisture content between 4 to 6%.

To maintain the right level of moisture content, bear in mind the following considerations.

- Store paper in a cool, well-ventilated place.
- Store paper flat and unopened in the package. Once the package is opened, reseal it if the paper is not to be used for a while.
- Store paper sealed in the original package and box. Put a pallet under the carton to keep it raised above the floor. Especially during rainy seasons keep the paper a sufficient distance away from wooden or concrete floors.
- Before using paper that has been stored, keep it at the proper moisture level for at least 48 hours.
- Do not store paper where it is exposed to heat, sunlight, or dampness.

#### Other Paper Specifications

Porosity: The density of the paper fibers.

Stiffness: Paper must be stiff enough or it may buckle in the machine, causing jams.

**Curl**: Most paper naturally tends to curl after the package is opened. When paper passes through the fixing unit, it curls upward slightly. To deliver flat printouts, load the paper so that the curl faces towards the bottom of the paper tray.

**Static electricity**: During printing, paper is electrostatically charged so that the toner adheres. Choose paper that can be discharged quickly so that copies do not cling together.

Whiteness: Paper whiteness affects print contrast. Use whiter paper for sharper, brighter copies.

**Quality**: Machine problems may occur if sheet sizes are not uniform or if corners are not square, edges are rough, sheets are uncut, or edges or corners are crushed. In order to prevent these problems, be especially careful when you cut the paper yourself.

**Packaging**: Choose paper that is properly packaged and stacked in boxes. Ideally, the packaging itself should have been treated with a coating to inhibit moisture.

**Specially treated paper**: We do not recommend printing onto the following types of paper, even if it conforms to the basic specifications. When you use these kinds of paper, purchase a small amount first as a sample to test.

- · Glossy paper
- Watermarked paper
- · Paper with an uneven surface
- · Perforated paper

### **Special Paper**

This section describes printing onto special paper and print media.

The following paper and media can be used.

- Transparencies
- · Preprinted paper
- · Bond paper
- · Recycled paper
- Thin paper
- · Letterhead
- · Colored paper
- · Prepunched paper
- Envelopes
- Hagaki (Cardstock)
- · Thick paper
- Labels
- Coated
- · High-quality paper

When using these paper and media, choose those that are designed specifically for copiers or page printers (such as laser printers). Use the multi purpose tray for transparencies, thick paper, envelopes, cardstocks, and label paper.

#### **Choosing Special Paper**

Although special paper that meets the following requirements can be used with the machine, print quality will vary considerably due to differences in the construction and quality of special paper. Thus, special paper is more likely than regular paper to cause printing problems. Before purchasing special paper in volume, try testing a sample to ensure the print quality is satisfactory. General precautions when printing onto special paper are given below. Note that we are not responsible for any harm to the user or damage to the machine caused by moisture or specifications of special paper.

Select a cassette or multi purpose tray for special paper.

#### **Transparencies**

Transparencies must be able to withstand the heat of printing. Transparencies must meet the following conditions.

Heat resistance	Must withstand at least 190°C						
Thickness	0.100 to 0.110 mm						
Material	Polyester						
Dimensional accuracy	±0.7 mm						
Squareness of corners	90° ±0.2°						

To avoid problems, use the multi purpose tray for transparencies and load transparencies with the long side facing the machine.

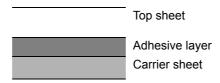

If transparencies jam frequently at output, try pulling the leading edge of sheets gently as they are ejected.

#### Label

Be sure to feed labels from the multi purpose tray.

For selecting labels, use extreme care so that the adhesive may not come in direct contact with any part of the machine and that the labels are not easily peeled from the carrier sheet. Adhesives that stick to the drum or rollers and peeled labels remaining in the machine may cause a failure.

When printing onto labels, you must be liable for the print quality and possible trouble.

Labels consist of three layers as shown in the illustration. The adhesive layer contains materials that are easily affected by the force applied in the machine. The carrier sheet bears the top sheet until the label is used. This composition of labels may cause more problems.

The label surface must be covered completely with the top sheet. Gaps between labels may cause peeling of labels, resulting in a serious failure.

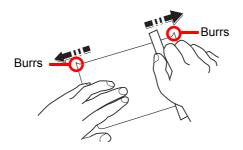

Some label paper has large margins on the top sheet. When using such paper, do not peel these margins from the carrier sheet before completing output.

Use label paper that conforms to the following specifications.

Top sheet weight	44 to 74 g/m²
Basis weight (overall paper weight)	104 to 151 g/m²
Top sheet thickness	0.086 to 0.107 mm
Overall paper thickness	0.115 to 0.145 mm
Moisture content	4 to 6 % (composite)

#### Hagaki (Cardstock)

Before loading Hagaki (Cardstock) into the multi purpose tray, fan them and align the edges. If the Hagaki (Cardstock) paper is curled, straighten it before loading. Printing onto curled Hagaki (Cardstock) may cause jams.

