READY FOR THE NEXT GENERATION?

These days, smartphones and tablets don't just connect us with the rest of the world, but also with our working world. It's time for an A4 colour multifunctional system that can keep up! The 301ci masters communication within your network as well as with your mobile devices. But that's not all! It understands how to simplify and automate complex workflows and is also ahead of the game when it comes to environmental friendliness. Be perfectly equipped for the next generation.

HIGHLIGHTS:

Well-equipped: The 301ci features a large touch display for intuitive operation, supports conventional standards for mobile printing and scanning and offers the option of integrating numerous innovative HyPAS apps.* All this supports the simple, time-effective and highly automated completion of your recurring daily office tasks, and frees up even more time.

Well-thought-out: Even in its basic design, the 301ci wows with its 75-page original feeder for quickly scanning up to 40 image pages per minute and a 500-page universal cassette for A6R to A4 media with a paper weight of up to 200 g/m^2. However, you can get a lot more from and put a lot more into it – for example, a paper capacity of max. 3,100 sheets and different finishing options, from stapling to hole punching, as well as offsetting output or using the multi-tray.

Well-protected: Sensitive data is best handled by the 301ci, as if desired, it only outputs when the correct password has been entered or when it has been authenticated using a card reader* and chip card* or transponder.* Optionally, the Data Security Kit for hard disk data offers the perfect protection, as it deletes and overwrites data securely and sustainably so that it cannot be reconstructed.

Well-adapted: On top of offering high-tech features and a subtle, dark design, the 301ci is environmentally friendly. Its low noise level can be reduced even further in quiet mode, so that you can always fully concentrate on your work. In doing so, its energy consumption is amazingly low and it therefore meets the strictest requirements!