Use unfolded Oufuku hagaki (Return postcard) (available at post offices). Some Hagaki (Cardstock) may still have rough edges developed by a paper cutter on the back side. Remove any such rough edges by placing the Hagaki (Cardstock) on a flat surface and rubbing the edges gently a few times with a ruler.

#### **Envelopes**

Envelopes should be fed from the MP tray with the print-side up or the optional paper feeder with the print-side up.

#### **NOTE**

Do not load paper above the load limits located on the paper width guide of the optional paper feeder.

Due to the structure of envelopes, printing evenly over the entire surface may not be possible in some cases. Thin envelopes in particular may be wrinkled by the machine in some cases as they pass through. Before purchasing envelopes in volume, try testing a sample to ensure the print quality.

Storing envelopes for a long period may cause them to become wrinkled. Thus, keep the package sealed until you are ready to use them.

Keep the following points in mind.

- Do not use envelopes with exposed adhesive. In addition, do not use the type of envelope in which the adhesive is exposed after the top layer is peeled off. Serious damage may be caused if the paper covering the adhesive comes off in the machine.
- Do not use envelopes with certain special features. For example, do not use envelopes with a grommet for winding a string to close the flap or envelopes with an open or film-covered window.
- If paper jams occur, load fewer envelopes at once.

#### **Thick Paper**

Before loading thick paper in the multi purpose tray, fan it and align the edges. Some thick paper may still have rough edges developed by a paper cutter on the back side. Remove any such rough edges just as with Hagaki (Cardstock) by placing the paper on a flat surface and rubbing the edges gently a few times with a ruler. Printing onto paper with rough edges may cause jams.

#### NOTE

If the paper is not supplied correctly even after it is smoothed, load the paper in the multi purpose tray with the leading edge raised a few millimeters.

#### **Colored Paper**

Colored paper must conform to the specifications.

Basic Paper Specifications (page 11-14)

In addition, the pigments in the paper must be able to withstand the heat of printing (up to 200°C or 392°F).

#### **Preprinted Paper**

Preprinted paper must conform to the specifications.

→ Basic Paper Specifications (page 11-14)

The colored ink must be able to withstand the heat of printing. It must be resistant to silicone oil as well. Do not use paper with a treated surface such as glossy paper used for calendars.

#### Recycled Paper

Recycled paper must conform to the specifications; however, its whiteness may be considered separately.

Basic Paper Specifications (page 11-14)

#### **NOTE**

Before purchasing recycled paper in volume, try testing a sample to ensure satisfactory print quality.

#### **Coated Paper**

Coated paper is created by treating the surface of the base paper with a coating that provides higher printing quality than plain paper. Coated paper is used for particularly high quality printing.

The surface of high-quality or medium-quality paper is coated with special agents that improve ink adhesion by making the paper surface smoother. These agents are used either to coat both sides of the paper or just one side. The coated side appears slightly glossy.

#### **IMPORTANT**

When printing on coated paper in very humid environments, ensure that the paper is kept dry as moisture may cause sheets to stick together when they are fed into the machine. If printing in very humid environments, set coated paper for one sheet each.

## **Specifications**

**⊘** IMPORTANT

Specifications are subject to change without notice.

### **Machine**

Item		Description	
Туре		Desktop	
Printing Method		Electrophotography by semiconductor laser	
Paper Weight Cassette		60 to 163 g/m <sup>2</sup>

### Paper Feeder (500-sheet) (Option)

Item	Description
Paper Supply Method	Friction roller feeder (No. Sheets: 500, 80 g/m²)
Paper Size	A4, A5, B5, B6, Folio, 216 × 340 mm, Letter, Legal, Statement, Executive, Oficio II, 16K, B5 (ISO), Envelope #10, Envelope #9, Envelope #6 3/4, Envelope Monarch, Envelope DL, Envelope C5, Youkei 4, Youkei 2, Custom (92 × 162 to 216 × 356 mm)
Supported Paper	Paper weight: 60 to 220 g/m²
	Media types: Plain, Rough, Recycled, Preprinted, Labels, Bond, Vellum, Color (Colour), Prepunched, Letterhead, Envelope, Coated, Thick, High Quality, Custom 1 to 8
Dimensions	15 23/64 × 20 61/64 × 4 37/64
(W) × (D) × (H)	390 × 532 × 116 mm
Weight	9.0 lbs. or less/ 4.1 kg or less

Consult your dealer or service representative for recommended paper types.

### **Glossary**

#### **Accessibility**

The machine is designed featuring good accessibility even for the elderly and those who are physically challenged or visually impaired.

#### Apple Talk

AppleTalk offers file sharing and printer sharing and it also enables you to utilize application software that is on another computer on the same AppleTalk network.

#### Auto Form Feed Timeout

During data transmission, the machine may sometimes have to wait until receiving the next data. This is the auto form feed timeout. When the preset timeout passes, the machine automatically prints output. However, no output is performed if the last page has no data to be printed.

#### Auto-IP

Auto-IP is a module that enables dynamic IPv4 addresses to be assigned to a device on startup. However, DHCP requires a DHCP server. Auto-IP is a server-less method of choosing an IP address. IP addresses between 169.254.0.0 to 169.254.255.255 are reserved for Auto-IP and assigned automatically.

#### **Auto Paper Selection**

A function to automatically select paper in the same size as originals when printing.

#### Auto Sleep

A mode designed for electrical power saving, activated when the machine is left unused or there is no data transfer for a specific period. In Sleep mode, power consumption is kept to a minimum.

#### **Bonjour**

Bonjour, also known as zero-configuration networking, is a service that automatically detects computers, devices and services on an IP network. Bonjour, because an industry-standard IP protocol is used, allows devices to automatically recognize each other without an IP address being specified or DNS server being set. Bonjour also sends and receives network packets by UDP port 5353. If a firewall is enabled, the user must check that UDP port 5353 is left open so that Bonjour will run correctly. Some firewalls are set up so as to reject only certain Bonjour packets. If Bonjour does not run stably, check the firewall settings and ensure that Bonjour is registered on the exceptions list and that Bonjour packets are accepted. If you install Bonjour on Windows XP Service Pack 2 or later, the Windows firewall will be set up correctly for Bonjour.

#### **Custom Box**

The Custom Box function stores print data for each individual user on the printer and allows the user to print single or multiple copies of the stored data later using the printer's operation panel.

#### **Default Gateway**

This indicates the device, such as a computer or router, that serves as the entrance/exit (gateway) for accessing computers outside the network that you are on. When no specific gateway is designated for a destination IP address, data is sent to the host designated as the Default Gateway.

#### **DHCP (Dynamic Host Configuration Protocol)**

Dynamic Host Configuration Protocol (DHCP) that automatically resolves IP addresses, subnet masks, and gateway addresses on a TCP/IP network. DHCP minimizes the load of network management employing a large number of client computers because it relieves individual clients including printers from the IP address being assigned.

#### DHCP (IPv6)

DHCP (IPv6) is the next-generation of the Internet's Dynamic Host Configuration Protocol and supports IPv6. It extends the BOOTP startup protocol that defines the protocols used for transferring configuration information to hosts on the network. DHCP (IPv6) permits the DHCP server to use its expanded functionality to send configuration parameters to an IPv6 node. Because the network addresses that can be used are allocated automatically, the IPv6 node management workload is reduced in systems where the administrator has to exercise close control over IP address allocation.

#### dpi (dots per inch)

A unit for resolution, representing the number of dots printed per inch (25.4 mm).

#### **EcoPrint Mode**

A printing mode that helps save toner. Copies made in this mode are thus lighter than normal.

#### **Emulation**

The function to interpret and execute other printers' page description languages. The machine emulates operation of PCL6, KPDL3 (PostScript 3 compatible).

#### **FTP (File Transfer Protocol)**

A protocol to transfer files on the TCP/IP network, whether the Internet or an intranet. Along with HTTP and SMTP/POP, FTP is now frequently used on the Internet.

#### Grayscale

A computer color expression. Displayed images of this sort are typically composed of shades of gray, varying from black at the weakest intensity to white at the strongest, without any other colors. Gray levels are displayed in numerical levels: that is, white and black only for 1 bit; 256 gray levels (including white and black) for 8 bits; and 65,536 gray levels for 16 bits.

#### **IP Address**

An Internet protocol address is a unique number that represents a specific computer or related device on the network. The format of an IP address is four sets of numbers separated by dots, e.g. 192.168.110.171. Each number should be between 0 and 255.

#### **IPP**

IPP (Internet Printing Protocol) is a standard that uses TCP/IP networks such as the Internet to enable print jobs to be sent between remote computers and printers. IPP is an extension of the HTTP protocol used to view websites and enables printing to be carried out via routers on printers in remote locations. It also supports the HTTP authentication mechanisms along with SSL server and client authentication as well as encryption.

#### Job Box

The Job Box function stores print data on the printer and allows users to print single or multiple copies of the stored data later using the printer's operation panel.

#### **KPDL** (Kyocera Page Description Language)

Kyocera's PostScript page description language compatible with Adobe PostScript Level 3.

#### Multi Purpose (MP) Tray

The paper supply tray on the front side of the machine. Use this tray instead of the cassettes when printing onto envelopes, Hagaki (Cardstock), transparencies, or labels.

#### **NetBEUI (NetBIOS Extended User Interface)**

An interface, developed by IBM in 1985, as an update from NetBIOS. It enables more advanced functions on smaller networks than other protocols such as TCP/IP, etc. It is not suitable for larger networks due to lack of routing capabilities to choose the most appropriate routes. NetBEUI has been adopted by IBM for its OS/2 and Microsoft for its Windows as a standard protocol for file sharing and printing services.

#### **Outline font**

With outline fonts, character outlines are represented with numerical expressions and fonts can be enlarged or reduced in different ways by changing the numeric values of those expressions. Printing remains clear even if you enlarge fonts, since the characters are defined with outlines represented with numerical expressions. You can specify the font size in steps of 0.25 points up to 999.75 points.

#### PDF/A

This is "ISO 19005-1. Document management - Electronic document file format for long-term preservation - Part 1: Use of PDF (PDF/A)", and is a file format based on PDF 1.4. It has been standardized as ISO 19005-1, and is a specialization of PDF, which has been mainly used for printing, for long-term storage. A new part, ISO 19005-2 (PDF/A-2), is currently being prepared.

#### **POP3 (Post Office Protocol 3)**

A standard protocol to receive E-mail from the server in which the mail is stored on the Internet or an intranet.

#### **PostScript**

A page description language developed by Adobe Systems. It enables flexible font functions and highly-functional graphics, allowing higher quality printing. The first version called Level 1 was launched in 1985, followed by Level 2 that enabled color printing and two-byte languages (e.g. Japanese) in 1990. In 1996, Level 3 was released as an update for the Internet access and PDF format as well as gradual improvements in implementation technologies.

#### PPM (prints per minute)

This indicates the number of A4 size printouts made in one minute.

#### **Printer Driver**

The software to enable you to print data created on any application software. The printer driver for the machine is contained in the DVD enclosed in the package. Install the printer driver on the computer connected to the machine.

#### RA(Stateless)

The IPv6 router communicates (transmits) information such as the global address prefix using ICMPv6. This information is the Router Advertisement (RA).

ICMPv6 stands for Internet Control Message Protocol, and is a IPv6 standard defined in the RFC 2463 "Internet Control Message Protocol (ICMPv6) for the Internet Protocol Version 6 (IPv6) Specification".

#### **RAM Disk**

Using part of the printer's memory as a virtual disk, you can set any amount of memory from overall printer memory as a RAM disk in order to use features such as electronic sorting (shortening print time).

#### **SMTP (Simple Mail Transfer Protocol)**

A protocol for E-mail transmission over the Internet or an intranet. It is used for transferring mail between mail servers as well as for sending mail from clients to their servers.

#### **Status Page**

The page lists machine conditions.

#### **Subnet Mask**

The subnet mask is a way of augmenting the network address section of an IP address.

A subnet mask represents all network address sections as 1 and all host address sections as 0. The number of bits in the prefix indicates the length of the network address. The term "prefix" refers to something added to the beginning and, in this context, indicates the first section of the IP address. When an IP address is written, the length of the network address is indicated by the prefix length after a forward slash (/). For example, "24" in the address "133.210.2.0/24". In this way, "133.210.2.0/24" denotes the IP address "133.210.2.0" with a 24-bit prefix (network section). This new network address section (originally part of the host address) made possible by the subnet mask is referred to as the subnet address. When you enter the subnet mask, be sure to set the "DHCP" setting to "Off".

#### TCP/IP (Transmission Control Protocol/Internet Protocol)

TCP/IP is a suite of protocols designed to define the way computers and other devices communicate with each other over a network.

#### TCP/IP (IPv6)

TCP/IP (IPv6) is based on the current Internet protocol, TCP/IP (IPv4). IPv6 is the next-generation Internet protocol and expands the available address space, which resolves the problem of the lack of addresses under IPv4, while also introducing other improvements such as additional security functionality and the capacity to prioritize data transmission.

#### TWAIN (Technology Without An Interesting Name)

A technical specification for connecting scanners, digital cameras, and other image equipment to computers. The TWAIN compatible devices enable you to process image data on any relevant application software. TWAIN is adopted on a large amount of graphic software (e.g. Adobe Photoshop) and OCR software.

#### **USB (Universal Serial Bus) 2.0**

A USB interface standard for Hi-Speed USB 2.0. The maximum transfer rate is 480 Mbps. This machine is equipped with USB 2.0 for high-speed data transfer.

#### WIA (Windows Imaging Acquisition)

A function to import images supported after Windows Me/XP from digital cameras and other peripheral devices. This function replaces what TWAIN used to do. The feature is provided as a part of Windows functions and improves ease of operation, so that you import images directly to My Computer without using any application.
